Classroom tests are an everyday feature of second and foreign language classrooms worldwide Teachers spend a lot of time and energy making and using tests and learners spend a lot of time and energy taking them Nonetheless such assessments are under studied as they are considered routine This volume illuminates this little researched area Featuring fifteen classroom language tests made and used by Chinese English French German Italian Japanese Russian and Spanish teachers the book includes parallel teacher commentary and testing content chapters that transparently probe the teachers' processes of making and using their tests Rather than view teachers' tests as poor shadows of what professional test writers do this work identifies the reasoning behind teachers' tests In addition focused testing content chapters take examples directly from the actual tests and the accompanying teacher commentary This book is an accessible applied resource for second and foreign language teachers language program administrators working with teachers students in teacher preparation and enrichment programs and scholars in language teaching learning and testing *Teacher Involvement in High-Stakes Language Testing* Daniel Xerri, Patricia Vella Briffa, 2018-04-27

This book advocates that teachers should play an active role in high stakes language testing and that more weight should be given to teacher judgement This is likely to increase the formative potential of high stakes tests and provide teachers with a sense of ownership The implication is that the knowledge and skills they develop by being involved in these tests will feed into their own classroom practices The book also considers the arguments against teacher involvement e.g. the contention that teacher involvement might entrench the practice of teaching to the test or that teachers should not be actively involved in high stakes language testing because their judgement is insufficiently reliable Using contributions from a wide range of international educational contexts the book proposes that a lack of reliability in teacher judgement is best addressed by means of training and not by barring educators from participating in high stakes language testing It also argues that their involvement in testing helps teachers to bolster confidence in their own judgement and develop their assessment literacy Moreover teacher involvement empowers them to play a role in reforming high stakes language testing so that it is more equitable and more likely to enhance classroom practices High stakes language tests that adopt such an inclusive approach facilitate more effective learning on the part of

teachers which ultimately benefits all their students Becoming a Language Teacher Elaine Kolker Horwitz, 2020-10-21

How do I plan a lesson How will I know if my students are learning How do I teach language while also teaching content material How do I effectively use technology in language teaching How can I ensure the academic success of my students How can I help my students have more contact with the new language These are the practical questions language and mainstream teachers struggle with as they enter today's diverse classrooms in an era when they must focus not only on their everyday teaching but also on students' second language development The answers to these questions and more are here in this much needed comprehensive practical guide to language teaching in second foreign and content based settings In a warm supportive tone respected author and experienced language teacher Elaine K Horwitz clearly explains the fundamental concepts of second language acquisition and language teaching using actual classroom situations that help students learn to make instructional decisions in their own future teaching settings Unique among other methods texts that emphasize language for communication purposes only Becoming a Language Teacher also focuses on language for academic needs while addressing the latest trends in language teaching as well as effective approaches for teaching language in content classes The perfect choice for ESL and Foreign Language methods courses this guide helps teachers develop a personal approach to language teaching suited to their own unique teaching situations Major additions to the text are related to socio cultural approaches to second language acquisition and teaching The Second Edition also includes Expanded coverage of language development and content teaching Coverage of The Output Hypothesis Sociocultural Theories of SLA the SIOP Method and the CALLA Approach Publication of the long awaited revision of the Beliefs about Language Learning Inventory BALLI An Assessment for Learning approach to student testing added to Chapter 8 Suggestions for using new technologies and digital media incorporated throughout Added explanations of Emergent Bilingual Heritage Learners Dual Language programs World Languages Sheltered English Newcomer Centers Self Access Language Learning Centers Willingness to Communicate and Language Learner Autonomy
