**Understanding Strategic Interaction** Wulf Albers, Werner Güth, Peter Hammerstein, Benny Moldovanu, Eric van Damme, 2012-12-06 Strategic interaction occurs whenever it depends on others what one finally obtains on markets in firms in politics etc Game theorists analyse such interaction normatively using numerous different methods The rationalistic approach assumes perfect rationality whereas behavioral theories take into account cognitive limitations of human decision makers In the animal kingdom one usually refers to evolutionary forces when explaining social interaction The volume contains innovative contributions surveys of previous work and two interviews which shed new light on these important topics of the research agenda The contributions come from highly regarded researchers from all over the world who like to express in this way their intellectual inspiration by the Nobel laureate Reinhard Selten

*Planning Strategic Interaction* Charles R. Berger, 2020-07-24 In an earlier era the communication field was dominated by the study of mediated and unmediated message effects during which considerable research focused on the attitudinal and action consequences of exposure to messages A more catholic purview of the communication process exists today This more encompassing perspective does not deny the importance of studying message effects but raises the

additional question of how individuals generate messages in the first place While the earlier era of communication research was dominated by studies that focused on attitude and behavior change as primary dependent variables such variables as message comprehension have begun to emerge in this new era The focus on communication and cognition has led paradoxically to a more intense focus on social interaction processes The theory and research presented in this volume seeks to strike a balance between the internal workings of the individual cognitive system on the one hand and the outer world of social interaction on the other Whether or not the theory and research stands the test of time it is clear that complete cognitive accounts of social interaction cannot confine themselves to mere descriptions of the cognitive structures and processes that are responsible for message production and comprehension Explicit links must be made between these cognitive structures and processes and the workings of social interaction This work takes a modest step in that direction

Strategic Interaction Erving Goffman, 1970 The two essays in this classic work by sociologist Erving Goffman deal with the calculative gamelike aspects of human interaction Goffman examines the strategy of words and deeds he uses the term strategic interaction to describe gamelike events in which an individual's situation is fully dependent on the move of one's opponent and in which both players know this and have the wit to use this awareness for advantage Goffman aims to show that strategic interaction can be isolated analytically from the general study of communication and face to face interaction The first essay addresses expression games in which a participant spars to discover the value of information given openly or unwittingly by another The author uses vivid examples from espionage literature and high level political intrigue to show how people mislead one another in the information game Both observer and observed create evidence that is false and uncover evidence that is real In Strategic Interaction the book's second essay action is the central concern and expression games are secondary Goffman makes clear that often when it seems that an opponent sets off a course of action through verbal communication he really has a finger on your trigger your chips on the table or your check in his bank Communication may reinforce conduct but in the end action speaks louder Those who gamble with their wits and those who study those who do will find this analysis important and stimulating
