Strategies for Sustainability, 2009 *Strategies for National Sustainable Development* Jeremy Carew-Reid, Robert Prescott-Allen, Stephen Bass, Barry Dalal-Clayton, 2013-11-05 The IUCN Strategies for Sustainable Development Handbook Series This handbook is one in a series being produced by IUCN and its partners to assist countries and communities implement Agenda 21 the action programme of the United Nations Conference on Environment and Development The series will include handbooks on national strategies for sustainable development local strategies assessing progress towards sustainability biodiversity action plans involving indigenous peoples and on integrating population and resource use planning and regular companion volumes of case studies addressing the key issues of concern to strategy implementation Many international agreements and action plans now call for countries to undertake national strategies These strategies seek to involve communities in united approaches to sustainable development Some are sectoral such as tropical forest strategies others are thematic covering topics such as biodiversity education or climate change Still others such as national conservation strategies and national environment action plans are evolving to become more comprehensive processes drawing together economic social and environmental development actions This handbook is for people involved in strategies It draws on experiences in different regions of the world to present options and examples of the role of strategies in sustainable development Originally published in 1995

Strategies for Africa's Climate Resilience Samantha Borkhoche, Miss Eman Abdulla, Mr. Edward R

Gemayel,Vidhi Maheshwari,Faten Saliba,2025-07-04 Africa is vulnerable to the impacts of climate change despite its minimal contribution to global greenhouse gas emissions The continent s burden manifests in shifting weather patterns which threatens food security and economic stability compounded by a growing population This paper is a novel attempt at understanding whether trade in green goods and engaging in green practices can reduce negative environmental outcomes in the region Using local projections methods we find that increasing trade in green goods decreases the harmful effect on the environment in the medium term In the medium term there are cumulative improvements in ecological footprint by about 4% decreases in net CO2 emissions embedded in trade by about 60 100% of total domestic production and decreases in PM2 5 air pollution by about 1% We also construct a novel Green Practices Index for Sub Saharan Africa to benchmark individual country performance and facilitate regional cooperation on green practices We find that engaging in green practices decreases harmful environmental outcomes by about 0 3 1 5% in the medium term Sustainable Development Strategies

Stephen Bass,Barry Dalal-Clayton,2012-09-10 This book is a cornerstone resource for a wide range of organizations and individuals concerned with sustainable development at national or local levels as well as for international organizations concerned with supporting such development Whilst the focus is on integrated strategies for sustainable development the approaches and methods covered are equally relevant to poverty reduction environmental and sectoral strategies programme development and review Agenda 21 called for all countries to develop sustainable development strategies For such strategies to be effective there needs to be a real commitment In every country government at all levels the private sector and civil society must work together in a true partnership in transparent ways which enable genuine stakeholder participation The necessary mechanisms and processes need to be coordinated to enable continuous learning and improvement This resource book provides flexible non prescriptive guidance on how to develop assess and implement national sustainable development strategies It sets out principles and ideas on process and methods and suggests how these can be used It is based on an analysis of past and current practice drawing directly from experience in both developed and developing countries Following a discussion of the nature and challenges of sustainable development and the need for strategic responses to them the heart of the book covers the main tasks in strategy processes Individual chapters offer a rich range of guidance ideas and case studies **Sustainable Development and Good Governance** Erik Denters,Konrad Ginther,Paul J.I.M. de

Wart,2023-08-28 The chapters in this volume are based on the papers that were presented at a seminar in March 1994 organized under the auspices of the newly established ILA Committee on Legal Aspects of Sustainable Development The seminar focused on the legal principles and international practice of sustainable development and good governance as one of its constitutive elements The book is divided into four parts Evolution of Concepts Participatory Development Development Cooperation and Human Rights and Sensible Economic and Social Policies They reflect the holistic concept of sustainable development advanced by the International Union for the Conservation of Nature sustainable development This concept

