Strategies Of Deconstruction:

Strategies of Deconstruction Joseph Claude Evans, 1991 Strategies of Deconstruction was first published in 1991 Minnesota Archive Editions uses digital technology to make long unavailable books once again accessible and are published unaltered from the original University of Minnesota Press editions In the past two decades the movement of deconstruction has had tremendous impact on a number of academic disciplines in the United States However its force has been rather limited in the field of philosophy despite the fact that in Europe the practice of deconstruction emerged in the work of philosophers Although the reasons for this can be debated two of the more obvious explanations are the mainstream Anglo American philosophers rarely studied the German and French philosophical traditions in great detail and deconstruction s focus on discourse and interpretation has made it more attractive to the literary and humanistic disciplines With this context Strategies of Deconstruction focuses on the early work of Jacques Derrida the French philosopher who introduced deconstruction in Speech and Phenomena his study of Edmund Husserl and Of Grammatology and whose philosophical reputation stems in no small part from his work on Husserl In examining the philosophical import of Derrida s theories of reading text and language specifically as they related to Speech and Phenomena J Claude Evans makes careful reference to Husserl s own texts His analysis indicates that there are many systematic irregularities in Derrida s study and that without those irregularities Derrida s conclusions cannot be substantiated

Nixon, Dieter Heuskel, 2000-12-19 The end of the nineteenth century saw the construction of the vertically integrated value chains that came to define modern business The end of the twentieth century witnessed their deconstruction In industries across the economy markets are intruding on the web of proprietary arrangements that have held these chains together As they do the boundaries defining business companies and industries are coming under attack radically transforming the nature of competition Powerful forces such as globalization and deregulation are undermining the logic and practice of traditional vertical integration but the most powerful partly because it acts as catalyst and an accelerator is a revolution in

A Reflexive Reading of Urban Space Mona A. Abdelwahab, 2018-02-13 Providing a critique of the concepts attached to the representation of urban

space this ground breaking book formulates a new theory of space which understands the dynamic interrelations between physical and social spaces while tracing the wider urban context It offers a new tool to approach the reading of these interrelations through reflexive reading strategies that identify singular reading fragments of the different spaces through multiple reader time space relations The strategies proposed in the volume seek to develop an integrative reading of urban space through recognition of the singular influenced by discourse institution etc and temporal influenced by reading perspective in space and time thereby providing a relational perspective that goes beyond the paradox of place in between social and physical space identifying each in terms of relationships oscillating between the conceptual the physical and social content and the context In conclusion the book suggests that space place can be read through sequential fragments of people place context mind and author reader Operating at different scales between conceptual space and reality the sequential reading helps the recognition of multiplicity and the dynamics of place as a transformational process without hierarchy or classification

The Paradoxical Foundation of Strategic Management Andreas Rasche, 2007-10-25 This book offers a systematic critique of the scientific discourse of strategic management It uncovers scholars unquestioned assumptions and shows that by upholding these assumptions researchers obscure the paradoxical nature of strategic reasoning To uncover the paradoxes of strategic management the author refers to the philosophy of Jacques Derrida He exposes the paradoxes that inevitably occur when theorizing about corporate strategy along the dimensions strategy context process and content and shows how these paradoxes can enrich future thinking about strategic problems The analysis is completed by a discussion of theoretical and practical implications which highlight the need to research strategy not as something an organization has but as something an organization does Such a practice perspective gives reference to the paradoxical ground that strategic management rests on and enriches scholars ability to reflect on practitioners tasks while doing strategy in organizations

Literary Theory and Criticism Patricia Waugh, 2006 This volume offers a comprehensive account of modern literary criticism presenting the field as part of an ongoing historical and intellectual tradition Featuring thirty nine specially commissioned chapters from an international team of esteemed contributors it fills a large gap in the market by combining the accessibility of single authored selections with a wide range of critical perspectives The volume is divided into four parts Part One covers the key philosophical and aesthetic origins of literary theory while Part Two discusses the foundational movements and thinkers in the first half of the twentieth century Part Three offers introductory overviews of the most important movements and thinkers in modern literary theory and Part Four looks at emergent trends and future directions

