Matter and Mind

Mario Bunge, 2010-09-14 This book discusses two of the oldest and hardest problems in both science and philosophy What is matter and What is mind A reason for tackling both problems in a single book is that two of the most influential views in modern philosophy are that the universe is mental idealism and that the everything real is material materialism Most of the thinkers who espouse a materialist view of mind have obsolete ideas about matter whereas those who claim that science supports idealism have not explained how the universe could have existed before humans emerged Besides both groups tend to ignore the other levels of existence chemical biological social and technological If such levels and the concomitant emergence processes are ignored the physicalism spiritualism dilemma remains unsolved whereas if they are included the alleged mysteries are shown to be problems that science is treating successfully *Handbook of Sports Studies* Jay Coakley, Eric Dunning, 2000 An authoritative cast of international and inter disciplinary contributors present the best of current thinking in sports studies as the subject matures and develops academically **Teaching Democracy in an Age of Uncertainty** Gilbert Burgh, Simone Thornton, 2021-11-29 The strength of democracy lies in its ability to self correct to solve problems and adapt to new challenges However increased volatility resulting from multiple crises on multiple fronts humanitarian financial and environmental is testing this ability By offering a new framework for democratic education Teaching Democracy in an Age of Uncertainty begins a dialogue with education professionals towards the reconstruction of education and by extension our social cultural and political institutions This book is the first monograph on philosophy with children to focus on democratic education The book examines the ways in which education can either perpetuate or disrupt harmful social and political practices and narratives at the classroom level It is a rethinking of civics and citizenship education as place responsive learning aimed at understanding and improving human environment relations to not only face an uncertain world but also to face the inevitable challenges of democratic disagreement beyond merely promoting pluralism tolerance and agreement When viewed as a way of life democracy becomes both a goal and a teaching method for developing civic literacy to enable students to articulate and apprehend more than just the predominant political narrative but to reshape it This book will be of interest to scholars of philosophy political science education democratic theory civics and citizenship studies and peace education research **A Guide to Research in Music Education** Roger P. Phelps, 2005 This Fifth Edition presents an updated and practical approach to the research concepts techniques and sources from the 4th edition A new chapter concerning music and technology covers the current available resources for students and researchers Other updates include separate chapters on philosophical inquiry and aesthetic inquiry becoming integrated formulating and implementing research problems and aligning qualitative research with recent concepts and techniques This is an essential tool for students tackling problems as varied as research proposals field research strategies data analysis and statistical techniques Researchers will find current sources and concise instruction in the formulation of a research proposal its implementation and dissemination of research results
