Strategies For Postsecondary Education:

Strategies for Postsecondary Education Peter Scott,2018-10-11 Originally published in 1975 Strategies for Postsecondary Education looks at how postsecondary education absorbs an increasing proportion of education budgets in developed countries The book analyses the inequalities in the American postsecondary education system and compares its performance with France and the United Kingdom The traditional concept of higher education with its preference for the college sector is now being challenged by the notion of postsecondary education which embraces the community colleges and preparatory schools in the United States and the polytechnics in Great Britain The book argues that the development of the non collegiate sector including further education outside a formal educational context will extend the range of educational opportunity and make much better use of limited resources **Transition to Postsecondary Education** Kristine Wiest Webb,2000

Strategies for Improving Student Success in Postsecondary Education. Changing Direction Arthur M. Hauptman,2007 The U S record in promoting student readiness for access to and success in postsecondary education has been mixed College participation rates are among the highest in the world but other indicators are marginal at best Available data indicate that levels of college readiness in the U S are not what they should be and degree completion rates are average to below average among industrialized nations This leads to two questions 1 Why has the U S done so much better at achieving high levels of access than in promoting student readiness and success and 2 Why have equity gaps throughout the postsecondary educational pipeline proved so difficult to close over a prolonged period of time This paper explores three possible explanations for the current state of affairs and makes four suggestions for changes in state policies that would help improve retention and degree completion rates for a broad range of students The paper concludes with a brief discussion of what areas of research and analysis might be pursued to help better understand what policies may be needed to achieve higher levels of student success Contains 2 tables and 24 endnotes *Preparation for Postsecondary Education and Training* K. sometimes also described as developmental education refers to courses taught within postsecondary education that cover content below the college level Students who require remediation upon entering postsecondary institutions may face adverse consequences First these students may be less likely to complete their course of study and more likely to stop out or drop out Second it may take these students longer both in terms of the number of courses taken and number of years enrolled to complete their studies It is therefore in the best interests of Missouri that it address and improve remedial education at the postsecondary level To this end this report examines remedial education from several angles It first investigates the extent of remedial coursetaking in postsecondary education both nationally and in Missouri It then explores remedial students persistence and attainment compared with the persistence and attainment of nonremedial students The report concludes by describing the various approaches to remedial education that have been adopted throughout the country A table Research Evaluations of Remedial Education Interventions is appended Contains 7 figures 1 table and 4 footnotes *Strategic Plan for the U.S. Department of Education* United States. student aid and job training can help lower skilled adults and youth access postsecondary education but important policy choices that support their success and completion can be made at the state and local levels Beyond Basic Skills describes strategies that state policymakers can use to strengthen connections between basic skills education and postsecondary education to help lower skilled adults and out of school youth attain the postsecondary credentials they need to advance in the labor market Contains 3 figures and 45 endnotes   *Native American Strategies for Student Success in Postsecondary Education* Gail M.
