Studies In The History Of Linguistics:

Women in the History of Linguistics Wendy Ayres-Bennett, Helena Sanson, 2020 This volume offers a ground breaking investigation into women's contribution to the description analysis and codification of languages across a wide range of linguistic and cultural traditions The chapters explore a variety of spheres of activity from the production of dictionaries and grammars to language teaching methods and language policy

Studies in the History of Linguistics: Traditions and Paradigms Dell H. Hymes, 1974

Studies in the History of the English Language VII Don Chapman, Colette Moore, Miranda Wilcox, 2016 This book looks at how historical linguists accommodate the written records used for evidence The limitations of the written record restrict our view of the past and the conclusions that we can draw about its language However the same limitations force us to be aware of the particularities of language This collection blends the philological with the linguistic combining questions of the particular with generalizations about language change

Language and History, Linguistics and Historiography Nils Langer, Steffan Davies, Wim Vandenbussche, 2011 What are the points of contact between the study of language and the study of history What are the possibilities for collaboration between linguists and historians and what prevents it This volume the proceedings of an international conference held at the University of Bristol in April 2009 presents twenty two articles by linguists and historians exploring the relationship between the fields theoretically conceptually and in practice Contributions focus on a variety of European and American languages in historical periods from the Middle Ages to the present day Key themes at the intersection of these two disciplines are the standardization and classification of languages the social and demographic history of medieval and early modern Europe the study of language and history from below and the function of language in modern politics The value of interdisciplinary collaboration is demonstrated in a wide ranging set of case studies on topics including language contact in Northern and Central Europe the relationship between peninsular and transatlantic Spanish and new approaches to the recent histories of Nicaragua Luxembourg and Bulgaria The volume seeks out the interdependencies between the two fields and asks why exchanges between linguists and historians remain the exception rather than the rule

Studies in Linguistic Psychology Robert James Kellogg, 1912

Studies in the History of the English Language VIII Peter Grund, Megan Hartman, 2020-11-09 This volume collects essays that approach notions of creating maintaining and crossing boundaries in the history of the English language The concept of boundaries is variously defined within linguistics depending on the theoretical framework from formal and theoretical perspectives to specific fields and more empirical physical and perceptual angles The contributions to this volume do not take one particular theoretical or methodological approach but instead explore how examining various types of boundaries linguistic conceptual analytical generic physical helps us illuminate and account for historical use variation and change in English In their exploration of various topics in the history of English contributions ask a range of questions what does it mean to set up boundaries between time periods When do language

varieties have distinct boundaries and when do they overlap Where do language users draw up clausal constructional semantic phonetic phonological boundaries Thus the chapters explore not only how boundaries illustrate synchronic and diachronic features in the history of the English language but also what we can discover by questioning perceived or actual boundaries *Bibliography of Social Science Periodicals and Monograph Series* United States.
