The Plight of Older Workers Isabel Baumann, 2016-09-08 This open access book examines the economic social and psychological consequences of manufacturing plant closure at the individual level Using an original data set of over 1 200 workers from Switzerland who lost their manufacturing jobs after the financial crisis of 2008 the author analyzes the determinants of reemployment the sector of reemployment and the change in wages over a two year period In addition coverage also explores how plant closure affects the social relationship between a displaced worker and his or her significant other which includes a discussion of the coping strategies on the household level as well as how changes in a worker's social and occupational life affects overall satisfaction Readers will discover that the burden of structural change disproportionately falls on the shoulders of workers aged 55 and older who often face substantial barriers when trying to return to employment A larger portion of this group experience long term unemployment and those who do manage to find a new job often suffer disproportionate wage loss This result is intriguing in the context of the current demographic change and contradicts the common assumption that young and low qualified individuals are at greatest risk of unemployment Advanced age and not low education appears to be the primary obstacle to workers finding job satisfaction after being laid off because of market conditions

Divergent Social Worlds Ruth D. Peterson, Lauren J. Krivo, 2010-07-07 More than half a century after the first Jim Crow laws were dismantled the majority of urban neighborhoods in the United States remain segregated by race The degree of social and economic advantage or disadvantage that each community experiences particularly its crime rate is most often a reflection of which group is in the majority As Ruth Peterson and Lauren Krivo note in *Divergent Social Worlds* Race place and crime are still inextricably linked in the minds of the public This book broadens the scope of single city black white studies by using national data to compare local crime patterns in five racially distinct types of neighborhoods Peterson

and Krivo meticulously demonstrate how residential segregation creates and maintains inequality in neighborhood crime rates. Based on the authors groundbreaking National Neighborhood Crime Study NNCS, *Divergent Social Worlds* provides a more complete picture of the social conditions underlying neighborhood crime patterns than has ever before been drawn. The study includes economic, social, and local investment data for nearly nine thousand neighborhoods in eighty seven cities, and the findings reveal a pattern across neighborhoods of racialized separation among unequal groups. Residential segregation reproduces existing privilege or disadvantage in neighborhoods such as adequate or inadequate schools, political representation, and local business, increasing the potential for crime and instability in impoverished non white areas yet providing few opportunities for residents to improve conditions or leave. And the numbers bear this out. Among urban residents, more than two thirds of all whites, half of all African Americans, and one third of Latinos live in segregated local neighborhoods. More than 90 percent of white neighborhoods have low poverty, but this is only true for one quarter of black, Latino, and minority areas. Of the five types of neighborhoods studied, African American communities experience violent crime on average at a rate five times that of their white counterparts, with violence rates for Latino minority and integrated neighborhoods falling between the two extremes. *Divergent Social Worlds* lays to rest the popular misconception that persistently high crime rates in impoverished non white neighborhoods are merely the result of individual pathologies or worse inherent group criminality. Yet Peterson and Krivo also show that the reality of crime inequality in urban neighborhoods is no less alarming. Separate the book emphasizes is inherently unequal. *Divergent Social Worlds* lays the groundwork for closing the gap and for next steps among organizers, policymakers, and future researchers.