implies that maintaining a quality of life for many generations is socially desirable economically viable and ecologically sustainable The volume highlights the principle of sustainable development as a major topic in international law embodied in the international instruments agreed upon at the UN Conference on Environment and Development in Rio de Janeiro 1992 The introductory chapter discusses the interlinking of development and good governance including human rights democracy and sensible economic and social policies as presented in the 1994 UN Agenda for development The management of the economy society and environment towards sustainability will be one of the most momentous discussions of our times According to one author sustainable development is incompatible with continuous growth of the economy while good governance appears to be incompatible with the achievement within a reasonable time scale of a non growth society Other provocative opinions make this volume a highly challenging source for any scholar interested in the subject Agricultural Policies for Sustainable Management, and Use of Natural Resources in Africa ,1999 **Sustainability Management and Strategy** Igazeuma Adikema Okoroba, Enoch Opare Mintah, Robert Ebo Hinson, 2025-06-30 With Africa predicted to emerge as a leading market in the coming years the debate on sustainability especially on the mitigation of business impact on the continent s environment and society cannot be underestimated Prior to the worsening impact of climate change the continent has historically been struggling to consolidate sustainability efforts in driving social and environmental protection caused by both foreign majorly and local business activities in the region To capture current social and environmental injustice plaguing the African continent Secretary General Prof Petteri Taalas of the World Meteorological Organization WMO opined that Africa is responsible for less than 10 percent of global greenhouse gas emissions but it is the continent which is the least able to cope with the negative impacts of climate change Heatwaves heavy rains floods tropical cyclones and prolonged droughts are having devastating impacts on communities and economies with increasing numbers of people at risk Sustainability Reporting Frameworks have empowered sustainability leaders most especially Chief Sustainability Officers CSOs in organizations to develop practical strategies for leading sustainability related issues while driving systemic change for collective thinking towards mitigating the impact of climate change on society and the environment While there is undoubtedly a plethora of standards codes and toolkits to help frame the sustainability drive with leading CSOs around the globe sharing their lived experiences the narrative for best practices and what the content of sustainability initiatives and reporting should be have been skewed to the Western or advanced economies narrative This reporting has drowned out other continent specific narratives that offer a diverse pool of perspectives and locally rich content on some sustainability actions and achievements especially from CSOs The role of business sustainability leaders and CSOs in Africa in positioning the continent as the market of tomorrow with sound and robust sustainability practices needs to be spotlighted Owing to the gap this book brings the urgency to light through case studies and stories from leading African businesses while capturing their sustainability strategies and achievements This book moves beyond the experience and context of business in advanced

economies and responds to the need for an alternative narrative of sustainability leadership in Africa The focus of this book is on the role of sustainability leadership over the last decade and discusses the contributions and challenges of navigating this multi disciplinary function in different sectors The authors share their insight into this under researched and under reported perspective highly relevant to business and sustainability and environmental social and governance ESG reporting in a growing region like Africa

Stakeholder Dialogues on Sustainable Development Strategies D. Barry Dalal-Clayton, Krystyna Swiderska, Stephen Bass, 2002 This book provides a set of case studies summarising recent developing country experiences of developing and implementing national sustainable development strategies NSDSs These are based directly on the work of country teams that facilitated multi stakeholder dialogues on NSDSs Drawing also from this work and from broader international experience the early chapters explore new thinking and provide key lessons about the development implementation and monitoring of NSDSs and explore how the continuous improvement approach now advocated for NSDSs can link their development and implementation with the needs and opportunities for research The book is a practical complement to the Resource Book on Sustainable Development Strategies isn 1668215 which provides guidance on how to develop assess and implement such strategies

Management and Leadership for a Sustainable Africa, Volume 2 Kemi Ogunyemi, Oreva Atanya, Vanessa Burgal, 2022-11-16 To effectively deliver sustainable management in practice for Africa we need responsible leadership We need to deepen our understanding of sustainability in the unique socio political and economic context of the continent The roles of various actors across public private and non profit sectors as enablers of sustainable development need to be explored to understand the social economic and environmental SEE trends in Africa and its emerging and developing economies as well as to chart the way forward for the continent This second volume explores the roles and responsibilities of the players leaders and followers in the core public purpose and business spheres in delivering sustainable development outcomes for Africa Drawing on interviews cases and extensive literature this volume contributes to reflection on the leadership values and practices required for a sustainable Africa and the crafting of new policy approaches to address the development challenges such as environmental degradation economic inequities and social exclusion in Africa The African scope of the book is hinged on collaboration from authors across Africa and the inclusion of case stories from emerging economies in the five African subregions East West North Central and Southern Africa within the chapters The core message is that to achieve effective and sustainable management and development for Africa the practice of responsible leadership is critical

Sustainability Transitions in South Africa Najma Mohamed, 2018-07-11 South Africa s transition to a greener economy features prominently in the long term development vision of the country and is an integral part of the country s national climate change response strategy Despite significant gains in socio economic development since its transition to democracy the country continues to face the triple challenges of rising unemployment income inequality and poverty amid a slowdown in economic growth Sustainability transitions offer new ways of shifting the trajectory of South

Africa's resource intensive economy towards low carbon pathways linked to the country's transformative development agenda. Calls for inclusive approaches to greening the South African economy which addresses the most vulnerable in society and ensures that the benefits of sustainability innovations reach all South Africans are becoming more pronounced as sustainable development policy reforms are being implemented. The question that should be placed centre stage in South Africa's sustainability discourse is whether notions of justice and inclusivity are being sufficiently addressed in the design and implementation of policy and programme interventions. This book explores South Africa's sustainability transition through reflections on critical policy economic technological social and environmental drivers. It provides a synthesis of theoretical insights including new models and concepts and praxis through illustrations from South Africa's growing landscape of sustainable development policies and programmes. Finally it assesses whether these transition pathways are beginning to reconfigure the system level structures hindering the country's goal of ensuring environmental sustainability and an equitable transition to a low carbon economy.

