Emerging Economies and the Transformation of International Business Subhash C. Jain, 2006 The economic power of Brazil Russia India and China BRICs is rapidly increasing changing the landscape of global economics and politics Top scholars of international business address in this vital volume the markets strategy implications challenges and possibilities of this new economic reality As these four nations acquire greater economic clout the opportunities for other countries increase The contributors describe the favorable circumstances these evolving economies could provide for the US and other countries such as expanded markets and services higher returns on investments and new partners in building a more peaceful and prosperous world In contrast they also discuss risks to traditional industries and possible challenges to positions on human rights and intellectual property protections environmental standards free markets and democratic governments The volume emphasizes the need for companies to adopt strategies to stay ahead in the changing business environment Governments must also design and implement new policies geared toward mutually beneficial relationships with BRICs This enlightening study will be of great interest to students and scholars of international business Executives of large companies will find it of great practical use when planning their organization's future strategies

Asia and China in the Global Era Adrian J. Bailey, Ricardo K. S. Mak, 2021-01-18 China's strong economic growth occurring alongside modernization across the great majority of Asian societies has created what many see as a transnational space through and by which not only economic social and cultural resources but also threats and crises flow over traditional political boundaries The first section of the work lays out a clear conceptual framework It draws on arguments about nation no longer being the only container of society about trans disciplinary thinking and about knowledge being context bound It identifies and discusses distinctive features of China and Asia in the global era These include population urbanization and climate change the continuing reach of Orientalist shadows cultural politics of knowledge It closes by arguing how global studies adds value to existing accounts The second and longer section applies this framework through a series of original empirical case studies in three areas migration poverty gender culture education well being Both the conceptual framework and case studies are drawn from research presented at HKBU since 2011 under the auspices of the Global Social Sciences Conference Series and supplemented by additional papers

Risk and Foreign Direct Investment C. White, M. Fan, 2006-01-25 Incorporating an accurate measure of risk is important to the appraisal of an international investment This book examines and recommends how decisions on international investment projects are made Critiquing and integrating existing theory it shows how risk can be incorporated into the present value formula

produce a clear decision rule **Internationalization** C. Wheeler, F. McDonald, I. Greaves, 2003-03-13 This is the 10th volume of The Academy of International Business book series bringing together the latest research on firm strategies and management and the internationalization of the firm from the 29th Academy of International Business UK conference The four main themes of the book are subsidiary location and performance internationalization and firm strategy the internationalization of the small firm and the Internet and e commerce **Complexity and Geographical Economics** Pasquale Commendatore, Saime Kayam, Ingrid Kubin, 2015-02-17 The uneven geographical distribution of economic activities is a huge challenge worldwide and also for the European Union In Krugman's New Economic Geography economic systems have a simple spatial structure This book shows that more sophisticated models should visualise the EU as an evolving trade network with a specific topology and different aggregation levels At the highest level economic geography models give a bird eye's view of spatial dynamics At a medium level institutions shape the economy and the structure of financial and labour markets At the lowest level individual decisions interact with the economic social and institutional environment the focus is on firms decision on location and innovation Such multilevel models exhibit complex dynamic patterns path dependence cumulative causation hysteresis on a network structure and specific analytic tools are necessary for studying strategic interaction heterogeneity and nonlinearities
