environmental and ecological crises Is the enforcement of international net zero carbon strategy the best solution to the problems we face or are there deeper issues that need to be addressed Rejecting the view of the earth as an isolated or closed system as in conventional computer modelling Luigi Morelli argues that our planet is an open system a living entity that maintains a dynamic equilibrium within its own kingdoms and the wider solar system Humans however still have a pivotal role to play Building on the pioneering work of Goethe Rudolf Steiner Viktor Schauberger and others Morelli expands our view of the climate from the oceans and atmosphere to the sun and from the last 150 years to the history of our climate over millennia In doing so he exposes the weakness of the prevailing fixed narratives around our undoubtedly changing environment in particular the conventional hypothesis concerning carbon emissions Such consensus science is often at the mercy of established economic interests who have largely co opted academia and scientific institutions In a thoroughly researched and accessible study The Living Climate explores the intricacy and wisdom of an untold variety of cycles in nature and the critical and overlooked role of water within the greenhouse gas model Challenging mechanistic representations of the global ecosystem Morelli s holistic scientific review offers potential solutions to seemingly intractable problems The
