Talking About Machines An Ethnography Of A Modern Job Collection On Technology And Work:

Talking about Machines Julian E. Orr, 1996 Explores the work practices of experienced photocopier maintenance technicians working for the Xerox Corporation Examines the triangular relationship between the technician the customer and the machine Highlights the narrative process used by technicians in the diagnosis of machine problems

Talking about Machines Julian E. Orr, 2016-10-01 This is a story of how work gets done It is also a study of how field service technicians talk about their work and how that talk is instrumental in their success In his innovative ethnography Julian E Orr studies the people who repair photocopiers and shares vignettes from their daily lives He characterizes their work as a continuous highly skilled improvisation within a triangular relationship of technician customer and machine The work technicians do encompasses elements not contained in the official definition of the job yet vital to its success Orr's analysis of the way repair people talk about their work reveals that talk is in fact a crucial dimension of their practice Diagnosis happens through a narrative process the creation of a coherent description of the troubled machine The descriptions become the basis for technicians discourse about their experience and the circulation of stories among the technicians is the principal means by which they stay informed of the developing subtleties of machine behavior Orr demonstrates that technical knowledge is a socially distributed resource stored and diffused primarily through an oral culture Based on participant observation with copier repair technicians in the field and strengthened by Orr's own years as a technician this book explodes numerous myths about technicians and suggests how technical work differs from other kinds of employment

Pervasive Computing Patrik Floréen, Antonio Krüger, Mirjana Spasojevic, 2010-05-06 Welcome to the proceedings of the 8 International Conference on Pervasive Computing Pervasive 2010 After Toronto Sydney and Nara the conference has now returned to Europe Pervasive is one of the most important conferences in the area of pervasive and ubiquitous computing As in the previous year we had two categories of technical papers Full Papers and Notes Pervasive attracted 157 valid submissions from which the Technical Program Committee TPC accepted 24 full papers and one note resulting in an overall acceptance rate of 16% The submissions included 628 authors from 27 countries representing all the continents except Antarctica As we can see from these figures Pervasive is a truly global highly competitive conference A major conference such as Pervasive requires a rigorous and objective process for selecting papers This starts with the selection of a high quality TPC We were fortunate to be able to draw on the wisdom and experience of our 28 TPC members from the most prestigious universities and research labs in Europe North America and Asia This committee was aided by the input of no less than 238 external reviewers chosen on the basis of their domain knowledge and relevance to pervasive computing The papers were selected using a double blind review with four peer reviews per paper a discussion phase among the reviewers and a discussion of the papers in the TPC meeting which was held in Palo Alto during December 12-13 2009 We thank Nokia Research Center for hosting the meeting

Consuming the Environment Myra J. Hird,2024-11-29 Consuming the Environment explores the environmental impacts of consuming everyday products and explains how we can consume more sustainably Written in an accessible style this book begins with our everyday mundane experiences of consuming products online in the grocery store at the mall and shows how these practices are connected to a global system dependent upon ever increasing consumption Drawing on the expertise of researchers in topics such as energy food water land fashion electronics eco tourism green products and micro plastics this

volume unpacks the complex and largely invisible relationships that consumerism has with resource extraction and manufacturing. By focusing on a diverse range of everyday consumer products as well as more subtle things that have been transformed into products such as knowledge waste and pets, the chapters are structured around the central argument that we must reorient ourselves as citizens rather than consumers. It is as citizens that we may help to organize our communities and hold our governments and industry accountable to planetary sustainability boundaries. With the inclusion of summary boxes, directed discussion, assignment questions, and further reading in each chapter, this book will be an essential resource for undergraduate and postgraduate students studying courses on consumerism, sustainable consumption, and environmental sociology.

Between Craft and Science Stephen R. Barley, Julian E. Orr, 2018-10-18 *Between Craft and Science* brings together leading scholars from sociology, anthropology, industrial relations, management, and engineering to consider issues surrounding technical work, the most rapidly expanding sector of the labor force. Part craft and part science, part blue collar and part white collar, technical work demands skill and knowledge but is rarely rewarded with commensurate status or salary. The book first considers the anomalous nature of technical work and the difficulty of locating it in any conventional theoretical framework. Only an ethnographic approach, studying the actual doing of the work, will make sense of the subject, the authors conclude. The studies that follow report daily practice filled with disjunctures and ironies that mirror the ambiguities of technical work's place in the larger culture. On the basis of those studies, the authors probe questions of policy, management, and education. *Between Craft and Science* considers the cultural difficulties in understanding technical work and advances coherent, practice-oriented insights into this anomalous phenomenon.

