writers are increasingly recognizing science fiction's potential to shatter patriarchal and heterosexual norms while the creators of science fiction are bringing new depth and complexity to the genre by engaging with feminist theories and politics. This book maps the intersection of feminism and science fiction through close readings of science fiction literature by Octavia E. Butler, Richard Calder and Melissa Scott, and the movies *The Matrix* and the *Alien* series. Patricia Melzer analyzes how these authors and films represent debates and concepts in three areas of feminist thought: identity and difference, feminist critiques of science and technology, and the relationship among gender, identity, body, and desire, including the new gender politics of queer desires, transgender and intersexed bodies and identities. She demonstrates that key political elements shape these debates, including global capitalism and exploitative class relations within a growing international system, the impact of computer, industrial, and medical technologies on women's lives and reproductive rights, and posthuman embodiment as expressed through biotechnologies, the body-machine interface, and the commodification of desire. Melzer's investigation makes it clear that feminist writings and readings of science fiction are part of a feminist critique of existing power relations and that the alien constructions—cyborgs, clones, androids, aliens, and hybrids—that populate postmodern science fiction are as potentially empowering as they are threatening.

*The Routledge Handbook of Libertarianism* Jason Brennan, Bas van der Vossen, David Schmidtz, 2017-08-18. Libertarians often bill their theory as an alternative to both the traditional Left and Right. *The Routledge Handbook of Libertarianism* helps readers fully examine this alternative without preaching it to them, exploring the contours of libertarianism, sometimes also called classical liberal thinking, on justice, institutions, interpersonal ethics, government, and political economy. The 31 chapters, all written specifically for this volume, are organized into five parts. Part I asks what should libertarianism learn from other theories of justice, and what should defenders of other theories of justice learn from libertarianism. Part II asks what are some of the deepest problems facing libertarian theories. Part III asks what is the right way to think about property rights and the market. Part IV asks how should we think about the state. Finally, part V asks how well or badly can libertarianism deal with some of the major policy challenges of our day, such as immigration, trade, religion in politics, and paternalism in a free market. Among the Handbook's chapters are those from critics who write about what they believe libertarians get right, as well as others from leading libertarian theorists who identify what they think libertarians get wrong. As a whole, the Handbook provides a comprehensive, clear-eyed look at what libertarianism has been and could be, and why it matters.

These texts range from short stories, autobiographies, political speeches, websites, and lyrics to films such as *The Matrix* and *Harry Potter*, and from television's *Big Brother* to shopping malls, celebrities, and rock videos. Each chapter combines an introduction to the text and aspects of its critical reception with an analysis using one of sixteen key approaches.

from established angles like feminism postcolonial studies and deconstruction to newer areas such as ecocriticism trauma theory and ethical criticism Each chapter also indicates alternative ways of reading the text by drawing on other critical approaches
