Southampton in Old Picture Postcards A. G. K. Leonard, 1992-09-01 Port of Southampton in the 60s & 70s Campbell McCutcheon, 2009-07-15 This fascinating selection of 200 images tells the story of the Port of Southampton in a time of change and decline but which for some trades saw the port grow in importance A History of Southampton in Picture Postcards Clive Brooks, 1989-01-01 *The World's First Railway System* Mark Casson, 2009-09-10 The British railway network was a monument to Victorian private enterprise Its masterpieces of civil engineering were emulated around the world But its performance was controversial praised for promoting a high density of lines it was also criticised for wasteful duplication of routes This is the first history of the British railway system written from a modern economic perspective It uses counterfactual analysis to construct an alternative network to represent the most efficient alternative rail network that could have been constructed given what was known at the time the first time this has been done It reveals how weaknesses in regulation and defects in government policy resulted in enormous inefficiency in the Victorian system that Britain lives with today British railway companies developed into powerful regional monopolies which then contested each other's territories When denied access to existing lines in rival territories they built duplicate lines instead Plans for an integrated national system sponsored by William Gladstone were blocked by Members of Parliament because of a perceived conflict with the local interests they represented Each town wanted more railways than its neighbours and so too many lines were built The costs of these surplus lines led ultimately to higher fares and freight charges which impaired the performance of the economy The book will be the definitive source of reference for those interested in the economic history of the British railway system It makes use of a major new historical source deposited railway plans integrates transport and local history through its regional analysis of the railway system and provides a comprehensive classified bibliography **Southampton Through Time** Jeffery Pain, 2010-02-15 The fascinating history of Southampton illustrated through old and modern pictures *After the Siltheaps* Kevin Keers, 2018-04-06 The author's story starts in a mining village Cramlington in Northumberland in 1954 He grew up with his family father mother two older brothers and a younger sister who all felt the effects of WW2 his father lost a leg in the war His life continued in Cramlington until 1977 when he married and raised two children making a good home and career for himself and his family In 2005 the family moved to Burgundy and set up a new life They still live in France now using Burgundy as a base to explore the rest of Europe This is the story of his life The Myth of the Titanic R. Howells, 1999-03-29 The first critical analysis of the Titanic as modern myth this book focuses on the second of the two Titanics The first was the physical Titanic the rusting remains of which can still be found twelve thousand feet below the north Atlantic The second is the mythical Titanic which emerged just as its tangible predecessor slipped from view on 15 April 1912 It is the second of the two Titanics which remains the more interesting and which continues to carry cultural resonances today The Myth of the Titanic begins with the launching of the unsinkable ship and ends with the outbreak of the

war to end all wars It provides an insight into the particular culture of late Edwardian Britain and beyond this draws far greater conclusions about the complex relationship between myth history popular culture and society as a whole
