contribution to the global public management reform debate by offering an analysis of reform trajectories in an important but rather neglected group of Southern European countries Ewan Ferlie King's College London UK Since the 1980s a wave of reforms of public management has swept the world The investigation into the effects of such major transformations has however been unbalanced important countries have received only limited attention This timely book fills the gap by investigating the dynamics of contemporary public management reform in five European countries that gave shape to the Napoleonic administrative tradition France Greece Italy Portugal Spain Edoardo Ongaro presents an in depth investigation of the reform of public management in these countries revisiting major topics of theoretical interest in the study of public administration He addresses key issues regarding the influence of the past on the transformation of the public sector

Kettl, 2006-05-24 Over the last quarter century governments around the world have launched ambitious efforts to reform how they manage their programs Citizens have demanded smaller cheaper more effective governments They have also asked for more programs and better services To resolve this paradox governments have experimented with scores of ideas to be more productive improve performance and reduce costs In this new edition of The Global Public Management Revolution Donald F. Kettl charts the basic models of reform that are being employed worldwide Reviewing the standard strategies and tactics behind these reforms Kettl identifies six common core ideas the search for greater productivity more public reliance on private markets a stronger orientation toward service more decentralization from national to subnational governments increased capacity to devise and track public policy and tactics to enhance accountability for results Kettl predicts that reform and reinvention will likely become mantras for governments of all stripes Ultimately this strategy means coupling the reform impulse with governance government's increasingly important relationship with civil society and the institutions that shape modern life *Staff Participation and Public Management Reform* D. Farnham, A. Hondeghe, S. Horton, 2005-06-07 This book explores the role of civil servants and their trade unions in the public management reform process framing it in its economic social cultural and legal contexts Building on neo

institutional and stakeholder theories the book shows how staff and their representative organisations have influenced the formulation and implementation of public management reforms in twelve OECD countries This study challenges top down elite theories that have dominated the existing literature explaining how staff participation practices both direct and indirect have impacted on the implementation of reforms in different ways in different countries The book concludes that variations in staff participation in the reform process depend upon institutional and political factors and the distribution of power in the employment relationship
