**How to Make Your Child Smart and Intelligent?** Dr. J.C.Lall, Dr. S.B.Lall, 2018-08-09 Many experts now believe that an average child's intelligence develops up to the ages of six to eight years as it does between the ages of 8 to 18 years. Early years in child development are crucial for his or her smartness and intelligence. A restricted or under-stimulated environment may restrict the intelligence of a child. Intelligence as a whole is a combination of book smartness and street environment smartness and is required for success in life. This book contains valuable insight for development of smartness and intelligence and also explains how to increase it. This is described in the form of a practical guide for parents which will help children at home, school and later in life in a positive way. It ends. To be continued in 2014. It spans the periods of precontact with Europeans, Spanish colonization, Mexican nationhood, the territorial West, early and Depression era statehood and the development of metropolitan Tucson after World War II. It offers not one definitive historical account but a collection of stories in which threads appear that may disappear beneath the surface for a while and reappear later like some desert streams. It leaves spaces for and invites the stories of its readers. About the Author: John Warnock was born in Tucson and graduated from Tucson High when it was one of the largest high schools in the nation. He attended Amherst College in Massachusetts, Oxford University in England and the New York University School of Law. After teaching at the University of Wyoming in Laramie, he returned to Tucson in 1990 to join the English Department at the University of Arizona. He is now Professor Emeritus at UA and resides in Tucson. *Learning the*
