Street Reclaiming Creating Livable Streets And Vibrant Communities

Raymond Charles Rauscher

Street Reclaiming Creating Livable Streets And Vibrant Communities:

Street Reclaiming David Engwicht, 1999 This book is about the cultural and economic significance of street life Ever since ancient Athens and Greece Engwicht argues streets have been a major center of commerce socialization and cultural exchange But the advent of automobiles and suburbanization in the 20th century eroded the richness of American streetlife Streets and sidewalks once filled with people and furniture are now filled with automobiles carrying citizens to those indoor streets malls Using an abundance of drawings that detail urban traffic patterns Engwicht prescribes a series of creative methods for returning vibrancy to the street everything from reducing traffic with more one way routes to making avenues more like living rooms with the addition of rugs television sets and bulletin boards **Superbia!** Dan Chiras, Dave Wann, 2009-03-01 The only book that shows how to transform existing suburbs to create environment and people friendly neighborhoods New York Neighborhoods - Addressing Sustainable City Principles Raymond Charles Rauscher, 2017-09-01 This book examines the neighborhoods of New York City to determine to what extent planning in New York addresses Sustainable City Principles SCPs Part I looks at the background to planning urban areas in the face of global urban changes These changes i e population movements and densification of cities are placing pressures on cities worldwide Chapter 1 provides a background to these global pressures i e population growth and their implications Chapter 2 looks closer at New York planning and introduces Sustainable City Principles SCPs Part II introduces nine selected neighborhoods within Manhattan and examines to what extent planning of these neighborhoods addresses the SCPs For each chapter a neighborhood background is provided and results of the author s field survey are reviewed Part III examines the selected neighborhoods within Brooklyn to determine to what extent planning of those neighborhoods addresses the SCPs Part IV examines the last three neighborhoods in Queens and addresses the SCPs Part V examines conclusions reached from examining the nine neighborhoods These conclusions are used to determine the extent that the City Council and the community are addressing SCPs in planning neighborhoods Finally lessons learned from these conclusions are assessed for their relevance to planning neighborhoods anywhere in the world Creating Livable Streets ,2002 **Sustainable Urban Development Reader** Stephen M. Wheeler, Timothy Beatley, 2014-10-03 Building on the success of its second edition the third edition of the Sustainable Urban Development Reader provides a generous selection of classic and contemporary readings giving a broad introduction to this topic It begins by tracing the roots of the sustainable development concept in the nineteenth and twentieth centuries before presenting readings on a number of dimensions of the sustainability concept Topics covered include land use and urban design transportation ecological planning and restoration energy and materials use economic development social and environmental justice and green architecture and building All sections have a concise editorial introduction that places the selection in context and suggests further reading Additional sections cover tools for sustainable development international sustainable development visions of sustainable community and case studies from

around the world The book also includes educational exercises for individuals university classes or community groups and an extensive list of recommended readings The anthology remains unique in presenting a broad array of classic and contemporary readings in this field each with a concise introduction placing it within the context of this evolving discourse The Sustainable Urban Development Reader presents an authoritative overview of the field using original sources in a highly readable format for university classes in urban studies environmental studies the social sciences and related fields It also makes a wide range of sustainable urban planning related material available to the public in a clear and accessible way forming an indispensable resource for anyone interested in the future of urban environments

Street Reclaiming David Engwicht,1999 This book is about the cultural and economic significance of street life Ever since ancient Athens and Greece Engwicht argues streets have been a major center of commerce socialization and cultural exchange But the advent of automobiles and suburbanization in the 20th century eroded the richness of American streetlife Streets and sidewalks once filled with people and furniture are now filled with automobiles carrying citizens to those indoor streets malls Using an abundance of drawings that detail urban traffic patterns Engwicht prescribes a series of creative methods for returning vibrancy to the street everything from reducing traffic with more one way routes to making avenues more like living rooms with the addition of rugs television sets and bulletin boards

