Southern Marches Of Imperial Ethiopia Essays In History And Social Anthropology:

The Southern Marches of Imperial Ethiopia Donald Lewis Donham, Wendy James, 2002 These essays offer an approach to the understanding of imperial Ethiopia out of which the present state was created by the 1974 revolution After the 1880s Abyssinia under Menilek II expanded its ancient heartland to incorporate vast new territories to the south Here for the first time these regions are treated as an integral part of the empire The book opens with an interpretation of nineteenth century Abyssinia as an African political economy rather than as a variant on European feudalism and with an account of the north s impact on peoples of the new south Case studies from the southern regions follow four by historians and four by anthropologists each examining aspects of the relationship between imperial rule and local society In revealing the region s diversity and the relationship of the periphery to the centre the volume illuminates some of the problems faced by post revolutionary Ethiopia

The Southern Marches of Imperial Ethiopia Donald Lewis Donham, Wendy James, 2002 Inter disciplinary approach to Ethiopian imperial history

A History of African Societies to 1870 Elizabeth Isichei, 1997-04-13 This comprehensive and detailed exploration of the African past from prehistory to approximately 1870 is intended to provide a fully up to date complement to the Cambridge History of Africa Reflecting several emphases in recent scholarship it focusses on the changing modes of production on gender relations and on ecology laying particular stress on viewing history from below A distinctive theme is to be found in its analyses of cognitive history The work falls into three sections The first comprises a historiographic analysis and covers the period from the dawn of prehistory to the end of the Early Iron Age The second and third sections are for the most part organised on regional lines the second section ends in the sixteenth century the third carries the story on to 1870 A second volume now in preparation will cover the period from 1870 to 1995 This book attempts a more rounded view of African history than most of the other textbooks on the subject addressed to a largely undergraduate level student Earlier histories have tended to ignore some of the current foci in the scholarly literature on Africa generally not reflected in the textbooks these include discussions of topical issues like ecology and gender Isichei s book is also more radical

Arid Land Systems: Sciences and Societies Troy Sternberg, Ariell Ahearn, 2019-08-19 Understanding deserts and drylands is essential as arid landscapes cover 40% of the Earth and are home to two billion people Today s problematic environment human interaction needs contemporary knowledge to address dryland complexity Physical dimensions in arid zones land systems climate and hazards ecology are linked with social processes that directly impact drylands such as land management livelihoods and development The challenges require integrated research that identifies systemic drivers across global arid regions Measurement and monitoring field investigation remote sensing and data analysis are effective tools to investigate natural dynamics Equally inquiry into how policy and practice affect landscape sustainability is key to mitigating detrimental activity in deserts Relations between socio economic forces and degradation agro pastoral rangeland use drought and disaster and resource extraction reflect land interactions Contemporary themes of

food security conflict and conservation are interlinked in arid environments This book unifies desert science arid environments and dryland development The chapters identify land dynamics address system risks and delineate human functions through original research in arid zones Mixed methodologies highlight the vital links between social and environmental science in global deserts The book engages with today's topical themes and presents novel analyses of arid land systems and societies

Cross-Cultural Exchange in the Atlantic World Roquinaldo Ferreira,2012-04-09 This book argues that Angola and Brazil were connected not separated by the Atlantic Ocean Roquinaldo Ferreira focuses on the cultural religious and social impacts of the slave trade on Angola Reconstructing biographies of Africans and merchants he demonstrates how cross cultural trade identity formation religious ties and resistance to slaving were central to the formation of the Atlantic world By adding to our knowledge of the slaving process the book powerfully illustrates how Atlantic slaving transformed key African institutions such as local regimes of forced labor that predated and coexisted with Atlantic slaving and made them fundamental features of the Atlantic world's social fabric

Lands of the Future Echi Christina Gabbert,Fana Gebresenbet,John G. Galaty,Günther Schlee,2021-01-15 Rangeland forests and riverine landscapes of pastoral communities in Eastern Africa are increasingly under threat Abetted by states who think that outsiders can better use the lands than the people who have lived there for centuries outside commercial interests have displaced indigenous dwellers from pastoral territories This volume presents case studies from Eastern Africa based on long term field research that vividly illustrate the struggles and strategies of those who face dispossession and also discredit ideological false modernist tropes like backwardness and primitiveness

Shackled Sentiments Eric J. Montgomery,2019-01-21 The ramifications of the trans Saharan trans Atlantic Indian Ocean and domestic African slave trades are immeasurable and they continue to disaffect black people from Africa to Haiti and Los Angeles to Lagos Shackled Sentiments focuses on the memories and embodiments of slavery through case studies from western eastern and central Africa the Caribbean and Latin America The contributors to this collection examine the ways that memories of slavery have been internalized Slavery and

memory are assessed from multiple perspectives as sets of ritual practices community based systems of spirit veneration mechanisms of resistance and national pride sacred languages informing personhood and instruments for healing and well being This book is recommended for scholars of anthropology history religion art and linguistics *Herders, Warriors, And Traders* John G Galaty, 2019-03-04 African pastoralists have been devastated by drought famine and dislocation yet herding remains the most viable system of support for the inhabitants of the vast arid and semi arid zones Using case studies of the Tswana and the San the interlacustrine pastoralists the Masai and Mursi of East Africa and the multi ethnic regional systems of Lak *The African Poor* John Iliffe, 1987-12-25 This history of the poor of Sub Saharan Africa begins in the monasteries of thirteenth century Ethiopia and ends in the South African resettlement sites of the 1980s Its thesis derived from histories of poverty in Europe is that most very poor Africans have been individuals incapacitated for labour bereft of support and unable to fend for themselves in a land rich economy There has emerged the distinct poverty of those excluded from access to productive resources Natural disaster brought widespread destitution but as a cause of mass mortality it was almost eliminated in the colonial era to return to those areas where drought has been compounded by administrative breakdown Professor Iliffe investigates what it was like to be poor how the poor sought to help themselves how their counterparts in other continents live The poor live as people rather than merely parading as statistics Famines have alerted the world to African poverty but the problem itself is ancient Its prevailing forms will not be understood until those of earlier periods are revealed and trends of change are identified This is a book for all concerned with the future of Africa as well as for students of poverty elsewhere
