Talking About Aids:

Talking about HIV/AIDS, 2002 Sexual Decision-making and AIDS in Africa Muthoni A. Mathai, 2006 Handbook of Sexuality-Related Measures Clive M. Davis, 1998 Fundamental to understanding human sexual expression is reliable and valid measurement and assessment Many instruments have been developed to measure a myriad of sexuality related states traits behaviours and outcomes Few are easily accessible and the information is often limited concerning appropriate use and psychometric properties To counter these problems the Handbook of Sexuality Related Measures reproduces more than 200 instruments accompanied by essential information for their use in research educational and clinical settings Each chapter describes the development and appropriate use of each instrument Reliability and validity data are summarized and referenced Handbook of Sexuality-Related Measures Terri D. Fisher, Clive M. Davis, William L. Yarber, 2013-09-13 This classic and invaluable reference Handbook written for sex researchers and their students has now been completely revised in a new edition complete with its own companion website It remains the only easy and efficient way for researchers to learn about evaluate and compare instruments that have previously been used in sex research In this third edition of the Handbook 218 scales complete with full descriptions and psychometric data are made available with additional information provided at the companion website for this volume **Evaluating Women's Health Messages** Roxanne Louiselle Parrott, Celeste Michelle Condit, 1996-02 The increased attention currently being paid to women's reproductive health issues has produced a corresponding interest in the role that communication plays in promoting better health care Groundbreaking and comprehensive this book is the first systematic examination of the major types and forms of messages about women's reproductive health medical social scientific and public and the degree to which these messages compare with and contradict each other Within the broad framework of communication a range of women's health issues are examined in this book from political historical technological and feminist perspectives The issues examined include abortion infertility drug and alcohol use in pregnancy childbirth AIDS menst **Changing the Course of AIDS** David Dickinson, 2011-03-15 Changing the Course of AIDS is an in depth evaluation of a new and exciting way to create the kind of much needed behavioral change that could affect the course of the global health crisis of HIV AIDS This case study from the South African HIV AIDS epidemic demonstrates that regular workers serving as peer educators can be as or even more effective agents of behavioral change than experts who lecture about the facts and so called appropriate health care behavior After spending six years researching the response of large South African companies to the epidemic that is decimating their workforce as well as South African communities David Dickinson describes the promise of this grassroots intervention workers educating one another in the workplace and community and the limitations of traditional top down strategies Dickinson's book takes us right into the South African workplace to show how effective and yet enormously complex peer education really is We see what it means when workers directly tackle the kinds of sexual gender religious ethnic and broader social and political taboos that make

behavior change so difficult particularly when that behavior involves sex and sexuality Dickinson s findings show that people who are not officially health care experts or even health care workers can be skilled and effective educators In this book we see why peer education has so much to offer societies grappling with the HIV AIDS epidemic and why those interested in changing behaviors to ameliorate other health problems like obesity alcoholism and substance abuse have so much to learn from the South African example