Managing Capital Flows in East Asia ,1996-01-01 Analyzes the deficiencies of the budget system and recommends ways of improving fiscal management so that it meets the requirements of a decentralized market based economy The structural transformation of the Russian economy since 1992 has been accompanied by major changes in the countrys fiscal picture ranging from massive reductions in government spending through the introduction of noninflationary treasury bill financing to fiscal decentralization This report analyzes the deficiencies of the budget system and recommends ways of improving fiscal management so that it meets the requirements of a decentralized market based economy The study focuses on two crucial and interrelated features of fiscal management that determine the outcome of fiscal policy and the allocative efficiency of government resources intergovernmental fiscal relations and the structural technical and institutional aspects of the budget system

Brooklyn's Bushwick - Urban Renewal in New York, USA Raymond Charles Rauscher,Salim Momtaz,2014-05-05 This book offers an extended case study of the urban community of Bushwick located in the Brooklyn borough of New York City The authors begin with a broad review of the history of Bushwick and Brooklyn from before the earliest European settlements of the 1600s through the 18th and 19th centuries and up the 1960s Chapter Two begins by tracing the steep decline of the community which culminated in catastrophic fires and looting in the wake of New York s electrical blackout of 1977 and goes on to describe the beginnings of urban planning and renewal efforts which launched the recovery of Bushwick in the 1980s to early 2000s Chapter Three steps back from the immediacy of the community to discuss urban change from a theoretical perspective The authors outline advances in sustainable urban planning and describe how these apply to Bushwick and the wider Brooklyn community

Chapter Four offers a detailed examination of the intent and function of New York's community board planning system known as the Charter 197 a program. In Chapter Five the authors examine the 197 a planning process and its application in the areas of Bushwick Williamsburg and Greenpoint in Northeast Brooklyn Brooklyn Downtown and in Southeast Brooklyn including Coney Island. The following chapter examines a number of innovative Bushwick high schools that offer practical experience in urban planning. Drawing the urban planning experiences together the book concludes with a look at future directions in city renewal. Emphasis here is placed on sustainable urban planning and the lessons to be learned from the experience of Bushwick and Brooklyn. The specifics of urban planning and renewal are illustrated with tables and figures. The details of planning are informed by an overarching sense of history beginning with the dedication of the book to the memory of six Universalist writers associated with New York: Henry Thoreau, Helena Blavatsky, Henry George, Henry Miller, Arthur Miller, and Walt Whitman. A rich trove of historical materials ranging from family sketches to school rosters to rarely seen photographs helps to keep the survey and analysis of urban planning grounded in the lives of Bushwick's residents past present and future.

The Sustainable Urban Development Reader Stephen M. Wheeler, Timothy Beatley, 2004. Bringing together classic readings from a wide variety of sources, this key book investigates how our cities and towns can become more sustainable. Thirty-eight selections span issues such as land use planning, urban design, transportation, ecological restoration, economic development, resource use, and equity planning. Section introductions outline the major themes whilst the editors' introductions to the individual writings explain their interest and significance to wider debates. Additional sections present twenty-four case studies of real-world sustainable urban planning examples, sustainability planning exercises, and further reading. Providing background in theory, practical application, and vision in a clear, accessible format, *The Sustainable Urban Development Reader* is an essential resource for students, professionals, and indeed anyone interested in the future of urban environments.

Guerrilla Gardening David Tracey, 2007-04-01. The term guerrilla may bring to mind a small band of armed soldiers moving in the dead of night on a stealth mission. In the case of guerrilla gardening, the soldiers are planters, the weapons are shovels, and the mission is to transform an abandoned lot into a thing of beauty. Once an environmentalist's nonviolent direct action for inner-city renewal, this movement is spreading to all types of people in cities around the world. These modern-day Johnny Appleseeds perform random acts of gardening, often without permission. Typical targets are vacant lots, railway land, underused public squares, and back alleys. The concept is simple, whimsical, and has the cheeky appeal of being a not-quite-legal call to action. Dig in some soil, plant a few seeds, or mend a sagging fence: one good deed inspiring another, with win-win benefits all around. *Guerrilla Gardening* outlines the power to the people campaign for greening our cities. Tips for effective involvement include finding plants and seeds cheap or free, handling city officials, getting the dirt on soil, planting to bring back the birds, knowing when to ask first. Social activists, city dwellers, and longtime gardeners will delight in this fast-paced and funny call to arms. David Tracey is a journalist and environmental designer who operates

