Strategic Survey 1996 97:

Strategic Survey 1996-1997 International Institute for Strategic Studies, 1997 Strategic Survey 1996 1997 reviews and analyzes the key political economic and foreign policy developments and trends of 1996 and the first quarter of 1997 Articles covering regional security proliferation and military conflict form an accessible commentary invaluable for interpreting world wide strategic events **Strategic Survey 1996/97**, 1997 *The Revolution in Strategic Affairs* Lawrence

Freedman, 2020-10-28 Rapid developments in information technology and precision weaponry are said to herald a revolution in military affairs RMA making possible quick and decisive victories with minimal casualties and collateral damage But has such a revolution taken place The issues that drive conflict will persist and many of the technical advances associated with the RMA will not necessarily produce a transformation in the nature of warfare The end of the Cold War has highlighted another revolution one in political affairs Major powers appear less likely to go to war with one another than they are to intervene in conflicts involving weak states with potential opponents including militia groups drug cartels and terrorists RMA technology may be less suited to conflicts such as these If the cumulative effect of these changes has produced a revolution it is a revolution in strategic as much as military affairs This paper argues that the RMA is the practical expression of a Western Way of Warfare the key features of which are professional armed forces intolerance of casualties and intolerance of collateral damage the key technological and conceptual components of the RMA were in place by the early 1970s The trend has therefore been evolutionary rather than revolutionary The significant difference is in the new political setting of the end of the Cold War and the revolution in perceptions of Western particularly US conventional military strength brought about by the Gulf War of 1991 the Gulf conflict could mark the start of a true revolution if future battles offer similar opportunities to exploit the RMA s technology However since the US and its allies appear unbeatable when fighting on their own terms future opponents will fight differently the West will therefore face opponents who will follow strategies that contradict the Western Way of Warfare They will avoid pitched battles will exploit the West s reluctance to inflict civilian suffering and will target their opponent s domestic political base as much as its forward troops The problem for the West is not how to prevail but how to do so in an acceptable manner The more warfare becomes entwined with civilian activity the more difficult it is to respond with the type of decisive and overwhelming military means embodied in the RMA The RMA does not create a situation in which information is the only commodity at stake and so does not offer the prospect of a virtual war The new circumstances and capabilities do not prescribe one strategy but extend the range of strategies available The issue underlying the RMA is the ability of Western countries in particular the US to follow a line geared to their own interests and capabilities The Politics of Positive Incentives in Arms Control Thomas Bernauer, Dieter Ruloff, 1999 They define positive incentives as transfers of positively valued resources such as money technology or know how from one actor to another with the aim of driving the behavior of the recipient in a direction that is desirable from the viewpoint of the provider BOOK JACKET

Rogue States and U.S. Foreign Policy Robert Litwak, 2000-02-14 President Clinton and other U S officials have warned that rogue states pose a major threat to international peace in the post Cold War era But what exactly is a rogue state Does the concept foster a sound approach to foreign policy or is it in the end no more than a counterproductive political epithet Robert Litwak traces the origins and development of rogue state policy and then assesses its efficacy through detailed case studies of Iraq Iran and North Korea He shows that the policy is politically selective inhibits the ability of U S policymakers to adapt to changed conditions and has been rejected by the United States major allies Litwak concludes that by lumping and demonizing a disparate group of countries the rogue state approach obscures understanding and distorts policymaking In place of a generic and constricting strategy he argues for the development of differentiated strategies of containment tailored to the particular circumstances within individual states

Concepts of Non-Provocative Defence G. Wiseman, 2001-12-18 This book examines the viability of non provocative defence the controversial idea that defensive military policies and practices reduce the risk of wars and provide a viable basis for defending a society should war break out Drawing on case studies from Europe the 1991 Persian Gulf War and Asia Pacific the author concludes that non provocative defence concepts remain relevant and that they can help in deterring conducting and settling wars

Human Rights Journalism I. Shaw, 2011-11-15 Shaw argues that journalism should focus on deconstructing the underlying structural and cultural causes of political violence such as poverty famine and human trafficking and play a proactive preventative rather than reactive prescriptive role in humanitarian intervention

Constructing Regional Security W. Durch, 2016-04-30 In this book William Durch examines conventional weapons proliferation since World War II the role of arms transfers in fueling regional conflict and prospects for curbing the global arms trade Noting that supply side arms control efforts which seek to constrain the companies and countries that produce and distribute major conventional weapons have a poor international track record Durch argues for a broader approach that tries to get at the demand side of the equation Addressing the political and regional dynamics that impel arms acquisitions he looks at how arms control might be combined with confidence and security building measures to contain demand and how value based arms trade control measures like codes of conduct could be implemented in stepwise fashion consistent with US national interests in regional stability

Political Parties of Eastern Europe: A Guide to Politics in the Post-communist Era Janusz Bugajski, 2020-09-10 This comprehensive one volume guide to politics in Eastern Europe provides a wealth of information on the region The author outlines the emergent political spectrum of parties and coalitions which are described in the 20 country chapters that make up the heart of the book Parties are classified across the political spectrum and discussed individually in terms of programs leadership and political activity Tables at the end of each country chapter present basic political data and electoral results A concluding essay evaluates democratic development in the region

