Agemy, 2025-06-11 There were once six great high kingdoms now there is only one The prophecy of destruction is realized as the high king s power wanes and criminal families take more control of the land Adventure calls to six individuals to prevent the collapse of the structured world One is an ancient man who lived many lives and died many deaths He gave up on the world and sought only to die one last time but that was forbade him Another is a young boy who was born with a silver spoon in his mouth but was forced to learn the value of hard work good morals and earning what he had Another is quite the opposite he was born to a mother and father with almost nothing but when given the opportunity to obtain riches albeit illegally he takes the chance A princess who finds herself unprepared for the adventure set before her must learn how to rely on herself and communicate with others A young girl who simply wishes to find an adventure And a slave to a life of sorrow who only wants to be free from her bonds and the threat of death and live life in the sunshine of openness From the presence of the high king to multiple lone wastelands and everywhere in between from the depths of the world to the skies above the kingdom they travel and are tested in ways they could not have foreseen even if they did know what they were destined for **DeepAesthetics** Anna Munster, 2025-03-31 Computation has now been reconfigured by machine learning those technical processes and operations that yoke together statistics and computer science to create artificial intelligence AI by furnishing vast datasets to learn tasks and predict outcomes In *DeepAesthetics* Anna Munster examines the range of more than human experiences this transformation has engendered and considers how those experiences can be qualitative as well as quantitative Drawing on process philosophy Munster approaches computational experience through its relations and operations She combines deep learning the subfield of machine learning that uses neural network architectures and aesthetics to offer a way to understand the insensible and frequently imperceptible forms of nonlinear and continuously modulating statistical function Attending to the domains and operations of image production statistical racialization AI conversational agents and critical AI art Munster analyzes how machine learning is operationally entangled with racialized neurotypical and cognitivist modes of producing

knowledge and experience She approaches machine learning as events through which a different sensibility registers one in which AI is populated by oddness disjunctions and surprises and where artful engagement with machine learning fosters indeterminate futures *Living Resources of the Delaware Estuary*, 1995 We the Living Ayn Rand, 2009-05-05 Ayn Rand's first published novel a timeless story that explores the struggles of the individual against the state in Soviet Russia First published in 1936 *We the Living* portrays the impact of the Russian Revolution on three human beings who demand the right to live their own lives and pursue their own happiness It tells of a young woman's passionate love held like a fortress against the corrupting evil of a totalitarian state *We the Living* is not a story of politics but of the men and women who have to struggle for existence behind the Red banners and slogans It is a picture of what those slogans do to human beings What happens to the defiant ones What happens to those who succumb Against a vivid panorama of political revolution and personal revolt Ayn Rand shows what the theory of socialism means in practice Includes an Introduction and Afterword by Ayn Rand's Philosophical Heir Leonard Peikoff **Weathering, Soils & Paleosols** I.P. Martini, W. Chesworth, 2013-10-22 For the past 200 years geological scientists have used the present as a key to unlocking the past This volume continues the tradition by exploring the processes of weathering and soil formation as indicators of the present environment of the Earth's land surface Examined are the various ways in which this information can be used to interpret past environments which have produced the soils now preserved as paleosols Because the surface environment of the earth may now be undergoing rapid change the greenhouse effect the book is a timely one for those researchers looking for evidence of analogous changes in the Earth's past The work is divided into three major sections The first deals with fundamental considerations of weathering clay mineralogy and diagenesis The second deals with the formation of soils from various starting materials and in various surficial environments And the final section is an interpretation of paleosols This volume provides valuable reading material for graduate and senior undergraduate courses