EcoUrbanist in Vancouver He is executive director of Tree City Canada a nonprofit ecological engagement group *Urban Design* Jon Lang, 2017-03-31 *Urban Design A Typology of Procedures and Products* 2nd Edition provides a comprehensive and accessible introduction to urban design defining the field and addressing the controversies and goals of urban design Including over 50 updated international case studies this new edition presents a three dimensional model with which to categorize the processes and products involved product type paradigm type and procedural type The case studies not only illuminate the typology but provide information that designers can use as precedents in their own work Uniquely these case study projects are framed by the design paradigm employed categorized by procedural type instead of instrumental or land use function The categories used here are Total Urban Design All of a piece Urban Design Plug in Urban Design and Piece by piece Urban Design Written for both professionals and those encountering urban design in their day to day life *Urban Design* is an essential introduction to the field and practice considering the future direction of the field and what can be learned from the past

Steiner, Kent Butler, 2012-09-17 The new student edition of the definitive reference on urban planning and design *Planning and Urban Design Standards Student Edition* is the authoritative and reliable volume designed to teach students best practices and guidelines for urban planning and design Edited from the main volume to meet the serious student s needs this Student Edition is packed with more than 1 400 informative illustrations and includes the latest rules of thumb for designing and evaluating any land use scheme from street plantings to new subdivisions Students find real help understanding all the practical information on the physical aspects of planning and urban design they are required to know including Plans and plan making Environmental planning and management Building types Transportation Utilities Parks and open space farming and forestry Places and districts Design considerations Projections and demand analysis Impact assessment Mapping Legal foundations Growth management preservation conservation and reuse Economic and real estate development *Planning and Urban Design Standards Student Edition* provides essential specification and detailing information for various types of plans environmental factors and hazards building types transportation planning and mapping and GIS In addition expert advice guides readers on practical and graphical skills such as mapping plan types and transportation planning

Our Overweight Children Sharron Dalton, 2005-09-14 This handbook is for parents with overweight children and medical professionals who work with this population to help insure they don t grow up to be adults with serious health problems related to their excessive weight

Companion to Urban Design Tridib Banerjee, Anastasia Loukaitou-Sideris, 2011-03-17 Today the practice of urban design has forged a distinctive identity with applications at many different scales ranging from the block or street scale to the scale of metropolitan and regional landscapes Urban design interfaces many aspects of contemporary public policy multiculturalism healthy cities environmental justice economic development climate change energy conservations protection of natural environments sustainable development community liveability and the like The field now

comprises a core body of knowledge that enfold a right history of ideas paradigms principles tools research and applications enriched by electric influences from the humanities and social and natural sciences Companion to Urban Design includes more than fifty original contributions from internationally recognized authorities in the field These contributions address the following questions What are the important ideas that have shaped the field and the current practice of urban design What are the major methods and processes that have influenced the practice of urban design at various scales What are the current innovations relevant to the pedagogy of urban design What are the lingering debates conflicts ad contradictions in the theory and practice of urban design How could urban design respond to the contemporary challenges of climate change sustainability active living initiatives globalization and the like What are the significant disciplinary influences on the theory research and practice of urban design in recent times There has never before been a more authoritative and comprehensive companion that includes core foundational and pioneering ideas and concepts of urban design This book serves as an invaluable guide for undergraduate and postgraduate students future professionals and practitioners interested in architecture landscape architecture and urban planning but also in urban studies urban affairs geography and related fields

Streets and Patterns Stephen Marshall,2004-08-02 There is an emerging consensus that urban street layouts should be planned with greater attention to placemaking and urban design quality while maintaining the conventional transport functions of accessibility and connectivity However it is not always clear how this might be achieved we still tend to have different sets of guidance for main road networks and for local streetgrids What is needed is a framework that addresses both of these plus main streets that don t easily fit either set of guidance in an integrative manner Streets and Patterns takes up this challenge to create a coherent rationale to underpin today s streets oriented urban design agenda Informed by recent research the book looks behind existing design conventions and beyond immediate policy rhetoric and analyses a range of first principles from Le Corbusier and Colin Buchanan to New Urbanism The book provides a new framework for the design and planning of urban layouts integrating transport issues such as road hierarchy arterial streets and multi modal networks with urban design and planning issues such as street type grid type mixed use blocks and urban design coding **Home**

