The Routledge Handbook of Research Methods in the Study of Religion Steven Engler, Michael Stausberg, 2013-06-17
This is the first comprehensive survey in English of research methods in the field of religious studies. It is designed to enable non-specialists and students at upper undergraduate and graduate levels to understand the variety of research methods used in the field. The aim is to create awareness of the relevant methods currently available and to stimulate an active interest in exploring unfamiliar methods, encouraging their use in research and enabling students and scholars to evaluate academic work with reference to methodological issues. A distinguished team of contributors cover a broad spectrum of topics from research ethics, hermeneutics and interviewing to Internet research and video analysis. Each chapter covers practical issues and challenges the theoretical basis of the respective method and the way it has been used in religious studies, illustrated by case studies. Natural Products and Brain Energy Metabolism: Astrocytes in Neurodegenerative Diseases, Volume I Fushun Wang, Shijun Xu, Fang Pan, Jason H. Huang, Alexei Verkhratsky, 2022-11-11 *Early Modern Medicine and Natural Philosophy* Peter Distelzweig, Benjamin Goldberg, Evan R. Ragland, 2015-12-11 This volume presents an innovative look at early modern medicine and natural philosophy as historically interrelated developments. The individual chapters chart this interrelation in a variety of contexts from the Humanists who drew on Hippocrates, Galen and Aristotle to answer philosophical and medical questions to medical debates on the limits and power of mechanism and on to eighteenth century controversies over medical materialism and atheism. The work presented here broadens our understanding of both philosophy and medicine in this period by illustrating the ways these disciplines were in deep theoretical and methodological dialogue and by demonstrating the importance of this dialogue for understanding their history. Taken together, these papers argue that to overlook the medical context of natural philosophy and the philosophical context of medicine is to overlook fundamentally important aspects of these intellectual endeavors. *Herbs and Natural Supplements, Volume 2* Lesley Braun, Marc Cohen, 2014-10-01 *Herbs and Natural Supplements* 4th Edition. An evidence-based guide is an authoritative evidence-based reference. This two-volume resource is essential to the safe and effective use of herbal, nutritional and food supplements. The second volume provides current evidence-based monographs on the 132 most popular herbs, nutrients and food supplements. Organised alphabetically, each monograph includes daily intake, main actions and indications, adverse reactions, contraindications and precautions, safety in pregnancy and more. Recommended by the Pharmacy Board of Australia as an evidence-based reference work, print that pharmacists are meant to have access to when dispensing. Contributed content from naturopaths, GPs, pharmacists and herbalists. Useful in a clinical setting as well as a reference book. It provides up-to-date evidence on the latest research impacting on herbal and natural medicine by top leaders in Australia within the fields of Pharmacy, Herbal Medicine and Natural Medicine. **Visualizing Medieval Medicine and Natural History, 1200-1550** Jean A. medicine pharmacy and natural history often confound our expectations about the functions of medical and scientific illustrations They do not look very much like the things they purport to portray and their actual usefulness in everyday medical practice or teaching is not obvious By looking at works as diverse as herbals jewellery surgery manuals lay health guides cinquecento paintings manuscripts of Pliny s Natural History and Leonardo s notebooks Visualizing Medieval Medicine and Natural History 1200 1550 addresses fundamental questions about the interplay of art and science from the thirteenth to the mid sixteenth century What counts as a medical illustration in the Middle Ages What are the purposes and audiences of the illustrations in medieval medical pharmaceutical and natural history texts How are images used to clarify expand authenticate and replace these texts How do images of natural objects observed phenomena and theoretical concepts amplify texts and convey complex cultural attitudes What features lead us to regard some of these images as typically medieval while other exactly contemporary images strike us as Renaissance or early modern in character Art historians medical historians historians of science and specialists in manuscripts and early printed books will welcome this wide ranging interdisciplinary examination of the role of visualization in early scientific inquiry **New insights into renal fibrosis and therapeutic effects of natural products, volume II** Dan-Qian Chen,Zhiyong Guo,2023-04-19

Proceedings of the 1st International Conference on Lifestyle Diseases and Natural Medicine (ICOLIFEMED 2024) Edy Fachrial,Suhartomi Suhartomi,2025-03-30 This book is an Open access In the past few decades there has been a growing recognition of the crucial role that lifestyle factors such as diet physical activity and stress management play in preventing and managing a wide range of chronic diseases Lifestyle medicine has emerged as a response to this recognition focusing on empowering individuals and communities to adopt healthier behaviors At the same time there has been a resurgence of interest in traditional and natural medicine approaches which often emphasize integrating mind body practices herbal remedies and other holistic therapies We encourage bringing together researchers clinicians policymakers and other stakeholders to explore the intersection of lifestyle diseases and natural medicine and to discuss how these complementary approaches can be integrated to address the health challenges of the 21st century For this purpose we are organizing The 1st International Conference on Lifestyle Diseases and Natural Medicine ICOLIFEMED which will be held on December 5 6th 2024 The theme of ICOLIFEMED 2024 is Integration of healthy lifestyle and natural medicine in the prevention and management of modern diseases About one hundred presenters and participants from Australia Japan China Malaysia Brunei Darussalam and Indonesia will participate in this event *A Diagnosis for Our Times* Matthew Schneirov,Jonathan David Geczik,2012-02-01 Despite having one of the most advanced systems of medicine in the world American consumers are increasingly turning to alternative medicine Through a study of two alternative health networks one New Age and the other conservative Christian *A Diagnosis for Our Times* examines the health regimes followed by clients of alternative practitioners the way people find meaning in non Western and pre modern health traditions and the relationship between alternative

