Tales Of The 04 Ranch Recollections Of Harold J Cook 1887 1909:

Tales of the 04 Ranch Harold J. Cook, 1968-01-01 **Tales of the 04 Ranch** Harold James Cook, 1968 Field Life Jeremy Vetter, 2016-11-01 *Field Life* examines the practice of science in the field in the Great Plains and Rocky Mountains of the American West between the 1860s and the 1910s when the railroad was the dominant form of long distance transportation Grounded in approaches from environmental history and the history of technology it emphasizes the material basis of scientific fieldwork joining together the human labor that produced knowledge with the natural world in which those practices were embedded Four distinct modes of field practice which were shared by different field science disciplines proliferated during this period surveys lay networks quarries and stations and this book explores the dynamics that underpinned each of them Using two diverse case studies to animate each mode of practice as well as the making of the field as a place for science *Field Life* combines textured analysis of specific examples of field science on the ground with wider discussion of the commonalities in the practices of a diverse array of field sciences including the earth and physical sciences the life and agricultural sciences and the human sciences By situating science in its regional environmental context *Field Life* analyzes the intersection between the cosmopolitan knowledge of science and the experiential knowledge of people living in the field Examples of field science in the Plains and Rockies range widely geological surveys and weather observing networks quarries to uncover dinosaur fossils and archaeological remains and branch agricultural experiment stations and mountain biological field stations **Gunsmoke and Saddle Leather** Charles G. Worman, 2005-12-15 The many roles played by guns in the old West with personal accounts by many early settlers and hundreds of photos **Folsom** David J. Meltzer, 2006-06-05 In the late 1920s outside a sleepy remote New Mexico village prehistory was made Spear points found embedded between the ribs of an extinct Ice Age bison at the site of Folsom finally resolved decades of bitter scientific controversy over whether the first Americans had arrived in the New World in Ice Age times Although Folsom is justly famous in the history of archaeology for resolving that dispute for decades little was known of the site except that it was very old This book for the first time tells the full story of Folsom David J Meltzer deftly combines the results of extensive new excavations and laboratory analyses from the late 1990s with the results of a complete examination and analysis of all the original artifacts and bison remains recovered in the 1920s now scattered in museums and small towns across the country Using the latest in archaeological method and technique and bringing in data from geology and paleoecology this interdisciplinary study provides a comprehensive look at the adaptations and environments of the late Ice Age Paleoindian hunters who killed a large herd of bison at this spot as well as a measure of Folsom s pivotal role in American archaeology **The Age of Mammals** Chris Manias, 2023-06-27 When people today hear paleontology they immediately think of dinosaurs But for much of the history of the discipline dramatic demonstrations of the history of life focused on the developmental history of mammals *The Age of Mammals* examines how nineteenth century scholars writers artists and public

audiences understood the animals they regarded as being at the summit of life For them mammals were crucial for understanding the formation and possibly the future of the natural world Yet as Chris Manias reveals this combined with more troubling notions that seemingly promising creatures had been swept aside in the struggle for life or that modern biodiversity was impoverished compared to previous eras Why some prehistoric creatures such as the saber toothed cat and ground sloth had become extinct while others seemed to have been the ancestors of familiar animals like elephants and horses was a question loaded with cultural assumptions ambiguity and trepidation How humans related to deep developmental processes and whether the Age of Man was qualitatively different from the Age of Mammals led to reflections on humanity s place within the natural world With this book Manias considers the cultural resonance of mammal paleontology from an international perspective how reconstructions of the deep past of fossil mammals across the world conditioned new understandings of nature and the current environment
