Texas University, 1928 *Diversity and Diachrony* David Sankoff, 1986 This volume contains a selection of papers originally presented at the 12th Conference on New Ways of Analyzing Variation NWAVE held in Montreal in 1983 It is divided into three sections 1 Varieties of English and their history 2 Change and variation in Romance 3 Functions and discourse

Final Particles Sylvie Hancil, Alexander Haselow, Margje Post, 2015-04-24 This volume brings together sixteen in depth studies of final particles in various languages of the world offering a rich variety of approaches to this still relatively underresearched class of elements The volume is of interest to typologists to experts in syntax and the analysis of spoken language and to linguists studying the form and function of final particles in single languages Final particles offers an overview of the different types of final particles found in typologically distinct languages different methodological approaches to the study of final particles and of typical grammaticalization pathways that these elements have taken in different languages

Adverbs and Adverbials Olivier Duplâtre, Pierre-Yves Modicom, 2022-06-21 Adverbs seem to raise unsolvable issues for theories of word classes both crosslinguistically and language internally The contributions in this volume all address this categorial problem from a variety of formal and functional points of view In the first part current definitions of the class for Romance and Germanic languages are being questioned and improved drawing on data from English German and Italian The second part is devoted to adverbial scope in Romance French Italian and Brazilian Portuguese Germanic Modern Greek and Chinese under special consideration of modal adverbs subject oriented manner adverbs and domain adverbs and adverbials Syntactic and semantic relationships appear to lay the ground for a robust and fine grained functional definition of adverbs and adverbials Structure and Function □ A Guide to Three Major Structural-Functional Theories Christopher S.

Butler, 2003-06-30 Like its companion volume this book offers a detailed description and comparison of three major structural functional theories Functional Grammar Role and Reference Grammar and Systemic Functional Grammar illustrated throughout with corpus derived examples from English and other languages Whereas Part 1 confines itself largely to the simplex clause Part 2 moves from the clause towards the discourse and its context The first three chapters deal with the areas of illocution information structuring topic and focus theme and rheme given and new information etc and clause combining within complex sentences Chapter 4 examines approaches to discourse text and context across the three theories

The fifth chapter deals with the learning of language by both native and non native speakers and applications of the theories in stylistics computational linguistics translation and contrastive studies and language pathology The final chapter assesses the extent to which each theory attains the goals it sets for itself and then outlines a programme for the development of an integrated approach responding to a range of criteria of descriptive and explanatory adequacy *News Discourse* Monika Bednarek, Helen Caple, 2018-10-19 Now reissued and retypeset this canonical book explores the role of language and images in newspaper radio online and television news The authors introduce useful frameworks for analysing language image and the interaction between the two and illustrate these with authentic news stories from around the English speaking world ranging from the Oktoberfest to environmental disasters to the killing of Osama bin Laden This analysis persuasively illustrates how events are retold in the news and made newsworthy through both language and image This clearly written and accessible introduction to news discourse is essential reading for students lecturers and researchers in linguistics media and journalism studies and semiotics
