Programs aim to develop problem solving abilities in students who wish to improve their skills. Additionally, the program may provide challenging, stimulating, and inspirational learning experiences through engagement with math and logic problem solving for gifted children. This book accompanies a Level Two student through his/her second semester of the problem solving program or it may be used independently as a problem solving workbook. All Brain Power programs are based on a step-by-step approach which enables students to understand problems of increasing complexity. Level Two continues to equip students typically in grades 6 to 8 with problem solving strategies and techniques and supports the application of these skills to algebra and geometry. The implications for improving one's problem solving skills are numerous. These include a more positive attitude toward math and science, improved thinking flexibility and creativity in all subject areas, as well as increased success on academic, gifted, university admissions, and professional program tests, many of which are designed with an emphasis on assessing higher order thinking skills. Moreover, knowledge of a range of problem solving strategies coupled with experience in their application have benefits which transcend the classroom and enter the realm of professional, social, and intellectual accomplishment.

**Mathematics Assessment and Intervention in a PLC at Work®, Second Edition**

Sarah Schuhl, Timothy D. Kanold, Mona Toncheff, Bill Barnes, Jessica Kanold-McIntyre, Matthew R. Larson, Georgina Rivera, 2023-06-27. This second edition book from the Every Student Can Learn Mathematics series guides you and your collaborative teams in building student and collective teacher efficacy through the formative use of common assessments. Discover how you can work interdependently to design high quality assessments, calibrate scoring of student work, and analyze data to enhance instructional practices and sustain effective Tier 2 learning experiences for students. New and enhanced protocols and examples provide practical tools and models for immediate implementation. Improve your mathematics collaborative team assessment processes using the four critical questions of a PLC at Work along with an RTI or MTSS focus on effective Tier 2 interventions. This book will help K-12 mathematics teachers and teacher teams learn the criteria for the formative use of all unit-by-unit common mathematics assessments. Identify essential learning standards as drivers for common assessments and student reflection. Design and use high quality common assessments and team scoring agreements. Calibrate the scoring of student work for consistent formative feedback to students. Engage in data protocols that analyze student work to enhance instructional practices, identify students in need of targeted intervention or extension, and create effective intervention learning experiences. Determine how students can reflect and set goals using the formative feedback process based on common unit-by-unit assessments.
