It contains Gilman's most influential economic analysis including her signature idea that the relationship between men and women is at core sexual economic. Gilman applies ideas and techniques from evolutionary science to the study of marriage and the family. Her highly original approach reveals that female dependency is not a natural but rather a cultivated phenomenon. *Women and Economics* proposes wide-reaching social and economic reforms that were radical at the time and as numerous twenty-first century feminist economists continue to argue are yet to be achieved today.
