Phil Weyerhaeuser Charles E. Twining,2015-08-17 This is a rich and many faceted personal and business biography of the main figure in the third generation of Weyerhaeusers who led the Weyerhaeuser Timber Company through the difficult and decisive years from 1933 to 1956 Although Phil Weyerhaeuser preferred to pass over the importance of his role he was an industry leader and as such could not escape a large public duty The years in which he served from the 1920s tin the Inland Empire and from 1933 to 1956 with the Weyerhaeuser Timber Company west of the Cascades were years of great demands and change Within his tenure the country experience the Great Depression and World War II the reluctant acceptance by business of New Deal and Fair Deal legislation and bureaucratic requirements and the adjustments occasioned by the managerial revolution In the case of the Timber Company the period witnessed its transition from what had been primarily a dealer in timberlands to an integrated manufacturer of forest products from a liquidator of forest resources to a managers of tree farms designed to be perpetual in their providence Phil oversaw his responsibilities to good purpose His quiet style is of interest and so too are the effects of just being a Weyerhaeuser The latter of course had much to do with his opportunities and also influenced the manner in which he conducted himself But it was not without its liabilities and the family relationships are an important element in the story The most significant feature however has to do with the study of a period and a place and an industry through the experiences of a very special organization and its leadership The study brings people and events into clearer focus and gives them added meaning This is of particular importance in an industry so given to stereotyping and disapprobation This well written account reveals in detail the operation of a huge family enterprise government industry relations at a key time in United States history labor relations and efforts to expand and continually revitalize a large company dependent on natural resources over a period of half a century Central to these efforts was Phil s conviction that the best way for a forest products company to operate was to own its own timberlands he saw such holdings as necessary if the company was to engage in sustained yield management This biography draws extensively on primary sources correspondence family records memoranda and numerous interviews It will be of interest to historians of the Pacific Northwest and the forest products industry students of business history and all readers interested in the development of a major American company
