### **Research Handbook on the Economics of Antitrust Law**

Einer Elhauge,2012 One might mistakenly think that the long tradition of economic analysis in antitrust law would mean there is little new to say Yet the field is surprisingly dynamic and changing The specially commissioned chapters in this landmark volume offer a rigorous analysis of the field s most current and contentious issues Focusing on those areas of antitrust economics that are most in flux leading scholars discuss topics such as mergers that create unilateral effects or eliminate potential competition whether market definition is necessary tying bundled discounts and loyalty discounts a new theory of predatory pricing assessing vertical price fixing after Leegin proving horizontal agreements after Twombly modern analysis of monopsony power the economics of antitrust enforcement international antitrust issues antitrust in regulated industries the antitrust patent intersection and modern methods for measuring antitrust damages Students and scholars of law and economics law practitioners regulators and economists with an interest in industrial organization and consulting will find this seminal Handbook an essential and informative resource

### **The Routledge Handbook of Transport Economics**

Jonathan Cowie,Stephen Ison,2017-08-07 The Routledge Handbook of Transport Economics offers the first state of the art overview of the discipline of transport economics as it stands today reflective of key research and policy Transport is an important area of study and one which is problem rich stimulating a great deal of debate in areas which impact on everyday lives Much of this focuses on the practicalities of the modern day phenomenon of mass movement and all of the issues which surround it The discipline of economics is central to this debate and consequently the study and application of transport economics has a chief role to play in seeking to address subjects relating to major transport issues It can be argued that at the very heart of any transport issue or problem lies the underlying economics of the situation understand that and you alleviate the problem Featuring contributions from world leading scholars and practitioners from across the globe all of the chapters within this book are written from a practical perspective theory is applied and developed using real world examples The book examines concepts issues ideas and practicalities of transport provision in five key topic areas public transport public transport reform economic development and transport modelling transport and the environment freight transport A real strength of the book is in linking theory to practice and hence the economics that are examined in this text are not the economics of the abstract but rather the economics of everyday living Practical and insightful this volume is an essential reference for any student or researcher working in all areas of transport provision ranging from planning appraisal

regulation and freight and for all practitioners looking to develop their professional knowledge and who are seeking professional accreditation

**Unsettled Issues Concerning the Economics of Fuel Cells and Electric Ground Vehicles** Bart Kolodziejczyk, 2020-06-03 This SAE EDGE Research Report looks at the pros and cons of moving this technology forward and brings recommendations to facilitate a smooth transition from fossil fuel based to hydrogen based mobility Unsettled Issues Concerning the Economics of Fuel Cells and Electric Ground Vehicles discusses the unsettled economic aspects of hydrogen and fuel cell applications in the automotive industry Lately the idea of using hydrogen in automotive applications is gaining momentum While the concept of using clean hydrogen fuel generated from water via electrolysis is nothing new previous efforts to mainstream the technology failed miserably About a decade ago the fuel cell technology which efficiently converts hydrogen and atmospheric oxygen into electricity was not as advanced and the fuel cell prototypes were bulky and expensive Yet many new fuel cell electric vehicles FCEVs have emerged and hydrogen refueling infrastructure is being built globally Despite the important steps forward hydrogen generation and fuel cells are still costly and cannot compete with fossil fuel based solutions While it can be a viable tool in combating climate change and air pollution hydrogen currently hardly makes a business case And although many hydrogen infrastructure developments are fueled by government subsidies and fear of carbon tax detailed economic evaluation suggests that creating a hydrogen economy of scale can reduce technology costs creating the window of opportunity it needs to become a concrete global market player Click here to access the full SAE EDGETM Research Report portfolio <https://doi.org/10.4271/EPR2020002>
