Strategic Partners Russian Chinese Relations In The Post Soviet Era:

Strategic Partners Jeanne Lorraine Wilson, 2004 Russia's foreign policy experience in the first post Soviet decade was marked by disappointments as well as surprising turns. Expectations that Russia would join the Western powers as an equal partner were frustrated while relations with the People's Republic of China warmed considerably. Today Russia's relationship with China is an important component of its overall foreign policy orientation as the two states, one greatly diminished the other clearly on the rise, have found themselves sharing an interest in curbing the power of the United States. In analyzing Russia's evolving foreign policy vis-à-vis China, the author takes into account the legacy of Soviet era precedents, the simultaneous processes of economic policy change and integration into global economic structures and military relations. By shedding light on the role of political realism, decision makers and exogenous factors in Russian foreign policy, this analysis of an important bilateral relationship contributes to the larger project of understanding international relations and the dynamics of domestic and foreign policy change.

The United States and Contemporary China-Russia Relations Brandon K. Yoder, 2022-04-28 China and Russia have grown progressively closer over the last two decades, yielding a China-Russia axis uniquely capable of challenging the United States and of revising key aspects of the international order. Although the scholarly literature has offered detailed descriptions and various ad hoc explanations of this trend, the Sino-Russian bilateral

relationship has been the subject of very little scrutiny using rigorous theory which has precluded the formation of logically coherent and empirically supported explanations for increasing China Russia cooperation Moreover the cooperative post Cold War trend in the bilateral relationship is puzzling for each of the major paradigms of international relations theory realism constructivism and liberalism This volume brings together leading IR scholars from various theoretical perspectives as well as theoretically informed experts in Chinese and Russian foreign policy The chapters develop and apply nuanced theoretical arguments to derive testable hypotheses for the cooperative trend in China Russia relations In contrast to existing scholarship the book offers generalizable insights that both improve our understanding of a crucially important contemporary case while also advancing IR theory in substantial ways
