[Detroit Journal of Education](#) ,1922 **Liquid Scripture** Jeffrey S. Siker,2017-09-01 The electronic Bible is here to stay packaged in software on personal computers available as apps on tablets and cell phones Increasingly students look at glowing screens to consult the Bible in class and congregants do the same in Bible study and worship Jeffrey S Siker asks what difference does it make to our experience of Scripture if we no longer hold a book in our hands if we again scroll through Scripture How does the flow of electronic Scripture change our perception of the Bible s authority and significance Siker discusses the difference made when early Christians adopted the codex rather than the scroll and Gutenberg began the mass production of printed Bibles He also reviews the latest research on how the reading brain processes digital texts and how churches use digital Bibles including American Bible Society research and his own surveys of church leaders Siker asks does the proliferation of electronic translations reduce the perceived seriousness of Scripture Does it promote an individualistic response to the Bible How does the change from a physical Bible affect liturgical practice His synthesis of the advantages and risks of the digitized Bible merit serious reflection in classrooms and churches alike

**Academic Governance** Jenny Lewis,2013-10-08 Academia is an important site for producing knowledge which is crucial in driving economies and societies around the globe at the beginning of the 21st century Yet surprisingly little is known about how contemporary universities are shaped by the formal and multiple demands they face from national policy requirements particularly performance measurement What effects do these policies have on individual universities and the academics who work within them While policy surely has impacts on institutions and academics there are also numerous other things that shape academic life This book s starting point is that there are three main shaping forces that govern academia intellectual curiosity disciplinary traditions and research policy Bringing these three levels together into a framework this book examines how academia is governed both formally and

informally bridging the different aspects of governing knowledge networks through a large multi country study Author Jenny Lewis uses a large empirical study of academics in three countries Australia Britain and New Zealand and in the broad disciplinary areas of the humanities social sciences and sciences to demonstrate the analytical framework s application The book also offers some needed directions on what policy should and can do providing a snapshot of contemporary academic life in different disciplines and in different countries from the perspective of academics on the frontline The Politics of Researching Multilingually Prue Holmes, Judith Reynolds, Sara Ganassin, 2022-02-21 This book offers a unique understanding of how researchers linguistic resources and the languages they use in the research process are often politically and structurally shaped and constrained with implications for the reliability of the research The chapters are written by both experienced and novice researchers who examine how they negotiated the use of their own and others linguistic and communicative resources when undertaking their research in politically charged and linguistically and culturally diverse contexts The contributing authors are either from the Global South or engaged in work which is contextualised within the Global South or they face linguistic structural hegemonies in the Global North which challenge their research processes They utilise diverse theoretical methodological and disciplinary approaches to produce a collection of engaging and accessible accounts of researching multilingually in their contexts These accounts will help readers to make theoretically and methodologically informed choices about the political dimensions of languages in their own research when researching multilingually *The Academy and Literature*, 1913 **Examining Praxis**, 2008-01-01 This is a book for everyone trying to improve teacher education Based on experiences primarily in Sweden three models for assessment of student achievements are analysed the small thesis model the portfolio model and the case based model What are the characteristics of these types and how could they be understood in a broader perspective **Uyghur Women Activists in the Diaspora** Susan J. Palmer, Dilmurat Mahmut, Abdulmuqtedir Udun, 2024-03-21 Presenting the life stories of ten Uyghur women this book applies the techniques of narrative analysis to explore their changing worldviews and conversions to political engagement Born and raised in East Turkestan Xinjiang in the 1970s 90s each woman after personally experiencing incidents of ethnic discrimination chose to leave China before 2005 Settling in a western country they strive to become the voice of the Turkic people who are silenced or detained in the re education camps The narratives are based on interviews conducted online between 2020 and 2021 collected as a form of oral history The book focuses on the escalating tensions turning points experienced in their youth and the religious political and psychological factors that prompted their transformations in self identity ideology and the emergence of a new Uyghur Muslim feminism Through the women s stories the book describes how women activists are navigating the competing reality constructions of the dire situation in the Uyghur Homeland and actively restorying a genocide to bring about social and political change **The Power of Collegiality** Nadja Bieletzki, 2017-12-16 Nadja Bieletzki explores how university presidents lead universities She provides insights into the upper echelons of higher

education management and focuses especially on university presidents in Germany Special attention is given to the career background of university presidents and the way they conduct reform projects Based on the results from semi structured expert interviews and their qualitative analysis the author shows that university presidents do not use all their formal power although their position has been strengthened by law This can be explained by the collegial characteristics of universities which drive and restrict presidential actions Nadja Bielecki was awarded the Ulrich Teichler Prize for Excellent Dissertations 2016

**The Law of Higher Education** Dennis Farrington, David Palfreyman, 2012-03-22 Written by two leading practitioners this comprehensive and practical guide to the law of higher education in the UK provides extensive analysis of the complex legal framework in which universities work and the remedies which may be sought in the event of disputes The Law of Higher Education has been fully updated to take account of the many legislative changes which have come into force since the publication of the first edition in 2006 The impact of new charity law changes in governance structures developments in the law of employment academic freedom issues and the increasing presence of academies and other private Higher Education Institutions are all dealt with in detail with reference to and analysis of the relevant case law throughout Although focussing on UK laws the new edition includes expanded material on the international context which has become particularly important as institutions are increasingly involved in international exchanges and collaborations as well as being subject to the increasing globalisation of higher education The text is linked to the updating service on the Oxford Centre for Higher Education Policy Studies website ensuring that readers are kept up to date with developments even after publication

**Nichu** John Calhoun Singleton, 1982-12 *Learning to Teach in an Era of Privatization* Christopher A. Lubienski, T. Jameson Brewer, 2019-07-19 Education policymakers often demonstrate surprisingly little awareness of how popular reforms impact teaching and teacher education In this book well regarded scholars help readers develop a more robust understanding of the nature of teacher preparation as well as an in depth grasp of how popular policies practices and ideologies have taken root domestically and internationally Contributors include Deron Boyles Anthony Cody Kerry Kretchmar Carmen Montecinos Beth Sondel and Christopher Tienken This book will help readers consider the possibilities of democratic visions in the teaching profession and in public education particularly in this time of intense political polarization when critical citizen engagement with our public institutions and policies is deeply needed Janelle Scott University of California Berkeley The chapters in this book make clear that ongoing policy disconnects cannot be ignored and that now is the time to elevate the teaching profession for students who have faced historical inequities Julian Vasquez Heilig dean University of Kentucky College of Education Public teaching and teacher education in the U S and in many other parts of the world are under assault by concerted efforts to deregulate and marketize them This collection of essays examines the consequences of these privatization efforts in the U S Chile and Singapore and should be required reading for those wanting to understand their complexity and consequences for teaching and teacher education today Ken Zeichner Boeing Professor of
