Durch, 2016-04-30 In this book William Durch examines conventional weapons proliferation since World War II the role of arms transfers in fueling regional conflict and prospects for curbing the global arms trade Noting that supply side arms control efforts which seek to constrain the companies and countries that produce and distribute major conventional weapons have a poor international track record Durch argues for a broader approach that tries to get at the demand side of the equation Addressing the political and regional dynamics that impel arms acquisitions he looks at how arms control might be combined with confidence and security building measures to contain demand and how value based arms trade control measures like codes of conduct could be implemented in stepwise fashion consistent with US national interests in regional stability Statistical Reference Index

The Strategic Implications of Change in the Soviet Union Francois Heisbourg,1990-06-18 This text is a compilation of papers together with a summing up of the origins and sustainability of change in the Soviet Union and the implications for the super power dialogue for East West strategic and economic relations for Europe and for the Asia Pacific **After The Storm** Anthony H Cordesman,2019-08-19 This comprehensive new analysis goes far beyond today's headlines and the basic facts and figures on the military forces in the region Tracing the origin of the military forces in each Middle East country Tony Cordesman discusses current security developments and provides a qualitative and quantitative analysis of the strength and effectiveness of **The US Versus the North Korean Nuclear Threat** Er-Win Tan,2013-11-26 Although the current world order is still dominated by the US there is increasing international concern over the possibility of regional security dilemmas arising from smaller powers attempts to develop Weapons of Mass Destruction A study of US North Korean interaction using the security dilemma as a conceptual frame of analysis is thus not only hugely topical but also particularly relevant for the 21st century on theoretical as well as empirical grounds Is there the prospect of a security dilemma contagion if North Korea acquire nuclear weapons capability leading to an Asia Pacific wide nuclear arms race This book examines this contentious issue in depth and explores the difficult choices policymakers face as a result of the uncertainty in international politics **Trappings of Power** Janne E. Nolan,2010-12-01 Since the beginning of the crisis precipitated by Iraq's invasion of Kuwait in August 1990 the threat posed by Iraq's arsenal of ballistic missiles has been the focus of international attention In the opening days of the US led military counteroffensive beginning on January 16 1992 Iraq launched ballistic missiles against population centers in Israel and military bases in Saudi Arabia The attacks intensified the terror of the war and prompted renewed efforts by the multinational force to destroy Saddam Hussein's military machine The countries aligned against Iraq were prepared for attacks by chemically armed missiles but Iraq's missile force proved to be of

little military consequence The missiles that survived the opening hours of Operation Desert Storm were conventionally armed inaccurate and unreliable Most of those that were actually launched either were intercepted by American antimissile defenses or failed to hit vital targets But the political impact of the missiles was inestimable The strikes symbolized Iraq's determination to prosecute the war no matter what the cost By threatening to involve Israel they created severe tensions and posed the risk that multinational military coalition would be dissolved and they underscored the potential vulnerability of all the states in the region to Iraqi aggression In this book Janne E Nolan argues that the use of missiles is a harbinger of the altered international security environment confronting the United States and its allies in the late twentieth century Long believed to be a distant prospect the adoption of technological resources to missile development is already occurring in over a dozen developing countries many of them long standing regional antagonists These capabilities present complicated challenges to American interests and foreign policy challenges that have only begun to be explored as a result of the Iraqi crisis The author examines the evolution

The Politics of Ballistic Missile Nonproliferation W. Bowen, 2000-01-20

During the presidency of George Bush 1989-93 the proliferation of nuclear chemical and biological weapons and the ballistic missiles capable of delivering them rose greatly in significance as issues on the American security agenda In the missile field this became evident by the efforts of certain elements in the executive branch and several congressmen to improve domestic and international implementation of the Missile Technology Control Regime The Politics of Ballistic Missile Nonproliferation examines the political bureaucratic and systemic issues that interacted to determine the outcome of these efforts