Deconstructionism Hector Davidson, Deconstructionism emerged in the late 20th century as a philosophical and literary movement that fundamentally questioned the nature of meaning language and interpretation It is primarily associated with the work of French philosopher Jacques Derrida who in the 1960s and 1970s began to develop ideas that would challenge long held assumptions in philosophy literary theory and critical thought The movement was a response to structuralism

which sought to uncover the underlying structures that govern language and society In contrast deconstruction aimed to show that meaning is inherently unstable and that texts and concepts can never be fully fixed or understood in a singular unchanging way The foundational work of Jacques Derrida is central to deconstructionism His concept of différance a term he coined in 1968 highlighted the ways in which meaning is always deferred and never fully attainable Derrida's analysis of language showed that words and concepts derive meaning not from a stable inherent essence but from their relationships with other words In this sense meaning is always in flux and any attempt to pin it down is doomed to fail Derrida's critique of binary oppositions such as presence/absence speech/writing and truth/falsehood argued that these pairs are not neutral but are hierarchically structured with one term always subordinating the other Through works like *De la grammatologie* 1967 and *La Voie et le Voice* 1967 Derrida redefined how we understand texts insisting that they are always open to multiple interpretations

Researching the contemporary city Peter Kellett, Jaime Hernández García, 2013-11-12 The city is perhaps the most complex of all human constructs In the 21st century when cities are bigger than ever and the majority of the world's population now live in urban areas the need for research into this complexity to address the large scale challenges of urban life has never been greater This collection of research studies from different parts of the world brings together case studies underpinned by theory to contribute to the urgent search to make our cities more just more livable more accessible more participatory and more democratic in short more humane places to live and work These crosscutting themes of social inclusion spatial integration and poverty alleviation are the ever present motifs and motivations throughout this volume The eleven chapters are grouped into four interrelated sections the creation and representation of the urban the production and transformation of the informal the construction and appropriation of public spaces and finally the transformation use and meaning of home Collectively the essays engage with the city at a range of scales but underpinning all of them is a concern for the everyday realities of ordinary people's lives These detailed and finegrain analyses of complex processes are a modest contribution towards the creation of cities which are not simply more economically viable and environmentally sustainable but also embody the ideals of social justice

Handbook of Feminist Research Sharlene Nagy Hesse-Biber, 2012 The second edition of the *Handbook of Feminist Research Theory and Praxis* presents both a theoretical and practical approach to conducting social science research on for and about women The Handbook enables readers to develop an understanding of feminist research by introducing a range of feminist epistemologies methodologies and methods that have had a significant impact on feminist research practice and women's studies scholarship The Handbook continues to provide a set of clearly defined research concepts that are devoid of as much technical language as possible It continues to engage readers with cutting edge debates in the field as well as the practical applications and issues for those whose research affects social policy and social change It also expands on the wealth of interdisciplinary understanding of feminist research praxis that is grounded in a tight link between epistemology methodology and method The second edition of this

Handbook will provide researchers with the tools for excavating subjugated knowledge on women's lives and the lives of other marginalized groups with the goals of empowerment and social change **Dialectical Rhetoric** Bruce

McComiskey, 2015-06-26 In *Dialectical Rhetoric* Bruce McComiskey argues that the historical conflict between rhetoric and dialectic can be overcome in ways useful to both composition theory and the composition classroom. Historically, dialectic has taken two forms in relation to rhetoric. First, it has been the logical development of linear propositions leading to necessary conclusions, a one-dimensional form that was the counterpart of rhetorics in which philosophical, metaphysical, and scientific truths were conveyed with as little cognitive interference from language as possible. Second, dialectic has been the topical development of opposed arguments on controversial issues and the judgment of their relative strengths and weaknesses, usually in political and legal contexts, a two-dimensional form that was the counterpart of rhetorics in which verbal battles over competing probabilities in public institutions revealed distinct winners and losers. The discipline of writing studies is on the brink of developing a new relationship between dialectic and rhetoric, one in which dialectics and rhetorics mediate and negotiate different arguments and orientations that are engaged in any rhetorical situation. This new relationship consists of a three-dimensional hybrid art called dialectical rhetoric, whose method is based on five topoi: deconstruction, dialogue, identification, critique, and juxtaposition. Three-dimensional dialectical rhetorics function effectively in a wide variety of discursive contexts, including digital environments, since they can invoke contrasts in stagnant contexts and promote associations in chaotic contexts. *Dialectical Rhetoric* focuses more attention on three-dimensional rhetorics from the rhetoric and composition community. *Cambridge Handbook of Strategy as Practice* Damon Golsorkhi, Linda Rouleau, David

Seidl, Eero Vaara, 2010-08-26 The *Cambridge Handbook of Strategy as Practice* provides a comprehensive overview of an emerging and growing stream of research in strategic management. An international team of scholars has been assembled to produce a systematic introduction to the various epistemological, methodological, and theoretical aspects of the strategy as practice approach. This perspective explores and explains the contribution that strategizing makes to daily operations at all levels of an organization. Moving away from a disembodied and asocial study of firm assets, technologies, and practices, the strategy as practice approach breaks down many of the traditional paradigmatic boundaries in strategy to investigate who the strategists are, what strategists do, how they do it, and what the consequences or outcomes of their actions are. Including a number of detailed empirical studies, the handbook will be an essential guide for future research in this vibrant field.

