Basic Aspects of Property Market Research Abdul Hamid Mar Iman, 2006

Real Estate Market Research and Analysis Chris Leishman, 2003-04-24 Real estate market research and analysis often draws on theory and techniques borrowed from other disciplines in particular economics finance and geography Few textbooks recognise this which makes Real Estate Market Research and Analysis a unique and innovative read This accessible text provides a general overview of research philosophy and research practise in the real estate economics discipline A range of applied quantitative empirical methods commonly used in both academic and applied real estate market research and analysis are examined as well as selected research based studies which demonstrate how these methods are applied Recent trends and developments in the evolving real estate economics research agenda are also explored This book is aimed at both undergraduate students and practitioners in the commercial property and real estate sector It is essential reading for modules on general practice surveying It sets out the means and methods by which a commercial property rent model should be constructed and estimated and provides a helpful guide to good property market research practise Key features include a Foreword by Dr Craig Watkins at the University of Aberdeen and a Glossary of property and economic research terms

Modelling Housing Market Search William A. V. Clark, 2021-11-30 Originally published in 1982 this book contains research in the area of econometric modelling in the housing market including that which has extended to the use of search models The subjects covered include the importance of racial differences spatial aspects of residential search and information provision and its effect on the behaviour of the buyers The combination of careful analytic modelling empirical testing and speculative discussions of the role of agents in the search process provides an innovative and imaginative approach to the interesting problems of understanding the individual behaviour in complex contexts such as the urban housing market

A Survey of Housing Research in the United States National Research Council (U.S.). Building Research Advisory Board, United States. Housing and Home Finance Agency, 1952

Housing Market Response to Sea-Level Rise in Florida Risa Palm, Toby Bolsen, 2021-11-17 South Florida continues to attract new residents despite its susceptibility to sea level rise This book explores the views of real estate agent with respect to how prospective homebuyers assess the risk of flooding It reports on their observations as to whether house prices are stagnant or falling in coastal areas vulnerable to flooding and their conclusions after working with prospective homebuyers as to whether coastal south Florida is a good place to find a home or alternatively a risky investment in a place that will eventually be submerged by rising seas The book reports on a 2020

survey of real estate agents and concludes that it is not clear that the housing market has integrated flood risk either into reduced demand for housing or in reduced prices for houses susceptible to flooding These conclusions have important implications for understanding how the risks of climate change and sea level rise are reflected in the housing market both now and in the near term future *Urban Morphology and Housing Market* Yang Xiao,2016-11-21 This book is devoted to fill the urban economics niche and conceptualize a framework for valuing the urban configuration via local housing market Advanced network analysis techniques are employed to capture the centrality features hindered in street layout The author explores the several effects of urban morphology via housing market over two distinct contexts UK and China This work will appeal to a wide readership from scholars and practitioner to policy makers within the fields of real estate analysis urban and regional studies urban planning urban design and economic geography **The Economics of Urban Property Markets** Paschalis Arvanitidis,2014-08-13 This book examines the relationship between the property market and urban economy The stimulus for this work was provided by the seemingly ever accelerating process of urban economic change and the noticeable failure of existing studies to adequately explore the pivotal role that the property market plays in this process Drawing on institutional economics the central argument of the book is that the property market as an institution is a mediator through which urban economic potential can be realised and served In developing this argument the book provides a critical realist ontological framework that advances understanding of the institutional structure of the economy and the complex interrelation between the institutional environment and human agency as well as a holistic theoretical framework of urban economic change where appropriate emphasis is placed on the specific mechanisms processes and dynamics through which the built environment is provided Arvanitidis also explores an institutional conceptualisation of property market efficiency defined in terms of the ability of the market institution to adapt its structure and to provide outcomes that the economy requires To inform empirical research on the developed concepts the book also offers a generic analytical approach specifying appropriate research methods and techniques for investigation along with a specific research design providing an operational framework that translates developed theory into empirical practice The book s primary contribution therefore lies in its delineation of a holistic research programme to conceptualise the property market as an institution and to explore its role within the urban economy Proceedings of the 18th International Symposium on Advancement of Construction Management and Real Estate Donglang Yang,Yanjun Qian,2014-05-21 The Chinese Research Institute of Construction Management CRIOCM in collaboration with Xi an Jiaotong University proudly invites all academics researchers and professionals to participate in the CRIOCM 2013 the 18th International Symposium on Advancement of Construction Management and Real Estate We will uphold and preserve the idea and tradition of pragmatism and innovation to offer an excellent academic and communication platform for academics and professionals to exchange information on the latest developments in real estate and construction management Real Estate and GIS Richard Reed,Chris Pettit,2018-07-17
