Black Jacks W. Jeffrey Bolster, 2009-06-30 Few Americans black or white recognize the degree to which early African American history is a maritime history W Jeffrey Bolster shatters

the myth that black seafaring in the age of sail was limited to the Middle Passage Seafaring was one of the most significant occupations among both enslaved and free black men between 1740 and 1865 Tens of thousands of black seamen sailed on lofty clippers and modest coasters They sailed in whalers warships and privateers Some were slaves forced to work at sea but by 1800 most were free men seeking liberty and economic opportunity aboard ship Bolster brings an intimate understanding of the sea to this extraordinary chapter in the formation of black America Because of their unusual mobility sailors were the eyes and ears to worlds beyond the limited horizon of black communities ashore Sometimes helping to smuggle slaves to freedom they were more often a unique conduit for news and information of concern to blacks But for all its opportunities life at sea was difficult Blacks actively contributed to the Atlantic maritime culture shared by all seamen but were often outsiders within it Capturing that tension Black Jacks examines not only how common experiences drew black and white sailors together even as deeply internalized prejudices drove them apart but also how the meaning of race aboard ship changed with time Bolster traces the story to the end of the Civil War when emancipated blacks began to be systematically excluded from maritime work Rescuing African American seamen from obscurity this stirring account reveals the critical role sailors played in helping forge new identities for black people in America An epic tale of the rise and fall of black seafaring Black Jacks is African Americans freedom story presented from a fresh perspective *The Twenty-first Century African American Novel and the Critique of Whiteness in Everyday Life* E. Lâle Demirtürk, 2016-05-25 This book examines the post 9 11 African American novels developing a new critical discourse on everyday discursive practices of whiteness The critique of everyday life in the racial context of post 9 11 American society is important in considering diverse forms of the lived experiences and subjectivities of black people in the novels They help us see that African American representations of the city have political significance in that the neo urban novel explores the possibility of a black dialogic communication to build a transformative social change Since the real power of Whiteness lies in its discursive power the book reveals the urgency to understand not only how whiteness works in everyday life in American society But it also explores how to cultivate new possibilities of configuring and performing Blackness differently as a response to the post 9 11 configurations of the culture of fear to produce new ways of interactional social relations that can eventually open up the space of critical awareness for white people to work against rather than reinforce discursive practices of White supremacy in everyday life This book explores how the multiple subjectivities and transformative acts of blackness can offer ways of subverting the discursive power of the white embodied practices What defines post 9 11 America as a nation that is consumed by the fear of racialized terrorists is its roots in the fear of uncontrollable Blackness as excess and ominous threat in the domestic terrain through which the ideology of White supremacy has constructed for governing through Whiteness African American urban novels published in the twenty first century respond to the discursive power of normative Whiteness that regulates black bodies selves and lives This book demonstrates how black people contest white dominant social spaces as sites of black criminality and exclusion in

an attempt to re signify them as the sites of black transformative change through personal and grassroots activism through their performativity of Blackness as an agential identity formation in their interpersonal urban social encounters with white people Hence the vulnerable spaces of Whiteness in interracial urban encounters as it pervasively addresses those moments of transformative change enacted by Black characters in the face of the discursive practices of whiteness in the everyday life These novels celebrate multifarious representations of black individuals who are capable of using their agency to subvert White discursive power in finding ways in their personal and grassroots activism to transform the culture of fear that locates Blackness as such in an attempt to make a difference in the American society at large
