Empire in Asia: A New Global History Brian P. Farrell, Donna Brunero, 2018-09-20 Asia was the principle focus of empire builders from Alexander and Akbar to Chinggis Khan and Qianlong and yet until now there has been no attempt to provide a comprehensive history of empire in the region Empire in Asia addresses the need for a thorough survey of the topic This volume covers the long 19th century commonly seen in terms of high imperialism and the global projection of Western power This volume explores the dynamic volatile and often contested processes by which by the early years of the 20th century Asian states space and peoples became deeply integrated into the wider dynamics of global reordering Drawing on case studies from across Asia the contributors discuss key themes including ideology concepts of identity religion and politics state building and state formation the relationships between space people and sovereignty the movements of goods money people and ideas and the influence and impact of conflict and military power The two volumes of Empire in Asia offer a significant contribution to the theory and practice of empire when considered globally and comparatively and are essential reading for all students and scholars of global imperial and Asian history The United Nations in The Era of Globalization Mazid Reza Momeni , 2021-08-03 The United Nations as a world organization has gone through different epochs of time facing various challenges and changes since its inception While it has done a lot in saving humankind in its diverse fields of activities yet it has failed to function legitimately and effectively according to the principles of its Charter which have brought its existence and relevance under criticism and questioning The UN after the end of the Cold War for a short period of time gave a new hope to the world that it would now work genuinely according to its member states will in an environment of cooperation and understanding between its member states for common goals However right after the collapse of the communist bloc and the end of capitalist communist antagonism the process of globalization already in force gained momentum which brought about a new era in the UN s life affecting international relations and the world politics too The

emergence of globalization has created many new challenges not only to the individuals and countries but also to the international institutions and global organizations This study is an attempt to analyze the real purpose of the emergence of globalization as a policy and its effects on the UN in particular and the international political economic relations in a wider context CONTENTS Preface V Acknowledgement VII Abbreviations XI Chapter I Introduction 15 Chapter II Bretton Woods Institutions and Globalization Their Impact on the UN 61 Chapter III The Global Compact Project 117 Chapter IV Millennium Development Goals and The Reform Initiatives 155 Chapter V Civil Society Organizations and the United Nations 218 Chapter VI Conclusion 265 Appendix 283 Select Bibliography 284 Index 295

Approaches to History Sabyasachi Bhattacharya,2011 History as a social science is arguably more self reflective than

associated disciplines in that family Other social scientists seem to see little reason to look beyond the paradigm they are developing in the present times Historians on the other hand tend to depend on the cumulative process of the development of their craft and the fund of accumulated knowledge Yet while this is acknowledged in the practice of research Historiography in itself as a subject of study has rarely found its place in the syllabi of Indian universities Knowledge of Historiography is taken for granted when a scholar plunges into research In an attempt to address this lacuna the Indian Council of Historical Research ICHR has planned a series of volumes on Historiography comprising articles by subject specialists commissioned by the ICHR The first volume in the series Approaches to History Essays in Indian Historiography brings to the readers the first fruits of that endeavour While the essays encompass areas of research presently at the frontiers of new research scholars will also find the bibliographies accompanying the essays of significant appeal *Business Environment: Fernando, 2011* In Business Environment A C Fernando integrates concepts with real world situations and the most recent data to help students grasp complex economic concepts a clear understanding of which is required to comprehend the various facets of business

Reassessing the Pink Tide Rahul A. Sirohi, Samyukta Bhupatiraju, 2020-10-30 This book evaluates the record of the Left in Brazil and Venezuela two key cases of the pink tide wave The wave of Left governments that emerged across Latin America in the early 2000s a process dubbed the pink tide has been on the wane in recent years The Left regimes that at one point seemed unbeatable have either been defeated at the ballot ousted through coups or have had to contend with increasing economic and political conflicts which have nullified many of their achievements This book argues like many voices on the Left today that the waning of the pink tide in the region must be viewed in the context of the Left's inability to initiate radical structural changes in its constituencies At the same time however the book makes the case for a more nuanced and balanced evaluation of the development record of the Left than is often done In doing so it seeks to go beyond the reform revolution binary that has blinkered recent assessments and intends to highlight alternative paths that the Left could have taken
