Critical Voices in Teacher Education Barry Down, John Smyth, 2012-04-28 We live in dangerous times when educational policies and practices are debated largely in terms of how they fit with the needs of the free market This volume is a collection of writing by teacher educators that draws on their unique biographies experiences and perspectives to denounce these misguided norms It explores what it means practically and intellectually to teach for social justice in conservative times In a globalised world where the power of capital holds sway the purposes of social institutions such as universities and schools is being refashioned in ways that are markedly instrumental and technicist in nature The consequence is that teachers work is increasingly constrained by regimes of control such as standardised testing accountability transparency and national curricula In the meantime large numbers of students and teachers are disengaging physically emotionally and intellectually from learning The contributors to this edited volume present both a powerful critique of these developments and a counter hegemonic vision of teacher education founded on the principles and values of social justice democracy and critical inquiry Teacher education they argue involves a commitment to critical intellectual work that subjects some deeply entrenched assumptions beliefs habits routines and practices to closer scrutiny The contributing authors expose how ideology and power operate in seemingly blameless rational ways to perpetuate social hierarchies based on class gender sexuality race and culture *History, Geography and Civics* John Buchanan, 2013-09-09 History Geography and Civics provides an in depth and engaging introduction to teaching and learning socio environmental education from F 6 in Australia and New Zealand It explores the centrality of socio environmental issues to all aspects of life and education and makes explicit links between pedagogical theories and classroom activities Part I introduces readers to teaching and learning history geography and environmental studies and civics and citizenship as well as issues in intercultural and global education Part II explores the use of media and sources values and attitudes assessment and creative teaching Each chapter provides links to the Australian Curriculum including cross curriculum priorities sustainability Aboriginal and Torres Strait Islander education and Asia and Australia s engagement with Asia History Geography and Civics encourages the reader to consider

their own beliefs values and attitudes in relation to their teaching and includes provocations and reflective questions to foster discussion and engagement

Disciplinary: Functional Linguistic and Sociological Perspectives Frances Christie, Karl Maton, 2011-02-03 Disciplinary knowledge is under threat in the modern world Claims abound that we are entering a landscape in which the division of disciplines is obsolete implying a commitment to outdated values in scholarship Notions of discipline are critiqued as reflecting social power and representing the worldview of dominant social groups By addressing and challenging such claims this edited collection argues that proclamations of the death of disciplines have been greatly overstated Not only are the notions of disciplinarity still important for understanding how we come to know the world but this volume demonstrates how significant disciplinarity is to understanding different forms of knowledge if we wish to improve the building of knowledge and educational practice Using analytical tools from systemic functional linguistics theory and social realist sociology this volume illustrates how different disciplines can collaborate and cross fertilize successfully without losing their distinctive insights and disciplinary integrity The subsequent theory developed will thereby extend both linguistic and sociological approaches to the topic and make a major contribution to educational theory
