Caring for the Earth The World Conservation Union (Iucn), Unep, Wwf, 2013-11-05 This is a strategy for a kind of development that provides real improvements in the quality of human life and at the same time conserves the vitality and diversity of the Earth The goal is development that will be sustainable Today it may seem visionary but it is attainable To more and more people it also appears our only rational option from Chapter 1 in 1980 the International Union for Conservation of Nature and Natural Resources the United Nations Environment Programme and the World Wide Fund for Nature the world's three most powerful organizations dedicated to preventing environmental catastrophe published the World Conservation Strategy It stressed the interdependence of conservation and development it gave currency to the idea of sustainable development and it made the point that unless the vitality and productivity of the planet are safeguarded the future for humanity is at risk Its impact was immediate and worldwide Now ten years later the same three organizations have formulated a new strategy for the 1990s Caring for the Earth builds on all that has been learned in the last decade about the complexity of the problems and shows how radical and far reaching are the actions and objectives needed to meet them Nothing less than a new ethic is required based on affirming the community of life and cherishing its diversity an ethic which has to be reflected in our personal attitudes and the organization of our communities as much as in wider policies Public participation is essential for the success of the strategy which is addressed to individuals and citizens groups as well as to governments whatever their systems Adopting it will not be easy but it does provide the agenda for immediate action Originally published in 1991
