Markets, Managers and Theory in Education John Halliday, 2018-05-11 Originally published in 1990 This book is concerned with the logic of the relationship between educational theory and practice It is a fundamental examination of three ideas Vocationalism the idea that the central purpose of education is to prepare people for work Managerialism the idea that

this preparation can be managed by those not intimately concerned with the practice of teaching Consumerism the idea that education should be led by the demands of the market Halliday argues that promoters of these ideas share a mistaken belief in the value of pursuing a supposed ideal of objective precision in education He traces the theoretical origins of this ideal and its practical consequences In particular he argues that educational development is likely to remain ossified within a particular theoretical framework unless competing developments are allowed to flourish alongside one another He concludes by outlining the ways in which this competition might be managed

Bullying and Behavioural Conflict at Work Lizzie Barmes, 2016 In an empirical study of the interaction between law adjudication and conflicts about behavior in the workplace Lizzie Barmes analyses how labor and equality rights operate in practice in the UK Arguing that individual employment rights have a Janus faced quality simultaneously challenging and sustaining existing distributions of power between management and employees she calls for legal intervention at work to focus on resolving tensions between collective and individual concerns across the range of workplaces and to stimulate the expression and reconciliation of different viewpoints in the implementation and enforcement of individual legal entitlements Based on extensive primary research the volume surveys and analyses experiences and attitudes towards negative behavior in the workplace and explains relevant employment and equality law as it has developed from 1995 to the present day covering the major case law and legislative developments over this time This book provides qualitative analysis of authoritative UK judgments about behavioral conflict at work from 1995 to 2010 as well as of interviews with senior managers and senior lawyers allowing the reader first hand insight into the influence of law and legal process on problems and conflict at work

Practicing Peace Michael John Wood, 2022-04-07 This book is about the practice of peace in daily life We talk about the importance of peace but often struggle to embody it Someone annoys us and suddenly we are embroiled in a vortex of conflict We may ask ourselves How can we live with greater integrity How can we make a positive difference in the world without diminishing others or ourselves The author proposes that practicing peace is not something that we do by heroic effort Christ by pure grace breaks through to us when we least expect it Christ is both received and hosted in an open space of God s creation This book invites readers on a journey which interweaves theology

contemplation and action in intensely practical ways. Containing numerous anecdotes and thought provoking questions the book will be a useful resource for church study groups and leadership programs. As we explore this embodied spirituality we may discover that the Christlike God's restorative love is transforming us into a people of peace.
