Dryzek, 2019-03-04 This book examines the process of policymaking in situations in which the interests values and rights of the various actors conflict with one another and suggest contradictory courses of action Focusing on the problems of resource management in Alaska s coastal and offshore regions Dr Dryzek shows how present mechanisms and analytical technique Corporate Environmental

Management 3 Richard Welford, 2013-12-19 Corporate Environmental Management 3 examines the complex yet crucial issues faced when we make a genuine commitment to move towards sustainable development. It tackles the nature of the international economic order and the efficacy of free trade and globalization in response to the growing recognition that businesses and organizations must now effect real change to ensure a sustainable future. It analyses strategies for managers, researchers, academics and students to achieve operations consistent with this goal and provides accounts of best practice offering substantial references to leading articles in the field. With welcome clarity of thought and expression, analysis is made of the structural as well as cultural adaptations demanded of businesses in changing socioeconomic circumstances. Can an ethic be derived from the concept of sustainable development to be applied to the practice of business? Will the globalization of economic activity have a detrimental and decisive effect on the ability of business to bring about the vital progress needed? What are the implications of postmodern social theory with its emphasis on the uncertainty of value and commitment for corporations attempting to effect change? This third book in the comprehensive and authoritative Corporate Environmental Management series provides an ideal introduction to the main practical and theoretical issues for those new to the subject whilst those familiar with the series will find it a thoughtful and incisive development of the debate. Richard Welford is Professor of Corporate Environmental Management at the University of Huddersfield, professor of Sustainable Management at the Norwegian School of Management and a Director of ERP Environment. Originally published in 2000.

Demystifying Sustainability Haydn Washington, 2015-02-11 What is sustainability? Much has been said about the terms sustainability and sustainable development over the last few decades but they have become buried under academic jargon. This book is one of the first that aims to demystify sustainability so that the layperson can understand the key issues, questions and values involved. Accessible and engaging, the book examines the old sustainability of the past and looks to the future considering how economic, ecological and social sustainability should be defined if we are to solve the entwined environmental, economic and social crises. It considers if meaningful sustainability is the same as a sustainable development based on endless growth, examining the difficult but central issues of overpopulation and overconsumption that drive unsustainability. The book also explores the central role played by society's worldview and ethics along with humanity's most dangerous characteristic: denial. Finally, it looks to the future, discussing the appropriate technology needed for sustainability and suggesting nine key solutions. This book provides a much needed comprehensive discussion of what sustainability means for students, policy makers and all those interested in a sustainable future.

Key Topics in Conservation Biology 2 David W. Macdonald, Katherine J. Willis, 2013-02-06 Following the much acclaimed success of the first volume of *Key Topics in Conservation Biology*, this entirely new second volume addresses an innovative array of key topics in contemporary conservation biology.