Advances in Knowledge Management Ettore Bolisani, Meliha Handzic, 2014-11-12 This book celebrates the past, present, and future of knowledge management. It brings a timely review of two decades of the accumulated history of knowledge management. By tracking its origin and conceptual development, this review contributes to the improved understanding of the field and helps to assess the unresolved questions and open issues. For practitioners, the book provides a clear evidence of value of knowledge management. Lessons learnt from implementations in business, government, and civil sectors help to appreciate the field and gain useful reference points. The book also provides guidance for future research by drawing together authoritative views from people currently facing and engaging with the challenge of knowledge management, who signal a bright future for the field.

Politics Recoded Aure Schrock, 2024-09-24 The first detailed history of Code for America that examines how democratically designed government systems can collectively improve technology's impact on society. For decades, tens of thousands of volunteers and employees of Code for America have taken a different path to institutional change through designing and implementing infrastructure. In *Politics Recoded*, Aure Schrock employs a robust organizational ethnography to analyze how Code for America's infrastructural organizing changed how politics get exercised, showing how we, citizens, can work directly with the government on projects to improve our collective livelihoods. Drawing from theories of organizing

social infrastructure racialized organizations technical cultures and intersectionality Schrock argues that our post techlash society must no longer presume that corporate platforms or social networks can level social inequities An underrecognized yet influential organization Code for America emerged from a tech culture background that prioritized networks and publicity over the long slow work of institutional change But its evolution demonstrates how to push beyond the fundamental flaws of tech forward organizing This the first history of Code for America shows how promoting agentic citizenship and brokering in empathy let the organization influence policy at all levels of government and demonstrates why we need to bolster institutions to ensure that everyone is justly represented and receiving the benefits Appealing to those in political science communication and information studies Politics Recoded will empower practitioners and activists to revolutionize technological design and participate in alternative forms of civic engagement

Team Coordination in Extreme Environments Cécile Godé, 2015-12-15 The development and coordination of managerial devices to help businesses cope with the numerous challenges they face have been the subject of many empirical analyses in recent years This books draws from these studies to answer the question of how to coordinate a team in extreme environments Embracing a practice based perspective it identifies work practices and technological uses that improve coordination within teams Organizations need to know how to support the coordination of teams that evolve in highly changing uncertain and risky contexts Beyond reviewing current literature on the analysis of coordination in the field the author draws on military case studies and illustrations to offer readers practical ways to implement devices that facilitate coordination within teams

Low Power to the People Christina Dunbar-Hester, 2014-11-14 An examination of how activists combine political advocacy and technical practice in their promotion of the emancipatory potential of local low power FM radio The United States ushered in a new era of small scale broadcasting in 2000 when it began issuing low power FM LPFM licenses for noncommercial radio stations around the country Over the next decade several hundred of these newly created low wattage stations took to the airwaves In *Low Power to the People* Christina Dunbar Hester describes the practices of an activist organization focused on LPFM during this era Despite its origins as a pirate broadcasting collective the group eventually shifted toward building and expanding regulatory access to new licensed stations These radio activists consciously cast radio as an alternative to digital utopianism promoting an understanding of electronic media that emphasizes the local community rather than a global audience of Internet users Dunbar Hester focuses on how these radio activists impute emancipatory politics to the old medium of radio technology by promoting the idea that microradio broadcasting holds the potential to empower ordinary people at the local community level The group s methods combine political advocacy with a rare commitment to hands on technical work with radio hardware although the activists hands on inclusive ethos was hampered by persistent issues of race class and gender Dunbar Hester s study of activism around an old medium offers broader lessons about how political beliefs are expressed through engagement with specific technologies It also offers insight into contemporary issues in media policy that is
