Rome and the Hellenistic World Frank W. Walbank, 2002-09-05 This volume contains nineteen of the more important of Frank Walbank's essays on Polybius and is prefaced by a critical discussion of the main aspects of work done on that author. Several of these essays deal with specific historical problems for which Polybius is a major source. Five deal with Polybius as an historian and three with his attitude towards Rome; one of these raises the question of treason in relation to Polybius and Josephus. Finally two papers discuss Polybius's later fortunes in England up to the time of John Dryden and in twentieth-century Italy in the work of Gaetano de Sanctis. Several of these essays originally appeared in journals and collections not always easily accessible and all students of the ancient Mediterranean world will welcome their assembly within a single volume.

An Inventory of Archaic and Classical Poleis Mogens Herman Hansen, Thomas Heine Nielsen, 2004-11-11 This is the first ever documented study of the 1 035 identifiable Greek city states (poleis) of the Archaic and Classical periods c. 650-325 BC. Previous studies of the Greek polis have focused on Athens and Sparta and the result has been a view of Greek society dominated by Sophokles, Plato's and Demosthenes' view of what the polis was. This study includes descriptions of Athens and Sparta but its main purpose is to explore the history and organization of the thousand other city states. The main part of the book is a regionally organized inventory of all identifiable poleis covering the Greek world from Spain to the Caucasus and from the Crimea to Libya. This inventory is the work of 47 specialists and is divided into 46 chapters, each covering a region. Each chapter contains an account of the region, a list of second-order settlements and an alphabetically ordered description of the poleis. This description covers such topics as polis status, territory, settlement pattern, urban centre, city walls and monumental architecture, population, military strength, constitution, alliance, membership, colonization, coinage and Panhellenic victors. The first part of the book is a description of the method and principles applied in the construction of the inventory and an analysis of some of the results to be obtained by a comparative study of the 1 035 poleis included in it. The ancient Greek concept of polis is distinguished from the modern term city state which historians use to cover many other historic civilizations from ancient Sumeria to the West African cultures absorbed by the nineteenth-century colonializing powers. The focus of this project is what the Greeks themselves considered a polis to be.

Describing Greece William Hutton, 2005-10-20 The *Periegesis Hellados* (Description of Greece) by Pausanias is the most important example of non-fictional travel literature in ancient Greek. With this work Professor Hutton provides the first book-length literary study of the *Periegesis Hellados* in nearly one hundred years. He examines Pausanias' arrangement and expression of his material and evaluates his authorial choices in light of the contemporary literary currents of the day and in light of the cultural milieu of the Roman empire in the time of Hadrian and the Antonines. The descriptions offered in the *Periegesis Hellados* are also examined in the context of the archaeological evidence available for the places Pausanias visited. This study reveals Pausanias to be a surprisingly sophisticated literary craftsman and a unique witness to Greek identity at a time when that identity was never more conflicted.