Augustine and Nicene Theology Rene Barnes, 2024-01-25 In this collection of essays, Michel Rene Barnes offers a new reading of the character and development of Latin Trinitarian theology in the fourth and fifth centuries. Although Augustine is the principal focus, he is treated here as an inheritor of an earlier Latin tradition. Antecedent theologians, most notably including Marius Victorinus, are given a revised interpretation, and Augustine himself is explored from multiple angles. At every turn, developments in Augustine's thought are shown to be a response to the anti-Nicene theologies of the period. Most

significantly this view decries the modern systematic tendency to engage with Augustine only through a simplified version of late nineteenth century categories This accusation invites the question of how far modern theology can actually engage with Patristic theology at all but Barnes offers a way forward

The Context of Logocentrism in Derrida's Thought Roland Theuas DS. Pada,2023-07-24 This collection of essays explores Derrida's critique of logocentrism from the problem of prioritising speech over writing to the fundamental assumptions of the metaphysics of presence While Derrida is often portrayed as a staunch critic of logocentrism in his reading of philosophical texts the central premise here is that Derrida was implicitly affirming the necessity of logocentrism in his works As such this book explores this implicit affirmation of logocentrism as a relatively stable foundation for meaning that can be revised altered and appropriated to give way to new possibilities of meaning while operating within the context of the axioms of logocentrism

Lauer,2004 Invention in Rhetoric and Composition examines issues that have surrounded historical and contemporary theories and pedagogies of rhetorical invention citing a wide array of positions on these issues in both primary rhetorical texts and secondary interpretations It presents theoretical disagreements over the nature purpose and epistemology of invention and pedagogical debates over such issues as the relative importance of art talent imitation and practice in teaching discourse After a discussion of treatments of invention from the Sophists to the nineteenth century Invention in Rhetoric and Composition introduces a range of early twentieth century multidisciplinary theories and calls for invention's awakening in the field of English studies It then showcases inventional theories and pedagogies that have emerged in the field of Rhetoric and Composition over the last four decades including the ensuing research critiques and implementations of this inventional work As a reference guide the text offers a glossary of terms an annotated bibliography of selected texts and an extensive bibliography Janice M Lauer is Professor of English Emerita at Purdue University where she was the Reece McGee Distinguished Professor of English In 1998 she received the College Composition and Communication Conference's Exemplar Award Her publications include Four Worlds of Writing Inquiry and Action in Context Composition Research Empirical Designs and New Perspectives on Rhetorical Invention as well as essays on rhetorical invention disciplinarity writing as inquiry composition pedagogy historical rhetoric and empirical research

Theory, and Deconstruction Matthew H. Kramer,1991 Gorgias and the New Sophistic Rhetoric Bruce McComiskey,2002

In Gorgias and the New Sophistic Rhetoric Bruce McComiskey achieves three rhetorical goals he treats a single sophist s rhetorical techn art in the context of the intellectual upheavals of fifth century bce Greece thus avoiding the problem of generalizing about a disparate group of individuals he argues that we must abandon Platonic assumptions regarding the sophists in general and Gorgias in particular opting instead for a holistic reading of the Gorgianic fragments and he reexamines the practice of appropriating sophistic doctrines particularly those of Gorgias in light of the new interpretation of Gorgianic rhetoric offered in this book In the first two chapters McComiskey deals with a misconception based on selective and Platonic readings of the extant fragments that Gorgias s rhetorical techn involves the deceptive practice of manipulating public opinion This popular and ultimately misleading interpretation of Gorgianic doctrines has been the basis for many neosophistic appropriations The final three chapters deal with the nature and scope of neosophistic rhetoric in light of the non Platonic and holistic interpretation of Gorgianic rhetoric McComiskey postulates in his opening chapters He concludes by examining the future of communication studies to discover what roles neosophistic doctrines might play in the twenty first century McComiskey also provides a selective bibliography of scholarship on sophistic rhetoric and philosophy in English since 1900 Working Papers Film & TV studies - WP 2011/1: Gay representation, queer resistance, and the small screen

Frederic Dhaenens,2011 Drawing on the fruitful insights of queer theory this study departs from the notion that popular culture can function as articulations of resistance to the discourse of heteronormativity that is being reiterated and consolidated in popular culture products In particular this study focuses on the potential of gay representation representations of those who are identified and or self identify as gay lesbian or bisexual in contemporary television fiction to resist heteronormative institutions practices norms and values
