Regional Cooperation and China's Strategy Towards East Asia Qianqian Liu, 2013-01-01 China's strategy towards East Asian regional cooperation since the Asian Financial Crisis of 1997-98 Since the Asian Financial Crisis of 97-98 China has taken a leading role in East Asian economic cooperation initiatives centred around the powerful ASEAN Plus Three mechanism The Association of Southeast Asian Nations plus South Korea Japan and China This brand new book from the

International Poverty Reduction Centre of China's Qianqian Liu outlines exactly how and why China has pursued economic and diplomatic cooperation throughout the post crisis years. Methodical and richly detailed, it offers a unique empirical analysis of China's actions and involvements with ASEAN Plus Three and the East Asian Summit. Author Qianqian Liu's integrated theoretical approach captures and pieces together the intricacies of Chinese interactions with its East Asian partners, enabling the reader to better understand the dynamics of China's regional behaviour and foreign policy. Together with research based insight and data covering all aspects of this critical subject, the author proposes two key assertions: Firstly, that China-US relations have played a significant part in China's increasingly cooperative approach to China-East Asia relations. And secondly, that China has maximised mechanisms of regional economic cooperation as a means of enhancing its influence in East Asia. Key features and benefits: Unveils China's perspectives on regional cooperation by extensively exploring Chinese source material and materials information only now available thanks to increased openness and liberalisation. Offers a key contribution to wider theoretical debates on China's rise and regional intentions. Examines the vital interconnections between the key contemporary International Relations theories: realism, liberalism and constructivism, rather than examining them as separate elements to help fully explain China's strategies and goals. Analytical coverage of China's involvement with both ASEAN Plus Three and the East Asia Summit. Offers comparisons between European regionalism and East Asian regionalism. Reveals Chinese perspectives on how China-US relations have helped shape China's approach to East Asia economic cooperation. *Regional Cooperation and China's Strategy Towards East Asia* is published as part of a brand new series from Paths International: China and International Organisations Series. Published in association with China's Social Sciences Academic Press.

WINNER OF THE 2017 PETER KATZENSTEIN BOOK PRIZE BEST OF BOOKS IN 2017 BY FOREIGN AFFAIRS WINNER OF THE 2018 VIVIAN ZELIZER PRIZE BEST BOOK AWARD IN ECONOMIC SOCIOLOGY

How China Escaped the Poverty Trap truly offers game changing ideas for the analysis and implementation of socio-economic development and should have a major impact across many social sciences. Zelizer Best Book in Economic Sociology Prize Committee Acclaimed as game changing and field shifting. How China Escaped the Poverty Trap advances a new paradigm in the political economy of development and sheds new light on China's rise. How can poor and weak societies escape poverty traps? Political economists have traditionally offered three answers: stimulate growth first, build good institutions first, or some fortunate nations inherited good institutions that led to growth. Yuen Yuen Ang rejects all three schools of thought and their underlying assumptions: linear causation, a

mechanistic worldview and historical determinism Instead she launches a new paradigm grounded in complex adaptive systems which embraces the reality of interdependence and humanity's capacity to innovate Combining this original lens with more than 400 interviews with Chinese bureaucrats and entrepreneurs Ang systematically reenacts the complex process that turned China from a communist backwater into a global juggernaut in just 35 years Contrary to popular misconceptions she shows that what drove China's great transformation was not centralized authoritarian control but directed improvisation top down directions from Beijing paired with bottom up improvisation among local officials Her analysis reveals two broad lessons on development First transformative change requires an adaptive governing system that empowers ground level actors to create new solutions for evolving problems Second the first step out of the poverty trap is to use what you have harnessing existing resources to kick start new markets even if that means defying first world norms Bold and meticulously researched *How China Escaped the Poverty Trap* opens up a whole new avenue of thinking for scholars practitioners and anyone seeking to build adaptive systems

Southeast Asia between China and Japan Lam Peng Er, Victor Teo, 2011-11-15 Triangular relations which frame China and Japan as two sides of an isosceles triangle usually focus on the United States as the significant third side This edited book examines another relatively underexplored set of triangular relations those between China Japan and Southeast Asia The region comprised of eleven small and medium size states is often considered inconsequential in the tempestuous world of international politics where political clout economic prowess military strength and soft power matter most Often seen as easily dominated by extra regional great powers this volume reconsiders the region's relationship with China and Japan their two Asian neighbours to the northeast which also happen to be the world's second and third largest economies While China and Japan do compete for turf in Southeast Asia states in the region do not perceive themselves as strategic pawns of these two great Asian powers but instead as proactively engaging China and Japan in the region The country specific case studies of this book collectively support the thesis that the Southeast Asian states actively seek to manoeuvre between China and Japan for their own advantage and at the same time grapple with developments in Northeast Asia through regional

integration efforts Through the establishment of benchmark norms and values Southeast Asia attempts to socialise China and Japan and other external powers to the ASEAN way Indeed Southeast Asia as a region is now the driver of East Asian multilateralism and regionalism and the East Asian reality is that Southeast Asia is a major political economic and cultural player in its own right vis vis the great powers **African Development Fund; the Asian Development Fund; and the Asian Development Bank** United States.
