Redesigning Asian Business Frank-Jürgen Richter,2002-03-30

With much of the Asian Miracle destroyed and much of the Western world's awe for Asian ways of management dissipated organizations there are changing with such speed that most of our knowledge about them is quickly outdated Richter takes stock of East Asian management practices as they are perceived so far and he discusses the strategies that others propose to help Asian management redesign itself for the future including a long term agenda for change based on the cultural heritage of Confucianism He analyzes the cultural underpinnings of Asian management practices evaluates the influence of the Asian economic crisis on them and discusses their potential for guiding Asian firms to a sustainable competitive advantage He then provides examples of how Asian firms shape up their organizations and describes a short term agenda to fix the weaknesses in Asian management at least temporarily Throughout Richter avoids talk about strategic management as merely a theory he adopts a broader definition that includes a value system to guide East Asian firms as they re emerge and redevelop The result is a challenging intensely pragmatic analysis for decision makers at all levels in all countries and cultures and it is a new stone in the foundation of academic research and thought Richter opens with a discussion of the legacy of Confucianism and its impact on Asian management practices He then proposes three intrinsic characteristics of Asian management networks trust and collectivism He gives a history of the Asian economic crisis highlighting the failures of Asia's economic development and the flaws that appeared in its management practices The third section of the book evaluates management practices that have emerged since then and how they are perceived so far Then in the concluding section he presents a new perspective on Asian management short term goals fixing current management weaknesses and long term goals incorporating its long abiding strengths Throughout Richter draws on the management theory enunciated by Hofstede and includes examples and case studies of recent developments across the region and he also includes his own theories as well as those of others Mr Richter's book will be a welcome addition to the literature on business and the culture of Asia
