Visualizing the Street

Pedram Dibazar, Judith Naeff, 2025-10-01 From user generated images of streets to professional architectural renderings and from digital maps and drone footages to representations of invisible digital ecologies this collection of essays analyses the emergent practices of visualizing the street Today advancements in digital technologies of the image have given rise to the production and dissemination of imagery of streets and urban realities in multiple forms The ubiquitous presence of digital visualizations has in turn created new forms of urban practice and modes of spatial encounter Everyone who carries a smartphone not only plays an increasingly significant role in the production editing and circulation of images of the street but also relies on those images to experience urban worlds and to navigate in them Such entangled forms of image making and image sharing have constructed new imaginaries of the street and have had a significant impact on the ways in which contemporary and future streets are understood imagined documented navigated mediated and visualized Visualizing the Street investigates the social and cultural significance of these new developments at the intersection of visual culture and urban space The interdisciplinary essays provide new concepts theories and research methods that combine close analyses of street images and imaginaries with the study of the practices of their production and circulation The book covers a wide range of visible and invisible geographies From Hong Kong s streets to Rio s favelas from Sydney s suburbs to London s street markets and from Damascus war torn streets to

Istanbul's sidewalks and engages with multiple ways in which visualizations of the street function to document street protests and urban change to build imaginaries of urban communities and alternate worlds and to help navigate streetscapes

Graffiti and Street Art Konstantinos Avramidis, Myrto Tsilimpounidi, 2016-12-08 Graffiti and street art images are ubiquitous and they enjoy a very special place in collective imaginary due to their ambiguous nature. Sometimes enigmatic in meaning, often stylistically crude and aesthetically aggressive, yet always visually arresting, they fill our field of vision with texts and images that no one can escape. As they take place on surfaces and travel through various channels, they provide viewers an entry point to the subtext of the cities we live in while questioning how we read, write, and represent them. This book is structured around these three distinct, albeit by definition interwoven, key frames. The contributors of this volume critically investigate underexplored urban contexts in which graffiti and street art appear, shed light on previously unexamined aspects of these practices, and introduce innovative methodologies regarding the treatment of these images. Throughout, the focus is on the relationship of graffiti and street art with urban space and the various manifestations of these idiosyncratic meetings. In this book, the emphasis is shifted from what the physical texts say to what these practices and their produced images do in different contexts. All chapters are original and come from experts in various fields such as Architecture, Urban Studies, Sociology, Criminology, Anthropology, and Visual Cultures, as well as scholars that transcend traditional disciplinary frameworks. This exciting new collection is essential reading for advanced undergraduates as well as postgraduates and academics interested in the subject matter. It is also accessible to a non-academic audience such as art practitioners and policymakers alike or anyone keen on deepening their knowledge on how graffiti and street art affect the ways urban environments are experienced, understood, and envisioned. Unfamiliar Streets Katherine A.

Bussard, 2014-03-11 div Revolutionizing the history of street photography. Unfamiliar Streets demonstrates an expanded understanding of the genre through the work of a fashion photographer, a photojournalist, a conceptual artist, and a contemporary artist. DIV Home Spaces, Street Styles Leslie J. Bank, 2011-01-10 This book revisits the classic anthropology study *The Xhosa in Town*, series based on research in the South African city of East London conducted during the 1950s. The original studies revealed that there were two opposed responses to urbanisation in East London's African locations: one embracing Westernisation, European values, and Christianity, and another opposed to it. Leslie Bank returned to the areas of East London studied in the 1950s to assess how social and political changes have transformed these areas, in particular the apartheid reconstruction of the 1960s and 1970s and the struggle for liberation followed by the post-Apartheid period in the 1980s and 1990s. Bank has added important theoretical insights to this rich ethnography and forged strong links with issues that transcend the particularities of his urban study. **Routledge Handbook of Street Culture** Jeffrey Ross, 2020-10-05 Discussions of street culture exist in a variety of academic disciplines, yet a handbook that brings together the diversity of scholarship on this subject has yet to be produced.
