## **Strategic Management Current Trends And Issues:**

Strategic Management T.K. Jain P.M. Rao, Trilok Kumar Jain, 2002-01-01      Trends, Challenges, and Practices in Contemporary Strategic Management Mızrak, Filiz, 2024-01-10 Modern business dynamics are an intricate and strategic landscape that underpins organizational triumphs despite today's turbulent market. Those fervently exploring the symbiosis of theory and reality within the strategic realm of contemporary strategic management require a solid understanding of the concept and they can now enhance this journey with Trends, Challenges, and Practices in Contemporary Strategic Management. This seminal work unfurls a tapestry of erudition guiding its readers through the corridors of contemporary strategic management. Targeting a diverse readership encompassing academicians, researchers, students, and industry leaders, the book's scope is as expansive as its subject matter. For scholars and researchers, its pages unfold a treasure trove of contemporary strategic management theories, their evolution, and cutting-edge practices. Practitioners entrusted with steering strategic compasses will glean a pragmatic arsenal of insights and best practices; their leadership acumen fortified to navigate the most tempestuous waters of organizational strategy. Covering from disruptive innovation and strategic leadership in a digital epoch to sustainability, global strategy, and the pivotal role of artificial intelligence in shaping strategies, this book mirrors the ever-evolving cadence of contemporary strategic management.

Special Issue: Knowledge Management - Current Trends and Challenges Małgorzata Zięba, 2017-01-01 Knowledge management (KM) has become an evolving discipline since the early 1990s when organizations started perceiving knowledge as a valuable resource. This field of research has its origin in many disciplines such as information and IT management, computer science, enterprise management, organization science, human resource management, and even philosophy, offering many potential research perspectives and approaches. For more than three decades, organizations of various types have been undertaking efforts to apply knowledge management in order to benefit from a competitive advantage. Researchers and practitioners from diversified industries and with different backgrounds have tried to answer the question: how to successfully manage knowledge, knowledge work, and knowledge workers, still leaving much space for further research avenues. Now, after all those years of research, some old questions have still not been answered, and some new ones have arisen. During the pre-conference workshop on The future of KM: short time goals and long term vision, organized in Barcelona before the European Conference on Knowledge Management 2017 and conducted by myself and my colleague Dr Sandra Moffett from Ulster University UK, we asked the participants what their idea of the future of KM was. We could observe many different voices and approaches: some very pessimistic that KM is probably coming to an end, but mostly very promising that there are still many unexplored aspects of KM we should focus on, and there is still a plethora of issues related to knowledge management that should be examined. Similar voices can be detected in the flagship article written by Meliha Handzic who claims that KM definitely has a future, although it may not be without some challenges and obstacles to overcome. This paper links the past three

evolutionary stages of KM called fragmentation integration and fusion with the future of KM three new trends named extension specialization and reconceptualization The author also suggests that KM should embrace different approaches under the KM Conceptual Umbrella highlighting the possibility of addressing many themes ideas or tools linked with knowledge All the past and future evolutionary stages of KM are described in detail together with the challenges that the KM field might face in the future In the second paper by Philip Sisson and Julie J C H Ryan the authors present a mental model of knowledge as a concept map being an input to KM research The authors used qualitative methods together with system engineering and object analysis methods to collect various concepts and relate them The issue of knowledge is elementary in knowledge management and showing the links between particular knowledge terms is of very high value to all KM researchers Although the length of this article may constitute a challenge it is definitely worth the effort as it illustrates many multifaceted multilayered and multidimensional aspects of knowledge The third paper by Karl Joachim Breunig and Hanno Roberts discusses another valid issue of value creation in the context of knowledge flow The authors try to answer the question How can we express knowledge in such a way that it can be monetized and made accessible to specific managerial interventions Building on the previous extant studies and authors ideas the paper points out that boundary spanners play a focal role in the monetization efforts of knowledge In the fourth paper by Regina Lenart Gansinieć one can read about crowdsourcing and the virtual knowledge sharing taking place in this process The phenomenon of crowdsourcing is still under researched and not much is known about the virtual exchange of knowledge in crowdsourcing and its benefits such as co creation participation or gaining new ideas and potential sources of innovations Apart from the examination of the potential benefits of virtual knowledge sharing the author also analyses ways of measuring virtual knowledge sharing in the process of crowdsourcing The fifth paper by Kaja Prystupa concerns knowledge management processes in small entities and the role played by organizational culture As the aim of this paper the author set the examination of organizational culture in small Polish companies with the application of a symbiotic interpretive perspective Interesting outcomes of this study are the confirmed role of organizational culture in KM initiatives the importance of the founder and the industry and the threat posed by organizational growth which should be well managed from the perspective of organizational culture so as not to hinder organizational performance The sixth and the final paper by David Mendes Jorge Gomes and M rio Rom o deals with ways of creating intangible value through the use of a corporate employee portal The authors undertake the effort to explain how such a portal fosters the creation of organizational values built on intangible assets As the research confirms an employee portal can be considered as a strategic tool for promoting organizational culture and cooperation through information and communication fluxes and through the teamwork of collaborative functionalities This issue of JEMI integrates contributions from Bosnia and Herzegovina the United States Norway Poland and Portugal I would like to express my gratitude to all the authors who contributed to this special issue proving that knowledge management is still a valid topic and offering abundant

research opportunities I would also like to express my sincerest thanks to the anonymous reviewers who contributed highly to the selection of the best submissions for this issue and guided the authors to further improvements in their works Finally I would like to pay special thanks to Dr Anna Ujwary Gil Editor in Chief of JEMI for her kind invitation to prepare this special issue and her continual support at each stage of its preparation I do hope that the readers of JEMI find the selected papers valuable and that they enrich their knowledge on KM issues Additionally I do believe that the collected works will be inspiring and offer some future directions for the examination of the knowledge management field Dr Ma gorzata Zi ba Guest Editor JEMI Assistant Professor Gdansk University of Technology Poland *Strategic Management* Upendra Kachru, 2009 Written in a lucid way this book traverses the entire panorama of strategic management *The Strategic Management of Health Care Organizations* Peter M.
