Changing Family Values Gill Jagger, Caroline Wright, 2003-12-16 Changing Family Values offers a comprehensive introduction to contemporary debates and new research surrounding the family It explores how we define traditional family values and how these values are perceived as being underthreat in contemporary society Ranging across politics social policy law and sociology the contributors focus on the diverse realities of contemporary family life Issues covered include the recent backlash against single mothers lesbian and gay families and the law men s changing roles within the family the future of the nuclear family This book is ideal for courses covering the family a central topic in sociology and women s studies

Inter-professional Approaches to Young Fathers Jane Reeves, 2008 With one of the highest teenage pregnancy rates in Europe young fatherhood as a site of economic and personal adversity has become a focus of concern in Britain during the late 1990s However despite this policy interest there is surprisingly little British empirical evidence to review One of the aims of the book is to draw together contemporary research evidence social theory and policy which may effect how practitioners students and academics conceptualise and work with young fathers Consequently each chapter illustrates the

points it makes using discrete evidence from that particular field Moreover in order to make this process more OCuser friendlyOCO each chapter provides a summary of this literature and evidence Finally in order to make the book come alive it draws on case studies which are drawn variously from two studies conducted by the editor *Changing Britain* Susan McRae,1999 Major changes have happened in households and people s lives in most countries in the developed world Marriage rates have fallen divorce has risen women are having fewer children and later in life and there has been a rise in childbearing outside marriage One in four families is headed by a lone parent We are all getting older These changes have significance that goes beyond the individual families with implications for housing demand social security benefits labour force participation health and social services *Changing Britain* provides a comprehensive portrait of British families and households at the end of the 20th Century The book examines more generally the nature of economic and labour market change Britain s place in Europe and changing attitudes towards family life Specifically the book also deals with issues such as older people s lives non heterosexual families one person households young mothers and single parents and divorce

Family Relationships Catherine A. Salmon,Todd K. Shackelford,2008 Kinship ties the close relationships found within the family have been a central focus of evolutionary biological analyses of social behavior ever since biologist William Hamilton extended the concept of Darwinian fitness to include an individual s actions benefiting not only his own offspring but also collateral kin Evolutionary biologists consider organisms not only reproductive strategists but also nepotistic strategists If a person s genes are just as likely to be reproduced in her sister as in her daughter then we should expect the evolution of sororal investment in the same way as one expects maternal investment This concept has revolutionized biologists understanding of social interaction and developmental psychologists understanding of the family However kinship ties have largely been ignored in other areas of psychology particularly social psychology *Family Relationships* brings together leading theorists and researchers from evolutionary psychology and related disciplines to illustrate the ways in which an evolutionary perspective can inform our study and understanding of family relationships The contributors argue that family psychology is relationship specific the relationship between mother and daughter is different from that between father and daughter or that between brother and sister or sister and sister In other words humans have evolved specialized mechanisms for processing information and motivating behavior that deal with the distinct demands of being a mate father mother sibling child or grandparent Such an evolutionary perspective on family dynamics provides a unique insight into human behavior This volume will be an indispensable resource for psychologists sociologists and anthropologists as well scholars of family marriage and animal behavior **Inhabited by Stories** Nancy A. Barta-Smith,Danette

DiMarco,2012-11-30 Intertextuality has signaled change appropriation adaptation and derivation It has focused readers on irresolvable questions of influence and origination progressive or regressive movement across continents periods and media *Inhabited by Stories* Critical Essays on Tales Retold takes a different approach What would a model of literary study look like

that steps out of time's river and embraces not only the presence and proximity of the world to the senses but also of the past and the future to the present here and now. When stories inhabit us, imagination and memory extend our ability to see and feel. Phenomenological experience is lived, not just thought. Such a perspective suggests that the past and future inhabit the present, increase the depth of sensory perception itself, and enrich the range of our affective and ethical responses. Grounded in the lived experience of reading, this perspective offers an alternative to an idea of intertextuality as simply following lines of influence and appropriation. It focuses on the expansion of experience created by telling and retelling stories. Ironically for literary theorists and critics, perhaps the highest form of both praise and critique is a tale retold, since such retellings attest to literature's instructive power and its perennial regeneration.

Doing Children's Geographies Lorraine van Blerk, Mike

Kesby, 2013-10-31 *Doing Children's Geographies* provides a useful resource for all those embarking on research with young people. Drawing on reflections from original cutting-edge research undertaken across three continents, the book focuses on the challenges researchers face when working with children, youth, and their families. The book is divided into three sections. The first section provides alternatives to some of the difficulties researchers face and highlights methodological innovations as geographers uncover new and exciting ways of working. The second part specifically addresses the issues surrounding children and youth's participation, providing critiques of current practice and offering alternatives for increasing young people's involvement in research design. Finally, the book broadens to a consideration of wider areas of concern for those working with children and youth. This section discusses the nature of childhood in relation to research, the place of emotions in research with young people, and the process of undertaking applied research. This book was previously published as a special issue of *Children's Geographies*.

Child Welfare Kathleen Kufeldt, 2014-05-27

In 1994, a group of researchers and decision makers met to discuss the state of child welfare. Also present were a few practitioners and two youth in care. Six years later, when they met again, the number of practitioners and youth had grown considerably and were joined by a strong contingent of foster parents. Thus, the findings and insights presented were affirmed or challenged by those most affected, those on the front line. It was an exciting event worth capturing in book form. Kathleen Kufeldt and Brad McKenzie have gathered the papers presented at the 2000 Symposium and have organised them under four themes: incidence and characteristics of child maltreatment, the continuum of care, policy and practice, and future directions. An analysis and synthesis of the work informs each of these themes, while an eight-point research agenda developed in an earlier symposium is used to assess developments to date and provide guidance for the future.

Gangs and Youth Subcultures Kayleen Hazlehurst, Cameron Hazlehurst, 2018-01-16 Gangs are growing in many different social economic and political environments coupled with an alarming breakdown of public order Failures to contain or reduce gang crime in European Asian South American African and North American cities may be symptoms of fundamental problems threatening the fabric of many societies The spread of gangs to suburbia and remote locations is a palpable worldwide threat But despite nearly a century of scholarly inquiry into street gangs and youth subcultures no single work systematically reflects on comparative international experiences with gangs Gangs and Youth Subcultures takes up this challenge Kayleen Hazlehurst and Cameron Hazlehurst argue that theories of gang behavior in immigrant communities and the influence of transnational crime syndicates are better tested in more than one host society Similar phenomena would be better understood if placed in a comparative context To this purpose the editors assembled expert scholars and policy advisers from North America Europe South Africa and Australasia Gangs and Youth Subculture lays the groundwork for an explanation of why gangs continue to grow in strength and influence and why they have spread to remote locations Kayleen Hazlehurst and Cameron Hazlehurst present new findings and innovative preventive strategies in a clear concise fashion No other work brings together experts on gangs and youth subcultures from so many countries As such this trailblazing book will interest scholars and teachers of criminology and sociology justice system administrators as well as law enforcement officers and youth workers internationally
