Strategies Argument Presentati Hirschberg, 1990-01-03 **Argument Tactics** Xena Mindhurst, AI, 2025-01-31

Argument Tactics presents a groundbreaking approach to understanding and mastering the art of argumentation by uniquely combining psychological insights with philosophical principles. This comprehensive guide explores the intricate relationship between logical construction and psychological dynamics, demonstrating how effective arguments rely on both rational structure and understanding human cognitive processes. The book progresses systematically through three main sections, beginning with the fundamental architecture of arguments including premises, conclusions, and inferential relationships. It then delves into the psychological elements of argumentation, examining cognitive biases and decision-making patterns that influence how people process and respond to different forms of reasoning. The final section bridges theory with practice through real-world case studies from law, business, negotiation, and academic discourse. What sets this work apart is its evidence-based methodology, drawing from cognitive science, formal logic, and communication studies to create a practical framework for argument construction. Rather than simply focusing on traditional debate techniques, it teaches readers how to recognize and counter logical fallacies while understanding the psychological factors that influence persuasion. This balanced approach makes it particularly valuable for professionals in fields requiring strong analytical skills and students developing their critical thinking abilities, offering both theoretical understanding and practical application strategies. **Topical**

Themes in Argumentation Theory Frans H. van Eemeren, Bart Garssen, 2012-05-05. **Topical Themes in Argumentation Theory** brings together twenty exploratory studies on important subjects of research in contemporary argumentation theory. The essays are based on papers that were presented at the 7th Conference of the International Society for the Study of Argumentation (ISSA) in Amsterdam in June 2010. They give an impression of the nature and the variety of the kind of research that has recently been carried out in the study of argumentation. The volume starts with three essays that provide stimulating theoretical perspectives on argumentation. Subsequently, some views are explained on the intriguing topics of dissensus and deep disagreement. After a discussion of three different approaches to the treatment of types of argumentation, some classical themes from antique argumentation theory are revisited. The new research area of visual argumentation is explored in the next part. The volume concludes with three reports of experimental studies concerning argumentative discourse. Prejudice in Discourse Teun A. van Dijk, 1984-01-01 In this book a study is made of ethnic prejudice in cognition and conversation based on intensive interviewing of white majority group members After an introductory survey of traditional and more recent approaches in social psychology to the study of prejudice a new sociocognitive theory is sketched This theory explains how cognitive representations and strategies of ethnic prejudice depend on their social functions within intergroup relations It is also shown how ethnic prejudice is communicated in society through everyday talk among majority members The major part of the book systematically analyzes the various dimensions of prejudiced conversations such as topical structures storytelling argumentation local semantic strategies style and rhetoric and more specific conversational properties It is shown that such an explicit discourse analysis may reveal underlying cognitive representations and strategic uses of prejudice Moreover it appeared that many aspects of prejudiced talk are geared towards the overall strategic goals of adequate self expression and positive self presentation This book is interdisciplinary in nature and should be of interest to linguists discourse analysts cognitive and social psychologists sociologists and all those interested in ethnic stereotypes prejudice and racism