health and other movements for change In sharp contrast with other work on this subject this book characterizes alternative health as a social movement and a cultural laboratory where people discover new values and new ways of living that may have larger implications The authors discover surprising commonalities between the cultural left and the religious right when it comes to healthcare and they evaluate the potential of alternative health to contribute to a new healthcare paradigm

Multi-targeted Natural Products as Cancer Therapeutics: Challenges and Opportunities, Volume I, 2nd edition Jiang-Jiang Qin, Wei-Dong Zhang, Huizi Jin, Sanjay K. Srivastava, 2024-01-11 This Research Topic is part of a series with Multi targeted Natural Products as Cancer Therapeutics Challenges and Opportunities Volume II Cancer remains a leading cause of disease related deaths worldwide despite recent advances in our understanding of cancer initiation progression and metastasis Chemotherapy and radiotherapy have been used as standard non surgical treatments of human cancer for decades however the survival rates of patients with cancer especially those with advanced diseases are still very low due to the high toxicities of these treatments as well as the severe side effects This fact has motivated researchers to discover new cancer therapeutics with minimum side effects which intensively promotes the rapid development of single specific molecule targeted therapies SSMTT Many efforts have been made in world wide cancer drug discovery research and several single molecule targeted therapies have been successfully developed Unfortunately most of the investments failed because cancer is a genetic disease and always harbors multiple alternations of molecules or genes at the genomic genetic and epigenetic levels The inhibition of a single molecule or signaling pathway by SSMTT frequently results in a hyperactive compensation of other cancer related molecules and signaling pathways as well as the subsequent development of drug resistance Therefore identifying multi targeted therapies i e drugs that are able to target multiple cancer related genes proteins or signaling pathways is a more promising way to success in developing new cancer therapeutics Natural products especially those from traditional Chinese medicine and folk remedies in other countries are an extraordinarily important source for new drug discovery over the past decades Of note many natural products have often been demonstrated to target several crucial genes or proteins in cancer related signaling networks and exert synergistic effects For example Japonicone A a dimeric sesquiterpenoid from the medicinal plant *Inula japonica* has been found to inhibit tumor growth and metastasis by dually targeting the TNF NF B and p53 MDM2 signaling pathways Traditionally researchers have believed that the multi targeting mechanisms of natural products have limited their use in cancer treatment due to the low specificity and potential side effects The growing interest in developing multi targeted cancer therapies may provide another golden opportunity to develop natural products as new cancer therapeutics Nevertheless critical investigations for a comprehensive understanding of the molecular mechanisms of natural products also mean more challenges Our long term goals are to fully understand the molecular targets and mechanisms of action of anticancer natural products and develop them as novel cancer preventive and therapeutic agents The specific goal of this Research Topic is to bring together the recent findings of newly identified anticancer natural

products especially those with multiple molecular targets Papers Original Research articles or Reviews which discuss the in vitro and in vivo efficacy and pharmacological and toxicological properties of natural products are also welcome to be submitted Guidelines for the conception and review of submissions As many anticancer drugs working as cytotoxic compounds have non selective effects annihilating their potential therapeutic benefits manuscripts are advised to provide evidence of a significant selectivity towards cancer cells vs healthy cells Specifically if the studied anticancer drug or modality does not target an oncogenic pathway the authors should make every effort possible to prove that the cytotoxic or cytostatic effects they have identified exhibit selectivity for cancer cells ideally 1 log difference in EC50 or IC50 vs non malignant cells eg fibroblasts or primary culture of cells The authors should also demonstrate the applicability of their anticancer modalities on a minimum of two well authenticated cancer cell lines ideally originating from distinct organs tissues For manuscripts dealing with plant extracts or other natural substances compounds the composition and the stability of the study material must be described in sufficient detail In particular for extracts chromatograms with characterization of the dominating compound s are requested The level of purity must be proven and included Please refer to the Four Pillars of Best Practice in Ethnopharmacology a subset of which concerning general standards in natural product research are applied to all such studies in all sections of Frontiers in Pharmacology
