Flowers, 2012-04-09 The debate over women's roles in the Southern

Baptist Convention's conservative ascendance is often seen as secondary to theological and biblical concerns Elizabeth Flowers argues however that for both moderate and conservative Baptist women all of whom had much at stake disagreements that touched on their familial roles and ecclesial authority have always been primary And in the turbulent postwar era debate over their roles caused fierce internal controversy While the legacy of race and civil rights lingered well into the 1990s views on women's submission to male authority provided the most salient test by which moderates were identified and expelled in a process that led to significant splits in the Church In Flowers's expansive history of Southern Baptist women the woman question is integral to almost every area of Southern Baptist concern hermeneutics ecclesial polity missionary work church state relations and denominational history Flowers's analysis part of the expanding survey of America's religious and cultural landscape after World War II points to the South's changing identity and connects religious and regional issues to the complicated relationship between race and gender during and after the civil rights movement She also shows how feminism and shifting women's roles behaviors and practices played a significant part in debates that simmer among Baptists and evangelicals throughout the nation today
