Analysis of Multinational Strategic Management Alan M. Rugman,Alain Verbeke,2005 Characterized by new analytical insights and methods in the field of international business this collection of articles by Alan Rugman and Alain Verbeke celebrates their long and productive work together on issues facing top managers of multinational enterprises Fueled by their belief in the need for better theory in multinational strategic management the authors have explored a number of different facets in this increasingly important realm They have organized the work into five sections the foundations of a new theory of multinational strategic management a radically new examination of multinational strategic management national competitiveness the relatively under researched but increasingly important issue of environmental strategies of multinational enterprises and the interactions between multinational strategic management and public policy This outstanding collection inspired by the occasion of Alan Rugman s 60th birthday will be of great interest to scholars and practitioners of international business and management as well as to economists and lawyers      *Environmental Contracts:Comparative*

*Approaches to Regulatory Innovation in the United States and Europe* Eric W. Orts,Kurt Deketelaere,2001-03-20

Environmental regulation has come of age in recent decades as the blunt methods of command and control have been subjected to trenchant criticism from both economists and lawyers in the United States and Europe As a result of this intellectual development as well as continuing and increasing severity of environmental problems there is a need for fresh thinking about regulatory methods that are rational from both economic and legal points of view This book focuses on the viability of one particular regulatory innovation the use of agreements or contracts for environmental regulation as it has been practised in the United States and Europe The various contributions explore the general idea that certain kinds of environmental problems may best be addressed through contracts among interested parties including representatives of various levels of government business local community and employment representatives and public interest groups The parties get together to discuss a particular problem and then agree to an agreement or contract designed to address key issues and interests At least in some situations this approach may yield greater flexibility stronger commitment and more creative outcomes than traditional command and control regulation Experiments in the use of environmental contracts have

begun on both sides of the Atlantic a fact which makes the comparative study offered here especially timely and valuable