One World for One Earth Philip Sarre, Paul Smith, Paul Smith with Eleanor Morris, 2013-11-05. We have only one earth and how we choose to live in it matters. This highly readable and challenging text sets out some important topical issues that tells us we are not making a very good job of it. From the tropical rainforests to the teeming cities of the developing world and the energy hungry nations of Europe and North America *One World for One Earth* shows that many of today's environmental problems can only be understood in terms of both the physical and the social processes involved. At present we are in a vicious circle. Uneven development creates problems of affluence in some areas and problems of poverty in others. In both the environment suffers. Independent local action has a crucial part to play but to be really effective sustainable development needs a new context which can only be put in place by international government co-operation. This book by going beyond the conventional accounts of environmental problems provides a basis for action. Originally published in 1991.

Social Change and Conservation Krishna B. Ghimire, Michael P. Pimbert, 2013-11-05. The book discusses protected areas and conservation policies critically reviewing protected areas management and the concepts of conservation. Drawing on case studies from North America Europe Asia and Africa it shows how they affected local people their customary rights livelihoods well being and social cohesion. The book argues for an overhaul of conservation thinking and practice.

Wasted Michael Redclift, 2013-11-05. Sustainable development cannot be achieved solely at the international level. Without the creation of more sustainable livelihoods it will remain a utopian and elusive goal. Yet given the huge differences in economic development and levels of consumption between North and South how might this be brought about? Taking the 1992 Rio Summit as its point of departure *Wasted* examines what we now need to know and what we need to do to live within sustainable limits. One of the key issues is how we use the environment converting natural resources into human artifices commodities and services. In the process of consuming we also create sinks. Today these sinks the empty back pocket in the global biogeographical system are no longer empty. The fate of the global

environment is indissolubly linked to our consumption particularly in the energy profligate North To understand and overcome environmental challenges we need to build the outcomes of our present consumption rates into our future behavior to accept sustainable development as a normative goal for societies one that is bound up with our everyday social practices and actions In this absorbing new book Michael Redclift argues that the way we understand and think about the environment conditions our responses and our ability to meet the challenge and discusses tangible policies for increased sustainability that are grounded in recent research and practice **A Practical Guide to Strategy** Ilse Hobbs, Jan Havenga, 2004-06-01

How do we incorporate strategy in everything that we do Can we make our lives and businesses more meaningful with a practical strategic approach The authors of this book believe that it is not only possible but that strategy can be a powerful tool to enrich our lives and provide focus to our thoughts and relationships They describe with business case studies enriched by examples from other walks of life a simple process to guide our strategic thinking **Domestic and Regional**

Environmental Laws and Policies in Africa Jean-Claude N. Ashukem, Semie M. Sama, 2023-11-10 This book explores African domestic and regional responses and approaches to environmental protection and sustainability Written by African experts the collection consists of five parts covering the whole of Africa It provides broad coverage of specific themes including environmental constitutionalism climate change gender and the environment wildlife trade environmental justice and human displacement The key aims are first to explore theoretical and empirical studies to interrogate and provide clarity on academic discourse on how and whether environmental human rights approaches and policy implications have effectively enhanced environmental protection and sustainability at African domestic levels Second to investigate and present innovative solutions on how African domestic legal regimes deal with environmental justice natural resources governance refugees environmental rights and climate induced displaced persons Finally to propose innovative legal and institutionalised solutions to Africa's ecological realities by determining the legal and regulatory gaps on environmental human rights issues on the continent The collection will be a valuable resource for researchers academics and policymakers in human rights law environmental law political science ecology and conservation environmental management disaster management and development studies **Regional Workshop on Development and Implementation of Local Strategies for**

Sustainable Agriculture ,2025-04-10 Scientific developments in agriculture and technologies of chemical fertilizers and pesticides fed the green revolution of the mid 20th century Still a few decades later pollution and toxins from those chemicals became evident Now climate change partially caused by agricultural technologies has also moved to the centre of our preoccupations These environmental problems as well as economic and social inequities incentivize the search for more sustainable agricultural technologies that can be brought about by deeper scientific insight Replacing chemical fertilizers with less harmful products which we can refer to as organic fertilizers while still maintaining crop production capable of feeding the global population is an objective for farmers policymakers and in fact for everyone In today s world science and technology move forward rapidly pervading every aspect of social and individual lives keeping in touch with them is necessary for each of us in our field of work This book aims to help us replace chemical fertilizers with organic ones In the following chapters the reader can find reviews of recent developments and reports of experimental works on organic fertilizers that might help better understand their advantages and drawbacks
