Mathematical Programming S. M. Sinha, 2005-01-01 Mathematical Programming a branch of Operations Research is perhaps the most efficient technique in making optimal decisions It has a very wide application in the analysis of management problems in business and industry in economic studies in military problems and in many other fields of our present day activities In this keen competitive world the problems are getting more and more complicated and efforts are being made to deal with these challenging problems This book presents from the origin to the recent developments in mathematical programming The book has wide coverage and is self contained It is suitable both as a text and as a reference A wide ranging all encompassing overview of mathematical programming from its origins to recent developments A result of over thirty years of teaching experience in this field A self contained guide suitable both as a text and as a reference

Mathematical Programming T. C. Hu, Stephen M. Robinson, 2014-05-10 Mathematical Programming provides information pertinent to the developments in mathematical programming This book covers a variety of topics including integer programming dynamic programming game theory nonlinear programming and combinatorial equivalence Organized into nine chapters this book begins with an overview of optimization of very large scale planning problems that can be achieved on significant problems This text then introduces non stationary policies and determines certain operating characteristics of the optimal policy for a very long planning horizon Other chapters consider the perfect graph theorem by defining some well known integer valued functions of an arbitrary graph This book discusses as well integer programming that deals with the class of mathematical programming problems in which some or all of the variables are required to be integers The final chapter deals with the basic theorem of game theory This book is a valuable resource for readers who are interested in mathematical programming Mathematicians will also find this book useful

STUDIES ON MATHEMATICAL PROGRAMMING : THESE STUDIES ARE BASED ON THE PAPERS DELIVERED AT THE 3. CONFERENCE ON MATH. PROGRAMMING, HELD AT MATRAFUERED BETWEEN JAN. 31 AND FEBR. 6, 1975 ,1980 Master Index ,1981 Model Building in Mathematical Programming H. Paul Williams, 1999-10-25 Review of previous editions Such

Journal of the Royal Statistical Society An excellent introduction for students of business administration and people who want to see the utility of operations research

European Journal of Operational Research It will be appreciated very much by practitioners who already have knowledge in the field of mathematical programming

Mathematical Programming Society Newsletter Model Building in Mathematical Programming Fourth Edition H Paul Williams Faculty of Mathematical Studies University of Southampton UK This extensively revised fourth edition of this well known and much praised book contains a great deal of new material In particular sections and new problems have been added covering Revenue Management Hydro Electric Generation Data Envelopment efficiency Analysis Milk Distribution and Collection and Constraint Programming The book discusses the general principles of model building in mathematical programming and shows how they can be applied by using simplified but practical problems from widely different contexts Suggested formulations and solutions are given in the latter part of the book together with computational experience to give the reader a feel for the computation difficulty of solving that particular type of model Aimed at undergraduates postgraduates research students and managers this book illustrates the scope and limitations of mathematical programming and shows how it can be applied to real situations By emphasizing the importance of the building and interpretation of models rather than the solution process the author attempts to fill a gap left by the many works which concentrate on the algorithmic side of the subject
