*U.S. Government Books*, 1987      **Assimilating New Leaders** Diane Downey, 2001      Leadership Embodied, 2nd Edition Joseph J Thomas, 2013-10-15

Leadership is a most demanding undertaking. How do some people make it seem so simple so natural and instinctive? In the age old debate as to whether leaders are born or made, Thomas contends that the answer is both. Great leaders throughout history were born with certain capabilities. Preparation honed those capabilities. Then that ability and preparation were combined with a will to lead. When circumstances demanded the great leaders of history pulled these attributes together to create results that drove the course of history. While leaders are present in every aspect of human undertaking, we chose to illustrate each of the components of leadership through the most dramatic and demanding of all human undertakings: war and the preparations for war. Wartime leaders are leaders writ with a darker pen. Wartime challenges are because of the life and death nature of the affair, more monumental and exacting. In the selection of individuals to illustrate each point, we chose wartime leaders as well as those who guided their subordinates and organizations in preparation for combat. Further, we chose American leaders with a distinct and obvious bias towards the navy and Marine Corps. Multiple reasons led us to our approach for *Leadership Embodied*. First, a biography is perhaps the most effective method for imparting leadership lessons. Simple listings of prescriptive traits or descriptive qualities are patronizing and frequently boring. Second, our biographical examples are familiar to most or at least they should be. Finally, all of these historical selections have dramatically shaped today's institutions, practices, and customs within the naval services. These are not marginal figures with marginal influence. The individuals included and their respective leadership attributes should be required reading for any student of leadership. Each has a particular lesson for midshipmen on their journey to becoming a navy or Marine Corps officer. This book does not promise to be a panacea. There is no short cut. Leadership does not follow a prescribed path. We study examples to inspire us to become better, to be strong when it is easy to give in, and to know others have gone before us and faced insurmountable odds. Leadership, as an ill defined social science, crosses boundaries with several disciplines including sociology, psychology, philosophy, and history. We have selected a method that combines the psychological profile of effective leaders and the historical context of the impact their leadership brought to organizations and events. Our hope for this book is that these case studies illustrate the basic elements in themselves, the very essence of leadership. It is through inherent talent, arduous preparation, and practical experience that we become capable.

leaders The reader brings the first to the table then we offer a small token in the second pursuit and circumstances enable the third

Program Management Mitchell L. Springer, 2001 The process presented by the author can be applied to any project whether it be building a garage or planting a garden The examples presented provide a clear and concise picture of the complete set of activities how the responsible parties interact and which products are the desired outcome for each activity

BOOK JACKET Parameters, 1987 **Taking Charge** Perry McCoy Smith, 1986 Provides a practical guide for leaders who head large and complex organizations Helps the leader set standards of excellence and high integrity through the use of case studies checklists helpful hints rules of thumb and other techniques Written in a clear crisp style A valuable resource its messages jump out at the reader due to its authenticity