Library, 1997 Managing Information, 1997 *The Path of a Genocide* Astri Suhrke, 2017-07-05 The Great Lakes region of Africa has seen dramatic changes After a decade of war repression and genocide loosely allied regimes have replaced old style dictatorships The Path of a Genocide examines the decade 1986-97 that brackets the 1994 genocide in Rwanda This collection of essays is both a narrative of that event and a deep reexamination of the international role in addressing humanitarian issues and complex emergencies Nineteen donor countries and seventeen multilateral organizations international agencies and international nongovernmental organizations pooled their efforts for an in depth evaluation of the international response to the conflict in Rwanda Original studies were commissioned from scholars from Uganda Rwanda Zaire Ethiopia Norway Great Britain France Canada and the United States While each chapter in this volume focuses on one dimension of the Rwanda conflict together they tell the story of this unfolding genocide and the world's response The Path of a Genocide offers readers a perspective in sharp contrast to the tendency to treat a peace agreement as the end to conflict This is a detailed effort to make sense of the political crisis and genocide in Rwanda and the effects it had on its neighbors

Toward Responsibility in the New World Disorder John T. Fishel, Max G. Manwaring, 2013-10-11 This volume commends itself to the reader to provoke thought about what governments and international organizations ought to do when faced with the responsibilities of a given peace operation Equally important it suggests what we as citizens in the world community ought to demand of our governments and that community in the current world disorder The intent is to help decision makers policy makers opinion makers and students understand the nature of the problem that is likely to provide the greatest challenge to international security management into the next century *Afghanistan and the Future of Warfare:*

Implications for Army and Defense Policy, 2002 The defense debate tends to treat Afghanistan as either a revolution or a fluke either the Afghan Model of special operations forces SOF plus precision munitions plus an indigenous ally is a widely applicable template for American defense planning or it is a nonreplicable product of local idiosyncrasies In fact it is neither The Afghan campaign of last fall and winter was actually much closer to a typical 20th century mid intensity conflict albeit one with unusually heavy fire support for one side And this view has very different implications than either proponents or skeptics of the Afghan Model now claim Afghan Model skeptics often point to Afghanistan s unusual culture of defection or the Taliban s poor skill or motivation as grounds for doubting the war s relevance to the future Afghanistan s culture is certainly unusual and there were many defections The great bulk however occurred after the military tide had turned not before hand They were effects not causes The Afghan Taliban were surely unskilled and ill motivated The non Afghan al Qaeda however have proven resolute and capable fighters Their host s collapse was not attributable to any al Qaeda shortage of commitment or training Afghan Model proponents by contrast credit precision weapons with annihilating enemies at a distance before they could close with our commandos or indigenous allies Hence the model s broad utility with SOF directed bombs doing the real killing even ragtag local militias will suffice as allies All they need do is screen U S commandos from the occasional hostile survivor and occupy the abandoned ground thereafter Yet the actual fighting in Afghanistan involved substantial close combat Al Qaeda counterattackers closed unseen to pointblank range of friendly forces in battles at Highway 4 and Sayed Slim Kalay

The Next World War James Adams, 2001-03-23 It is a silent invisible and deadly weapons system It can paralyze an entire nation without a single soldier being sent to war We glimpsed its potential on television when surgical strikes on radar sites electrical power plants and command networks crippled Iraqi forces during the Gulf War Now in *The Next World War* James Adams shows how a new chapter in military history is being written as the Information Age comes to the battlefield to bigger and stronger now add smarter As increasingly sophisticated computers and microtechnology have become available the concept of conventional warfare has changed Technology has already made its way to the front lines soldiers are now equipped for example with new smart technologies such as handheld computers that allow them to e mail their commanders There are devices that can sense an enemy s presence before the enemy is visible by detecting body heat or by communication with satellites overhead Robotic bugs can even be sent in swarms to sabotage weapons or subdue enemy soldiers But the most significant and important use of information warfare won t be on the battlefield The most devastating weapons will be those that target an enemy s infrastructure air control systems electrical grids and communication networks to name just a few potential targets Trojan horse chips or viruses designed to accept and respond to commands from U S military intelligence can be installed in computers being sold overseas making them vulnerable to attack By hacking into computer systems the United States could override programmed commands and thus shut down air traffic control systems and open floodgates and bridges Misinformation could even be broadcast for

example by using imaging technology to simulate a television appearance by an enemy nation's leaders. This type of combat puts civilians at more risk than ever as financial communication transportation and other infrastructure systems become prime military targets. And information warfare puts the United States a nation increasingly dependent on technology in a position of both definite advantage and extreme vulnerability. In *The Next World War* James Adams draws on impressive research as well as his lifetime of reporting on intelligence and military affairs to give us a chilling scenario of how wars will be fought in the new millennium and how much closer to home they might strike. *From Adversaries to Partners?*

Ming-Yen Tsai, 2003-10-30 When China and Russia established a strategic partnership in 1996 both nations declared that they would further develop military cooperation in various fields. Tsai examines the course of this military cooperation to reveal the nature of the military ties with the hopes of determining whether these two traditional adversaries have put aside historical legacies and mutual mistrust to create a full fledged military partnership. After analyzing the motives and concerns of both powers Tsai concludes that while progress has been made in reducing military tensions in border regions the level of trust has not increased substantially. The nature of these ties remains extremely fragile. Among Western analysts there has been concern that a closer partnership might adversely affect U.S. interests in the region. China and Russia have developed cooperation in certain areas such as arms transfers and military technical cooperation and these achievements have successfully reduced political tension. However reciprocal threats against each other's territories and China's increasing ambitions and capacity to act as a great military power in the region could eventually become a major source of friction. Based on research in both Chinese and Russian this study offers a comprehensive analysis on the development of and limits to this military cooperation. *The Security Environment in the Asia-Pacific* Hung-Mao Tien, Ten-jen Cheng, 2016-09-16

Multilateral security forums in the Asia Pacific region have evolved but bilateral defence alliances continue to form the principle pillars of national security for most nations in the region. This text presents a survey of issues confronting the Asia Pacific region as it enters year 2000.