Zones Mike Biddulph,2001-12-12 Home zones areas where cars travel slowly and space has been created for children and environmental improvement are a common feature of the urban landscape This handbook explains how to plan and design a home zone in an existing street or as part of a new residential area including advice and illustrations derived from recent home zone schemes **Routledge Handbook of Cultural Gerontology** Julia Twigg,Wendy Martin,2015-06-12 Later years are changing under the impact of demographic social and cultural shifts No longer confined to the sphere of social welfare they are now studied within a wider cultural framework that encompasses new experiences and new modes of being Drawing on influences from the arts and humanities and deploying diverse methodologies visual literary spatial and theoretical perspectives Cultural Gerontology has brought new aspects of later life into view This major new publication draws together

these currents including Theory and Methods Embodiment Identities and Social Relationships Consumption and Leisure and Time and Space Based on specially commissioned chapters by leading international authors the Routledge Handbook of Cultural Gerontology will provide concise authoritative reviews of the key debates and themes shaping this exciting new field

Children's Active Transportation Richard Larouche, 2018-06-15 *Children's Active Transportation* is a rigorous and comprehensive examination of the current research and interventions on active transportation for children and youth As the travel behaviors of these groups tend to be highly routinized and their mobility faces unique constraints such as parental restrictions mandatory school attendance and the inability to drive a motor vehicle before late adolescence this book examines the key factors that influence travel behavior among children and youth providing key insights into lessons learned from current interventions Readers will find a resource that clearly demonstrates how critical it is for children to develop strong active transportation habits that carry into adulthood Discusses the correlates that exist between children's active transportation using a social and ecological model Summarizes active transportation interventions that show what works to increase non motorized modes of travel in children Describes the factors that influence the implementation and effectiveness of interventions

Environmental Science Daniel D. Chiras, 2006 Completely updated the seventh edition of *Environmental Science* enlightens students on the fundamental causes of the current environmental crisis and offers ideas on how we as a global community can create a sustainable future

Biophilic Design Stephen R. Kellert, Judith Heerwagen, Martin Mador, 2011-09-26 When nature inspires our architecture not just how it looks but how buildings and communities actually function we will have made great strides as a society *Biophilic Design* provides us with tremendous insight into the why then builds us a road map for what is sure to be the next great design journey of our times Rick Fedrizzi President CEO and Founding Chairman U S Green Building Council Having seen firsthand in my company the power of biomimicry to stimulate a wellspring of profitable innovation I can say unequivocally that biophilic design is the real deal Kellert Heerwagen and Mador have compiled the wisdom of world renowned experts to produce this exquisite book it is must reading for scientists philosophers engineers architects and designers and most especially businesspeople Anyone looking for the key to a new type of prosperity that respects the earth should start here Ray C Anderson founder and Chair Interface Inc The groundbreaking guide to the emerging practice of biophilic design This book offers a paradigm shift in how we design and build our buildings and our communities one that recognizes that the positive experience of natural systems and processes in our buildings and constructed landscapes is critical to human health performance and well being Biophilic design is about humanity's place in nature and the natural world's place in human society where mutuality respect and enriching relationships can and should exist at all levels and should emerge as the norm rather than the exception Written for architects landscape architects planners developers environmental designers as well as building owners *Biophilic Design The Theory Science and Practice of Bringing Buildings to Life* is a guide to the theory science and practice of biophilic design

Twenty three original and timely essays by world renowned scientists designers and practitioners including Edward O Wilson Howard Frumkin David Orr Grant Hildebrand Stephen Kieran Tim Beatley Jonathan Rose Janine Benyus Roger Ulrich Bert Gregory Robert Berkebile William Browning and Vivian Loftness among others address The basic concepts of biophilia its expression in the built environment and how biophilic design connects to human biology evolution and development The science and benefits of biophilic design on human health childhood development healthcare and more The practice of biophilic design how to implement biophilic design strategies to create buildings that connect people with nature and provide comfortable and productive places for people in which they can live work and study Biophilic design at any scale from buildings to cities begins with a few simple questions How does the built environment affect the natural environment How will nature affect human experience and aspiration Most of all how can we achieve sustained and reciprocal benefits between the two This prescient groundbreaking book provides the answers
