language teaching **Multilingual Glossary of Language Testing Terms** Association of Language Teachers in Europe, 1998 The glossary produced by ALTE contains entries in ten languages and is available in CD ROM **Examining Listening** Ardeshir Geranpayeh, Lynda B. Taylor, 2013-03-27 This volume examines the nature of second language listening proficiency and how it can be assessed The book highlights the need for test developers to provide a clear explication of the ability constructs which underpin the tests they offer in the public domain This is increasingly necessary if claims about the validity of test score interpretation and use are to be supported both logically and with empirical evidence It operationalises a comprehensive test validation framework which adopts a socio cognitive perspective The framework embraces six core components examining and then analysing Cambridge ESOL listening tasks from the following perspectives Test Taker Cognitive Validity Context Validity Scoring Validity Criterion related Validity and Consequential Validity Examining Speaking Lynda Taylor, 2011-08-25 An up to date review of the relevant literature on assessing speaking **Multilingual Glossary of Language Testing Terms**, 1999-01-14 Inevitably it is in the most commonly used languages that the vocabulary of language testing and assessment is most highly developed and for which most of the literature has been produced A multilingual glossary has a significant role to play in encouraging the development of language testing in less widely taught languages The idea of producing a multilingual glossary of assessment and language testing terms has grown out of the needs experienced by members of the Association of Language Testers in Europe ALTE while engaged in work on language testing projects It is anticipated that this glossary will be of use not only to members of ALTE but to many others working in the context of European languages who are involved in language testing and assessment The glossary contains entries in ten languages Catalan Danish Dutch English French German Irish Italian Portuguese and Spanish *Diagnosing Foreign Language Proficiency* J. Charles Alderson, 2006-11-01 This book addresses the need for tests that can diagnose the strengths and weaknesses in learners developing foreign language proficiency It presents the rationale for and research surrounding the development of DIALANG a suite of internet delivered diagnostic foreign language tests funded by the European Commission The word diagnosis is common in discussions in language education and applied linguistics but very few truly diagnostic tests exist However the diagnosis of foreign language proficiency is central to helping learners make progress This volume explores the nature of diagnostic testing emphasizing the need for a better understanding of the nature of appropriate diagnosis The book starts with a debate about how diagnostic testing might most appropriately be developed Charles Alderson argues that the field has neglected to construct diagnostic tests partly because other forms of testing have dominated the field Alderson examines how proficiency has been diagnosed in the key areas of language reading listening writing grammar and vocabulary The value of self assessment is discussed and exemplified as a key component in developing learners and teachers awareness of the complexity of language learning The book ends with a consideration of and recommendations for future developments in the diagnosis of foreign language proficiency *Examining Writing* Stuart D.

Shaw, Cyril J. Weir, 2007-07-05 Test developers need to provide a clear explication of the language ability constructs that underpin the tests they offer in the public domain such an explication is essential for supporting claims about the validity or usefulness of test scores This volume describes the theory and practice of Cambridge ESOL's approach to assessing second language writing ability A comprehensive test validation framework is used to examine the tasks in Cambridge ESOL writing tests from a number of different validity perspectives that reflect the socio cognitive nature of any assessment event The authors show how an understanding and analysis of the framework and its components can assist test developers to operationalise their tests more effectively especially in relation to the key criteria that differentiate one proficiency level from another The book provides an up to date review of relevant literature on assessing writing an accessible and systematic description of the different proficiency levels in second language writing a comprehensive and coherent basis for validating tests of writing This volume is a rich source of information on all aspects of examining writing ability As such it will be of considerable interest to examination boards who wish to validate their own writing tests in a systematic and coherent manner as well as to academic researchers and students in the field of language assessment more generally Book jacket
