The Loss Of The Ss Titanic:

The Loss of the SS Titanic Lawrence Beesley, 2009 The circumstances in which this book came to be written are as follows Some five weeks after the survivors from the Titanic landed in New York I was the guest at luncheon of Hon Samuel J Elder and Hon Charles T Gallagher both well known lawyers in Boston After luncheon I was asked to relate to those present the experiences of the survivors in leaving the Titanic and reaching the Carpathia When I had done so Mr Robert Lincoln O'Brien the editor of the Boston Herald urged me as a matter of public interest to write a correct history of the Titanic disaster his reason being that he knew several publications were in preparation by people who had not been present at the disaster but from newspaper accounts were piecing together a description of it He said that these publications would probably be erroneous full of highly coloured details and generally calculated to disturb public thought on the matter He was supported in his request by all present and under this general pressure I accompanied him to Messrs Houghton Mifflin Company where we discussed the question of publication Messrs Houghton Mifflin Company took at that time exactly the same view that I did that it was probably not advisable to put on record the Loss of the SS Titanic by Lawrence Beesley 4 incidents connected with the Titanic's sinking it seemed better to forget details as rapidly as possible However we decided to take a few days to think about it At our next meeting we found ourselves in agreement again but this time on the common ground that it would probably be a wise thing to write a history of the Titanic disaster as correctly as possible I was supported in this decision by the fact that a short account which I wrote at intervals on board the Carpathia in the hope that it would calm public opinion by stating the truth of what happened as nearly as I could recollect it appeared in all the American English and Colonial papers and had exactly the effect it was intended to have

S. Titanic: Its Story and Its Lessons](#) Lawrence Beesley, 2015-05-25 RMS Titanic was a British passenger liner that sank in the North Atlantic Ocean in the early morning of 15 April 1912 after colliding with an iceberg during her maiden voyage from Southampton UK to New York City US The sinking resulted in the loss of more than 1 500 passengers and crew making it one of the deadliest commercial peacetime maritime disasters in modern history The RMS Titanic the largest ship afloat at the time it entered service was the second of three Olympic class ocean liners operated by the White Star Line and was built by the Harland and Wolff shipyard in Belfast with Thomas Andrews as her naval architect Andrews was among those lost in the sinking On her maiden voyage she carried 2 224 passengers and crew Wikimedia Commons has media related to RMS Titanic Under the command of Edward Smith the ship s passengers included some of the wealthiest people in the world as well as hundreds of emigrants from Great Britain and Ireland Scandinavia and elsewhere throughout Europe seeking a new life in North America A wireless telegraph invented

by Guglielmo Marconi and manned by operators Jack Phillips and Harold Bride was provided for the convenience of passengers as well as for operational use Although Titanic had advanced safety features such as watertight compartments and remotely activated watertight doors there were not enough lifeboats to accommodate all of those aboard due to outdated maritime safety regulations Titanic only carried enough lifeboats for 1 178 people slightly more than half of the number on board and one third her total capacity After leaving Southampton on 10 April 1912 Titanic called at Cherbourg in France and Queenstown now Cobh in Ireland before heading west to New York 2 On 14 April 1912 four days into the crossing and about 375 miles 600 km south of Newfoundland she hit an iceberg at 11 40 p m ship s time The collision caused the ship s hull plates to buckle inwards along her starboard side and opened five of her sixteen watertight compartments to the sea the ship gradually filled with water Meanwhile passengers and some crew members were evacuated in lifeboats many of which were launched only partly loaded A disproportionate number of men were left aboard because of a women and children first protocol followed by some of the officers loading the lifeboats 3 By 2 20 a m she broke apart and foundered with well over one thousand people still aboard Just under two hours after Titanic foundered the Cunard liner RMS Carpathia arrived on the scene of the sinking where she brought aboard an estimated 705 survivors The disaster was greeted with worldwide shock and outrage at the huge loss of life and the regulatory and operational failures that had led to it Public inquiries in Britain and the United States led to major improvements in maritime safety One of their most important legacies was the establishment in 1914 of the International Convention for the Safety of Life at Sea SOLAS which still governs maritime safety today Additionally several new wireless regulations were passed around the world in an effort to learn from the many missteps in wireless communications which could have saved many more passengers 4 The wreck of Titanic remains on the seabed split in two and gradually disintegrating at a depth of 12 415 feet 3 784 m Since her discovery in 1985 thousands of artefacts have been recovered and put on display at museums around the world Titanic has become one of the most famous ships in history her memory kept alive by numerous books folk songs films exhibits and memorials **The Loss of the S.
